They apply to exam candidates of different level of computer industry. So whichever degree you are at, you can utilize our TDA-C01 study materials tool with following traits.

Tableau Certified Data Analyst Sample Questions (Q87-Q92):

NEW QUESTION # 87

You have the following visualization.

□

You want the count of Returns displayed only for the first year in the table.

How should you complete the formula in the calculated field? (Use the dropdowns in the Answer Area to select the correct options to complete the formula.)

Answer:

Explanation:

Explanation:

we need to create a calculated field that displays the count of returns only for the first year in the table. To do this, we can use the following formula:

IF FIRST () = 0 THEN COUNT (Returns) END

This formula uses the FIRST () function, which returns the number of rows from the current row to the first row in the partition. If the current row is the first row, then FIRST () returns 0. The IF statement checks if this condition is true, and if so, it returns the count of returns for that row. Otherwise, it returns NULL.

To complete the formula in the calculated field, you should select the following options from the drop-down menus:

FIRST ()

0

COUNT (Returns)

NEW QUESTION # 88

You have the following dataset:

You want to create a parameter to dynamically filter the data to produce the following results.

Which two types of parameters can you use to produce the results? Choose two.

- A. Boolean
- B. Datetime
- C. Integer
- D. Float
- E. String
- F. Date

Answer: C,E

Explanation:

In the context of filtering data in Tableau, both string and integer parameters can be used to dynamically filter data. A string parameter can be used to filter text-based values, while an integer parameter is suitable for numerical values. In the provided dataset and result URLs, it appears that a unique identifier or key (which could be a string or integer) is being used to filter specific data entries. NEW QUESTION # 89

Open the link to Book1 found on the desktop. Open Disciplines worksheet.

Filter the table to show the members of the Top10 set and the members of the Bottom10 set. There should be a total of 20 rows.

Answer:

Explanation:

check the steps below in explanation

Explanation:

To filter the table to show the members of the Top10 set and the Bottom10 set, you need to do the following steps:

Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Disciplines worksheet.

Click on the Disciplines tab at the bottom of the workbook to open the worksheet. You will see a table that shows the disciplines, sales, and profit for each salesperson.

Click on the drop-down arrow next to Salesperson on the Filters shelf. This will open a menu that allows you to filter by different criteria.

Select Set from the menu. This will show you the sets that are available for the Salesperson field. You will see Top10 and Bottom10

as two sets that have been created based on the sales ranking.

Check the boxes next to Top10 and Bottom10. This will filter the table to show only the members of these two sets. You can also click on All to deselect all other values.

Click OK to apply the filter. You will see that the table now shows 20 rows, 10 for each set.

NEW QUESTION # 90

You have a table that contains the following data.

How should you complete the formula? (Drag the appropriate Options to the Answer Area and drop into the correct locations.)

Answer:

Explanation:

Explanation:

To complete the formula, you should drag the option MAX from the list of options and drop it into the first blank space, and then drag the option [Sales] and drop it into the second blank space. The formula will look like this: Option (MAX) Option ([Sales]). This formula will calculate the maximum value of the sales field for each country. You can use this formula to create a calculated field that will show the highest sales amount for each country in your data source. References:

NEW QUESTION # 91

You have a workbook that uses an extracted data source.

You publish the workbook to Tableau Server.

Which three actions can you perform from the Extract Refresh page in Tableau Server? Choose three.

- A. Change the refresh from full to incremental.
- B. Modify the frequency of the refresh.
- C. Run a refresh.
- D. Change the priority of the refresh.
- E. Delete the refresh.

Answer: C,D,E
