We believe that the best brands are those that go beyond expectations. They don't just do the job – they go deeper and become the fabric of our lives. Therefore, as the famous brand, even though we have been very successful we have never satisfied with the status quo, and always be willing to constantly update the contents of our UiPath-ADAv1 Exam Torrent. Decades of painstaking efforts

have put us in the leading position of UiPath-ADAv1 training materials compiling market, and the excellent quality of our UiPath-ADAv1 guide torrent and high class operation system in our company have won the common recognition from many international customers for us.

## **UiPath Automation Developer Associate v1 Exam Sample Questions (Q332-Q337):**

### **NEW QUESTION # 332**

What is true about the behavior of the Read Range Workbook activity?

- A. It works only with .xlsm files, and Excel must be installed on the system
- B. It works only with .xls files, and Excel does not need to be installed on the system
- **C. It works with .xls and .xlsx files, and Excel does not need to be installed on the system**
- D. It works with .xlm and .xlsx files, and Excel must be installed on the system

**Answer: C**

Explanation:

The Read Range Workbook activity is part of the UiPath.Excel.Activities package and allows reading Excel data without requiring Excel to be installed.

Why Option C is Correct?

- \* Supports both .xls (Excel 97-2003) and .xlsx (Excel 2007+) formats.
- \* Works without installing Microsoft Excel, using UiPath's built-in Workbook activities.
- \* Faster execution because it does not rely on the Excel application.

Why Other Options Are Incorrect?

- \* A (Only .xls and Excel not needed) #
- \* .xlsx files are also supported in Workbook activities.
- \* B (Only .xlsm and requires Excel) #
- \* .xlsm (macro-enabled) files can be read, but Excel is NOT required for reading non-macro content.
- \* D (xlm instead of xlsm) #
- \* .xlm is not a valid Excel format.

### **NEW QUESTION # 333**

Which of the following is a valid panel from the UiPath Studio interface, from where a variable can be created?

- A. Locals Panel
- B. Activities Panel
- **C. Data Manager Area**
- D. Project Panel

**Answer: C**

Explanation:

In UiPath Studio, variables are primarily created and managed in the Data Manager Area.

Why is B Correct?

# The Data Manager Area:

- \* Provides a structured view of variables.
- \* Allows creating, renaming, and managing variables easily.
- \* Is the recommended location for handling project variables.

### **NEW QUESTION # 334**

A project built using REFramework pulls phone numbers from a database of employees and creates queue items for each one. Following processing, these elements must be added to a financing application. The queue item holding a phone number becomes

invalid if a digit is accidentally left out because of a human mistake. As a requirement, queue items that contain partial numbers should not be accepted.

What type of error should be thrown according to best practices?

- A. Fatal Exception
- B. System Exception
- **C. Business Exception**
- D. Application Exception

**Answer: C**

#### NEW QUESTION # 335

A developer is building an automation which types text into a text file. The Activity Project Settings for UI Automation Modern activities are set as follows:

The developer has configured the properties of a **Type Into** activity as follows:

What is the behavior of the Type Into activity when executing the workflow?

- A. The activity will remove a Single Line in Run mode and Multi Line in Debug mode.
- B. The activity will use only properties set in Activity Project Settings.
- C. The activity will remove Multi Line in Run mode and a Single Line in Debug mode.
- D. The activity will remove a Single Line in Run mode and in Debug mode.

**Answer: A**

Explanation:

The Type Into activity is used to type text into a UI element. The activity has different properties that can be configured to control the input method, the delay between keystrokes, the cursor position, and the text formatting. The Activity Project Settings for UI Automation Modern activities allow you to set the default values for these properties at the project level. However, you can also override these values at the activity level by using the Properties panel. In this case, the Activity Project Settings are set to remove a Single Line in Run mode and Multi Line in Debug mode. This means that when the workflow is executed, the Type Into activity will delete any existing text in the UI element before typing the new text. If the workflow is run in Run mode, only one line of text will be deleted. If the workflow is run in Debug mode, all lines of text will be deleted. ## NEW QUESTION # 336

What are the components that define a state within a State Machine in UiPath Studio?

- A. Entry, Exit, and Transition Actions with Trigger Conditions.
- B. Activities, Connectors, and Annotations.
- C. Sequence, Flowchart, and Transactional Business Process.
- D. Input Arguments, Output Arguments, and Variables.

**Answer: A**

Explanation:

Explanation

A state in a State Machine is a set of actions that execute while the workflow is in a certain condition<sup>1</sup>. Each state has three components: Entry, Exit, and Transition Actions<sup>2</sup>. Entry Actions are executed when the state is entered, Exit Actions are executed when the state is exited, and Transition Actions are executed when a transition is triggered by a condition<sup>3</sup>.
