

# Pass Guaranteed Quiz 2026 AD0-E725: The Best Adobe Commerce Developer Expert Frequent Updates

P.S. Free 2025 Adobe AD0-E725 dumps are available on Google Drive shared by Itbraindumps: <https://drive.google.com/open?id=1P07ri2swDO-nz-PdgiiLjXa59BkuBTg>

We have 24/7 Service Online Support services. If you have any questions about our AD0-E725 guide torrent, you can email or contact us online. We provide professional staff Remote Assistance to solve any problems you may encounter. You will enjoy the targeted services, the patient attitude, and the sweet voice whenever you use AD0-E725 Exam Torrent. "7\*24\*365 Day Online Intimate Service of AD0-E725 questions torrent is waiting for you. "Insistently pursuing high quality, everything is for our customers" is our consistent quality principle on our AD0-E725 exam questions.

Free update for 365 days are available for AD0-E725 exam dumps, that is to say, if you buy AD0-E725 study guide materials from us, you can get the latest information for free in the following year. Besides, AD0-E725 exam dumps are compiled by experienced experts, and they are quite familiar with the exam center, and therefore the quality and exam dumps can be guaranteed. And we have online and offline chat service stuff for AD0-E725 Exam Materials, they have professional knowledge for the exam dumps, and if you have any questions about AD0-E725 exam materials, just consult us.

## New AD0-E725 Practice Questions, Exam AD0-E725 Braindumps

To help our customer know our AD0-E725 exam questions better, we have carried out many regulations which concern service most. You can ask what you want to know about our AD0-E725 study guide. Once you submit your questions, we will soon give you detailed explanations. Even you come across troubles during practice the AD0-E725 Learning Materials; we will also help you

solve the problems. We are willing to deal with your problems. So just come to contact us.

## Adobe AD0-E725 Exam Syllabus Topics:

| Topic   | Details   |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"><li>Cloud: This section of the exam measures the skills of Cloud Architects and covers the deployment and management of Adobe Commerce on cloud infrastructure. It requires explaining the fundamental cloud architecture, performing setup and configuration tasks, and utilizing the Adobe Commerce Cloud CLI tool to manage the environment effectively.</li></ul>   |
| Topic 2 | <ul style="list-style-type: none"><li>Customizations: This section of the exam measures the skills of Solutions Engineers and involves modifying and extending platform functionality. This includes customizing core areas like the product catalog, checkout process, and admin panel, as well as manipulating data entities, customizing APIs, working with message queues, and writing integration tests to ensure code quality and functionality.</li></ul>  |
| Topic 3 | <ul style="list-style-type: none"><li>External Integrations: This section of the exam measures the skills of Integration Specialists and focuses on connecting Adobe Commerce with external SaaS services. It encompasses the skills needed to customize data flows, utilize Adobe App Builder for extensibility, and implement Adobe I/O events and webhooks to create automated and connected business processes.</li></ul>   |
| Topic 4 | <ul style="list-style-type: none"><li>Section 1: Architecture: This section of the exam measures the skills of Backend Developers and covers the core structural concepts of Adobe Commerce. It involves demonstrating effective cache implementation, understanding key code components like plugins and observers, and managing multi-site configurations on a single instance. The domain also includes explaining the use of Git patches, critical security features, the CRON scheduling system, and how indexing functions within the platform.</li></ul> |

## Adobe Commerce Developer Expert Sample Questions (Q39-Q44):

### NEW QUESTION # 39

A Developer needs to replicate a recent issue that occurred in the staging environment so it can be tested locally. The Developer decides to dump the staging database and import it into the local setup.

Which command should the Developer use to do this?

- A. vendor/bin/ece-tools db-dump
- B. vendor/bin/ece-tools db-snapshot
- C. magento-cloud snapshot:db-dump

**Answer: A**

Explanation:

The correct way to dump a database from an Adobe Commerce Cloud environment is with the vendor/bin/ece-tools db-dump command.

A (db-snapshot) is not a valid ece-tools command.

B is incorrect: magento-cloud snapshot commands are for managing whole environment snapshots, not direct DB dumps.

C is correct: ece-tools db-dump provides the database export for staging/local replication.

Reference:

Adobe Commerce Cloud DevDocs - ece-tools db-dump

### NEW QUESTION # 40

An Adobe Commerce Developer is implementing asynchronous communication with a third-party system using RabbitMQ. The XML files used must be able to configure a local queue and consume messages published by the third-party system.

Which files should the Developer use?

- A. queue\_topology.xml and queue\_publisher.xml
- B. communication.xml, queue\_topology.xml, and queue\_consumer.xml
- C. communication.xml, queue\_topology.xml, and queue\_publisher.xml
- D. queue\_topology.xml and queue\_consumer.xml

## Answer: D

Explanation:

To consume messages from a third-party system in RabbitMQ:

queue\_topology.xml # defines queues and exchanges (topology).

queue\_consumer.xml # defines consumers that listen to the queues.

A/D: communication.xml is used for defining topics for Adobe Commerce modules, not needed when consuming third-party messages directly.

C: queue\_publisher.xml is used for publishing messages, not consuming them.

Reference:

Adobe Commerce DevDocs - Message queues

## NEW QUESTION # 41

A Developer creates daily cron jobs to automate a client's business processes, including automated stock imports via CSV files once per day. After a few days, it is noted that the cron jobs do not run daily. The Developer discovers the cron jobs are sometimes assigned a missed status and do not execute, and other cron jobs become stuck during the execution time of the custom cron jobs. Which option should the Developer use to ensure the cron jobs consistently run each day?

- **A. Implement a custom group for the cron jobs in the crontab.xml.**
- B. Set the cron jobs to run multiple times per day instead of once daily.
- C. In the execute() function, implement a lock checker to make sure the cron runs alone.

## Answer: A

Explanation:

The correct solution is to create a custom cron group.

By default, Magento cron jobs run in shared groups (default, index, etc.). If a heavy/long-running job blocks the queue, other jobs in the same group may become delayed or marked as "missed." By assigning heavy processes (such as stock imports) to a dedicated group, developers ensure that the job is managed separately, avoiding conflicts.

Option B does not solve the root scheduling issue; it just increases runs.

Option C (lock checker) prevents overlaps but does not prevent the missed status caused by shared cron queue congestion.

Reference:

Adobe Commerce DevDocs - Configure cron groups

## NEW QUESTION # 42

While implementing additional functionality, a Developer needs to modify a class with protected and private methods requiring custom logic. The Developer finds that no other Magento customization, such as plugins, will work.

What should the Developer do in this scenario?

- A. Use a patch to implement the necessary customizations.
- B. Use an observer to customize data processed by the class.
- **C. Use a preference and extend the original class.**

## Answer: C

Explanation:

If methods are protected or private, plugins cannot be used because they only work with public methods. In this case, the developer should use a class preference to replace the original class with a custom class that extends it.

A (preference) is correct.

B (observer) cannot be used because observers only react to events, not protected/private methods.

C (patch) is not a customization mechanism; data/patches are used for database schema or data updates.

Adobe Commerce DevDocs - Preferences

Adobe Commerce DevDocs - Plugins limitations

## NEW QUESTION # 43

A client uses APIs on their Adobe Commerce platform and powers external programs with the data fed from the Adobe API

systems. The client reports that it is becoming unmanageable to handle all the API endpoints and would like to have a centralized API system.

Which new feature will help the client with this problem?

- A. Adobe I/O Events for Adobe Commerce
- **B. Adobe Commerce API Mesh**
- C. Adobe Bulk API Handler

**Answer: B**

## NEW QUESTION # 44

People always tend to neglect the great power of accumulation, thus the AD0-E725 study materials can not only benefit one's learning process but also help people develop a good habit of preventing delays. We have full confidence to ensure that you will have an enjoyable study experience with our AD0-E725 Study Materials, which are designed to arouse your interest and help you pass the exam more easily. You will have a better understanding after reading the following advantages.
