正確的なEX-Con-101対応内容試験-試験の準備方法-一番優秀なEX-Con-101練習問題

EX-Con-101試験の参考資料のユーザーは、専門家、学生、高度な文化の学生など、幅広い分野をカバーしています。これは、EX-Con-101学習教材の言語形式が理解しやすいためです。どんな情報を勉強しても、初心者であることやデータを読んでいないことを心配する必要はありません。そして、EX-Con-101テストの質問は多くの専門家によって準備されています。EX-Con-101学習ガイドの内容は、すべてのレベルの候補者にとって非常に簡単に理解できます。

Salesforce Certified Experience Cloud Consultant 認定 EX-Con-101 試験問題 (Q84-Q89):

質問 #84

Universal Containers (UC) would like to create a site for its existing customers. The site will contain articles, manuals, and FAQs. The site will also contain access to UC's Contracts object specific to each customer and the ability for customers to update their billing information, requiring them to log in to the site to access any information. Which template should UC select when building its site?

- A. Customer Service
- B. Help Center
- **C. Customer Account Portal**
- D. Partner Central

正解: C

解説:

The Customer Account Portal template is designed for creating a site for existing customers who need to access their account information, such as contracts, billing, and support. The template includes features such as login, registration, profile management, case management, and commerce integration. The template also supports Knowledge articles, manuals, and FAQs.

質問 #85

A consultant needs to leverage ExperienceBundle for a deployment but is unable to view it. What is the most likely cause for this issue?

- A. A change set containing the Network needs to be deployed.
- B. The experience has not yet been published.
- C. A custom Experience template needs to be created.
- **D. The "Enable ExperienceBundle Metadata API" setting needs to be checked.**

正解: D

解説:

The ExperienceBundle Metadata API allows you to retrieve, deploy, create, update, or delete an Experience Cloud site's metadata definition in a single API call. To use this API, you need to enable the "Enable ExperienceBundle Metadata API" setting in the Experience Cloud site's administration settings.

質問 #86

Universal Containers (UC) is planning to create a portal for its global partner network. Users will be assigned a Partner Community license and a role.

Which two things should UC keep in mind when setting up partner roles?

Choose 2 answers

- **A. Once created, roles cannot be deleted.**
- B. Role Hierarchy can only be used if all objects have external OWD set to Private.
- **C. The default limit for the number of roles for portals is 50,000 per org.**

- D. Unused roles can be deleted.

正解: A、C

解説:

When setting up partner roles, you need to keep in mind some considerations, such as:

- * The default limit for the number of roles for portals is 50,000 per org. You can request an increase from Salesforce if you need more roles.
- * Once created, roles cannot be deleted. You can only deactivate them or rename them.

質問 # 87

What are three best practices when configuring self-registration for an Experience Cloud site? Choose 3 answers

- A. Use the same profile for your self-service site and your partner portal.
- B. Assign a cloned standard site profile as the default for self-registration.
- C. Use a restrictive default profile to begin with.
- D. Assign the standard site profile as the default for self-registration.
- E. Create a separate profile for your self-service site and your partner portal.

正解: B、C、E

解説:

Three best practices when configuring self-registration for an Experience Cloud site are A, B, and C. Self-registration is a feature that allows users to create their own accounts on your Experience Cloud site without an invitation. To configure self-registration, you need to assign a default profile for self-registered users, which determines their access level and permissions on your site. A best practice is to assign a cloned standard site profile as the default, which gives you more control over the settings and customization of the profile. Another best practice is to use a restrictive default profile to begin with, which limits the access and visibility of self-registered users until they are verified or approved by an administrator. A third best practice is to create a separate profile for your self-service site and your partner portal, which allows you to differentiate the access and functionality of different types of users on your sites.

質問 # 88

What are three goals Ursa Major Solar can accomplish with Experience Cloud moderation functionality? Choose 3 answers

- A. Track Flagging and moderation activity within the Experience site.
- B. Allow members to remove other member from the Experience site if desired.
- C. Allow members to flag posts comments files, and messages that are inappropriate or spam.
- D. Give members Audience Targeting permissions within the Experience site.
- E. Designate specific users as moderators so that they can closely monitor the site.

正解: A、C、E

解説:

UMS can accomplish three goals with Experience Cloud moderation functionality:

- * Track Flagging and moderation activity within the Experience site. Moderation functionality allows UMS to view reports and dashboards that show the flagging and moderation activity on its site, such as the number of flagged items, the number of moderated items, and the flagging reasons.
- * Allow members to flag posts comments files, and messages that are inappropriate or spam. Moderation functionality allows UMS to enable members to flag content that violates the site's guidelines or policies. Members can choose a flagging reason from a predefined list or enter their own reason.
- * Designate specific users as moderators so that they can closely monitor the site. Moderation functionality allows UMS to assign specific users as moderators who have permission to manage content on its site. Moderators can review flagged items, delete or edit inappropriate content, ban or warn abusive users, or escalate issues to administrators.
