DSCI Certified Privacy Lead Assessor (DCPLA)

Training And Program Exam

Question 1. What is the primary purpose of GDPR's data minimization principle?

- A) To limit the collection of personal data to what is directly relevant and necessary for the purpose
- B) To ensure data is stored for as long as necessary
- C) To restrict cross-border data transfers
- D) To allow unrestricted processing of personal data for marketing purposes

Answer: A

Explanation: Data minimization mandates collecting only the personal data that is necessary for the specified purpose, reducing unnecessary data collection and enhancing privacy.

Question 2. Which role is primarily responsible for overseeing data protection compliance within an organization under GDPR?

- A) Data Subject
- B) Data Protection Officer (DPO)
- C) Chief Executive Officer (CEO)
- D) Privacy Committee Member

Answer: B

Explanation: The DPO is appointed to monitor and advise on data protection strategies, ensuring compliance with GDPR requirements.

Our DCPLA exam braindumps will give you a feeling that they will really make you satisfied. I know that we don't say much better than letting you experience it yourself. We very much welcome you to download the trial version of our DCPLA practice engine. Our ability to provide users with free trial versions of our DCPLA Study Materials is enough to prove our sincerity and confidence. Just free download the DCPLA learning guide, you will love it for sure!

The DCPLA certification exam is designed to test the candidate's proficiency in privacy management, including the legal and regulatory requirements, privacy principles, privacy risk assessment, privacy audit, and privacy management frameworks. DCPLA exam validates the candidate's ability to assess privacy risks and recommend privacy solutions to organizations. It also evaluates the candidate's ability to develop and implement privacy policies, procedures, and controls to ensure compliance with privacy laws and regulations. The DSCI DCPLA certification is recognized globally and is an essential credential for professionals who want to build a successful career in the privacy domain.

To be eligible for the DCPLA Certification, candidates must have a minimum of two years of experience in data protection and privacy management activities. Candidates must also attend a training program offered by DSCI or an authorized training partner before taking the certification exam. The training program covers all the topics included in the certification exam and includes practical exercises, case studies, and discussions.

DSCI certification DCPLA exam questions and answers come out

These practice exams are solely designed to help you achieve DCPLA certification on the first attempt. The mock exam simulator helps you get through every topic inside out and you get overall better grades. This is because you have hands-on the most updated and most reliable DSCI DCPLA Questions created under the supervision of 90,000 DSCI professionals.

DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q56-Q61):

NEW QUESTION # 56

Certification once granted, will be valid for period of _____ years subject to surveillance assessments.

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

As per DAF#P guidelines, the certification issued by DSCI remains valid for a period of three years, during which surveillance assessments are conducted to verify continued compliance. These surveillance checks help ensure the privacy program maintains its effectiveness over time.

NEW QUESTION # 57

Entities should collect personal information from user that is adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed. This Privacy Principle is called:

- A. Storage Limitation
- B. Accountability
- C. Use Limitation
- **D. Collection Limitation**

Answer: D

NEW QUESTION # 58

FILL BLANK

PPP

Based on the visibility exercise, the consultants created a single privacy policy applicable to all the client relationships and business functions. The policy detailed out what PI company deals with, how it is used, what security measures are deployed for protection, to whom it is shared, etc. Given the need to address all the client relationships and business functions, through a single policy, the privacy policy became very lengthy and complex. The privacy policy was published on company's intranet and also circulated to heads of all the relationships and functions. W.r.t. some client relationships, there was also confusion whether the privacy policy should be notified to the end customers of the clients as the company was directly collecting PI as part of the delivery of BPM services. The heads found it difficult to understand the policy (as they could not directly relate to it) and what actions they need to perform. To assuage their concerns, a training workshop was conducted for 1 day. All the relationship and function heads attended the training. However, the training could not be completed in the given time, as there were numerous questions from the audiences and it took lot of time to clarify.

(Note: Candidates are requested to make and state assumptions wherever appropriate to reach a definitive conclusion) Introduction and Background XYZ is a major India based IT and Business Process Management (BPM) service provider listed at BSE and NSE. It has more than 1.5 lakh employees operating in 100 offices across 30 countries. It serves more than 500 clients across industry verticals - BFSI, Retail, Government, Healthcare, Telecom among others in Americas, Europe, Asia-Pacific, Middle East and Africa. The company provides IT services including application development and maintenance, IT Infrastructure management, consulting, among others. It also offers IT products mainly for its BFSI customers.

The company is witnessing phenomenal growth in the BPM services over last few years including Finance & Accounting including credit card processing, Payroll processing, Customer support, Legal Process Outsourcing, among others and has rolled out platform based services. Most of the company's revenue comes from the US from the BFSI sector. In order to diversify its portfolio, the company is looking to expand its operations in Europe. India, too has attracted company's attention given the phenomenal increase

in domestic IT spend esp. by the government through various large scale IT projects. The company is also very aggressive in the cloud and mobility space, with a strong focus on delivery of cloud services. When it comes to expanding operations in Europe, company is facing difficulties in realizing the full potential of the market because of privacy related concerns of the clients arising from the stringent regulatory requirements based on EU General Data Protection Regulation (EU GDPR).

To get better access to this market, the company decided to invest in privacy, so that it is able to provide increased assurance to potential clients in the EU and this will also benefit its US operations because privacy concerns are also on rise in the US. It will also help company leverage outsourcing opportunities in the Healthcare sector in the US which would involve protection of sensitive medical records of the US citizens.

The company believes that privacy will also be a key differentiator in the cloud business going forward. In short, privacy was taken up as a strategic initiative in the company in early 2011.

Since XYZ had an internal consulting arm, it assigned the responsibility of designing and implementing an enterprise wide privacy program to the consulting arm. The consulting arm had very good expertise in information security consulting but had limited expertise in the privacy domain. The project was to be driven by CIO's office, in close consultation with the Corporate Information Security and Legal functions.

Given the confusion among relationship and function heads, how would you proceed to address the problem and ensure that policy is well understood and deployed? (250 to 500 words)

Answer:

Explanation:

In order to address the confusion among relationship and function heads, it is important to ensure that the privacy policy is effectively communicated and understood by all stakeholders. The following steps can be taken towards this end:

1. Awareness Campaigns - In order to educate the stakeholders about the importance of data privacy, various awareness campaigns should be launched through digital media, print media, and seminars. These campaigns must include topics such as why data privacy is important, the consequences of not adhering to the policy, and how to comply with it.
2. Training - In addition to awareness campaigns, proper training should be provided to all stakeholders on data privacy policies and procedures. The training should also focus on best practices such as secure coding, encryption techniques etc., so that they understand the importance of these security measures in protecting data from unauthorized access.
3. Policies and Procedures - All stakeholders should have access to a clear set of policies and procedures governing their actions related to data privacy. Such guidelines should include information about the types of sensitive information which needs to be kept confidential, what constitutes a violation of the policy, and how to take corrective measures if a violation occurs.
4. Auditing - The effectiveness of all the policies and procedures should be regularly audited in order to ensure that the data privacy policy is being followed properly. Any discrepancies or violations must be reported immediately so that appropriate action can be taken.
5. Reporting Mechanism - A reporting mechanism should also be put into place for stakeholders to report any suspected errors or breaches in data privacy policies. This will help in identifying potential risks early on and taking corrective action as soon as possible. These initiatives will not only reduce confusion among relationship and function heads but will also help build trust with customers by ensuring proper implementation of enterprise-wide privacy program, which in turn will help the company in leveraging outsourcing opportunities. Lastly, by following all these measures, the company will be able to demonstrate its commitment towards privacy and create a secure environment for its customers.

In conclusion, in order to ensure that policy is well understood and deployed, it is important to take appropriate steps such as launching awareness campaigns, providing training to stakeholders on data privacy policies, auditing policies and procedures regularly, and setting up a reporting mechanism for errors or breaches. Doing so will reduce confusion among relationship and function heads and help build trust with customers by ensuring proper implementation of an enterprise-wide privacy program.

NEW QUESTION # 59

Which of the following are key contributors that would enhance the complexity in implementing security measures for protection of personal information? (Choose all that apply.)

- A. Data collection through multiple modes and channels
- B. None of the above
- C. Evolution of nimble and flexible business processes affecting access management
- D. Regulatory requirements to issue privacy notice and data breach notification in specified format

Answer: A,C

Explanation:

The complexity of implementing data security for personal information is often influenced by operational and architectural factors such as:

* A: Collecting data through various channels like web forms, mobile apps, customer support, etc., which introduces complexity in

tracking and securing each channel.

* B: Flexible and dynamic business processes that evolve rapidly can complicate access management due to frequent changes in user roles, workflows, and data access needs.

While regulatory requirements (C) do impact privacy governance, they do not directly contribute to the complexity of implementing technical security measures.

NEW QUESTION # 60

What is a Data Subject? (Choose all that apply.)

- A. An individual who processes the data/information of individuals for providing necessary services
- B. An individual who collects data from illegitimate sources
- C. An individual who provides his/her data/information for availing any service
- D. A company providing PI of its employees for processing
- E. An individual whose data/information is processed

Answer: C,E

Explanation:

According to the DSCI Privacy Framework and aligned international frameworks such as GDPR and APEC, a "Data Subject" refers to:

"An identified or identifiable natural person to whom the personal data relates." This includes individuals whose data is being collected, held, or processed by any entity. Thus:

* A (an individual providing their data to avail a service) is a data subject because the data is about them

* C (an individual whose data/information is processed) directly matches the definition.

Options B, D, and E refer to entities or persons involved in processing or handling the data, not the individuals to whom the data belongs.

NEW QUESTION # 61

.....

PDF4Test DCPLA exam dumps have been developed with a conscious effort to abridge information into fewer questions and answers that any candidate can learn easily. Now you don't need to go through the hassle of studying lengthy manuals for DCPLA Exam Questions preparation. What you actually required is packed into easy to grasp content. Fix your attention on these DCPLA questions and answers and your success is guaranteed.
