Our Plat-Admn-202 study materials take the clients' needs to pass the test smoothly into full consideration. The questions and answers boost high hit rate and the odds that they may appear in the real exam are high. Our Plat-Admn-202 study materials have included all the information which the real exam is about and refer to the test papers in the past years. Our Plat-Admn-202 study materials analysis the popular trend among the industry and the possible answers and questions which may appear in the real exam fully. Our Plat-Admn-202 Study Materials stimulate the real exam's environment and pace to help the learners to get a well preparation for the real exam in advance. Our Plat-Admn-202 study materials won't deviate from the pathway of the real exam and provide wrong and worthless study materials to the clients.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	• App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.
Topic 2	• User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 3	• Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.

Topic 4	• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.
Topic 5	• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.

Will Salesforce Plat-Admn-202 Practice Questions help You to Pass the Salesforce certification exam?

Most IT workers prefer to choose our online test engine for their Plat-Admn-202 exam prep because online version is more flexible and convenient. With the help of our online version, you can not only practice our Plat-Admn-202 Exam PDF in any electronic equipment, but also make you feel the atmosphere of Plat-Admn-202 actual test. The exam simulation will mark your mistakes and help you play well in Plat-Admn-202 practice test.

Salesforce Certified Platform App Builder Sample Questions (Q15-Q20):

NEW QUESTION # 15
An app builder is creating a custom object called Testimonial__c and wants to connect Testimonial__c records with both the submitter's Contact record and Account record. If the Account is deleted, the Testimonial__c should also be deleted. If the Contact is deleted, but the Account remains, the Testimonial__c should remain.
How should this be accomplished?

- A. Make both the Contact and Account fields required on the Testimonial__c object and create lookup relationships from Testimonial__c to Contact and to Account.
- B. Create a master-detail relationship from Testimonial__c to Account and a lookup relationship from Testimonial__c to Contact.
- C. Create a lookup relationship from Testimonial__c to Account and a master-detail relationship from Testimonial__c to Contact.
- D. Make Testimonial__c a junction object between Account and Contact using master-detail relationships.

Answer: B

Explanation:
To connect Testimonial__c records with both the submitter's Contact record and Account record, an app builder should create a master-detail relationship from Testimonial__c to Account and a lookup relationship from Testimonial__c to Contact. A master-detail relationship creates a parent-child relationship between two objects and allows for roll-up summary fields, sharing settings, and cascading actions. A lookup relationship creates a loose association between two objects and allows users to relate records from one object to another. Source

NEW QUESTION # 16
Sales reps want the ability to see who can view their account records and how the people have access.
Which button should the app builder add to the Account page layout to enable this?

- A. Sharing Hierarchy

- B. Fait
- C. New Task
- D. Sharing

Answer: D

Explanation:
The "Sharing" button should be added to the Account page layout to allow sales reps to view the sharing details of an account record. This button enables users to see how access to the record is granted via roles, groups, and manual sharing.
A: Sharing Hierarchy provides a view of the role hierarchy but does not specifically detail record access.
B: New Task is unrelated to sharing visibility.
D: "Fait" is not recognized in Salesforce context as a valid component or feature. Reference: Sharing an Account in Salesforce Help Documentation

NEW QUESTION # 17
An app builder installed a custom Lightning component from AppExchange and has deployed My Domain.
What should be done next in order to configure the component for use in a record page?

- A. Edit a record page using the Page Layout editor > Drag the component onto the page.
- B. Edit a record page using the Page Layout editor > Drag the Visualforce component onto the page.
- C. Edit a record page using App Manager > Drag the component onto the page.
- D. Edit a record page using Lightning App Builder > Drag the component onto the page.

Answer: D

Explanation:
To configure a custom Lightning component for use in a record page, the app builder needs to edit a record page using the Lightning App Builder and drag the component onto the page. The Page Layout editor and the App Manager are not used for this purpose

NEW QUESTION # 18
The appraisal team at DreamHouse Realty wants to leverage Salesforce mobile app.
What are three things an app builder should do to optimize mobile experience?
Choose 3 answers

- A. Create individual customized layouts for different phone operating systems.
- B. Avoid using default field values so that the user is required to fill in all fields on the screen.
- C. Minimize the amount of formula fields and lookup fields to reduce page load time.
- D. Put the most important fields in the compact layout so they are easy to find.
- E. Use Global Actions to make it easy to perform vital functionality on mobile.

Answer: C,D,E

Explanation:
The app builder should do three things to optimize mobile experience:
Use Global Actions to make it easy to perform vital functionality on mobile: Global actions are actions that allow users to create records or perform tasks from anywhere in Salesforce. They are displayed in various places in Salesforce mobile app, such as action bar, action menu, or publisher. By using global actions, the app builder can make it easy for the appraisal team to perform common tasks on mobile, such as creating a new appraisal record or logging a call.
Minimize the amount of formula fields and lookup fields to reduce page load time: Formula fields and lookup fields are types of fields that can affect the performance of Salesforce mobile app. Formula fields are fields that calculate a value based on an expression or formula. Lookup fields are fields that create a relationship between two objects and allow users to select a value from a list of records. Both types of fields can increase the page load time on mobile devices, especially if they are complex or reference many other fields. By minimizing the amount of formula fields and lookup fields, the app builder can optimize the mobile experience for the appraisal team.
Put the most important fields in the compact layout so they are easy to find: Compact layouts are layouts that display a record's key information at a glance. They are used in various places in Salesforce mobile app, such as record highlights, list views, related lists, and lookup dialogs. By putting the most important fields in the compact layout, the app builder can ensure that the appraisal team can easily find the information they need on mobile devices. Option B and D are not things that an app builder should do to optimize mobile experience.

NEW QUESTION # 19

Universal Containers conduct evaluations of their sales reps using a custom object consisting of numerical scores and executive comments. The company wants to ensure that only the sales reps, and their manager's executive can view the rep's evaluation record but the reps should not be able to view the executive comment field on their review. How can these requirement be met?

- A. Use a private sharing model granting record access using hierarchy; manage field access with record types and field-level security
- B. Use a private sharing model granting record access using custom setting; manage field access with record types and page layouts
- C. Use a private sharing model granting record access using hierarchy; manage field access with field-level security
- D. Use a private sharing model granting record access using custom setting; manage field access with page layouts and field level security

Answer: C

Explanation:

To ensure that only the sales reps and their manager's executive can view the rep's evaluation record but the reps should not be able to view the executive comment field on their review, a private sharing model granting record access using hierarchy and field-level security should be used. A private sharing model means that only the owner of a record and users above them in the role hierarchy can view the record by default. Record access can be granted to other users using manual sharing, sharing rules, or Apex sharing. Field-level security controls which fields are visible or editable for different profiles or permission sets.

NEW QUESTION # 20

......

We have considered that your time may be very tight, and you can only use some fragmented time to learn. Therefore, it is really important to be able to read our Plat-Admn-202 study materials anytime, anywhere. So we have developed our Plat-Admn-202 exam questions to three different versions: the PDF, Software and APP online. They have covered all conditions that you will be in to study on our Plat-Admn-202 learning guide. For example, the time you want to study on phone, computer, laptop, paper and so on.
