Chapter 01: Nursing Practice in Canada and Drug Therapy
Sealock: Lille's Pharmacology for Canadian Health Care Practice, 5th Edition

MULTIPLE CHOICE

- Which is a judgement about a particular patient's potential need or problem?
 - A goal
 - An assessment
 - Subjective data
 - A nursing diagnosis

ANS: D

Nursing diagnosis is the phase of the nursing process during which a clinical judgement is made about how a patient responds to health conditions and life processes or vulnerability for that response.

DIF: Cognitive Level: Knowledge

- The patient is to receive oral furosemide (Lasix) every day; however, because the patient is unable to swallow, he can not take medication orally, as ordered. The nurse needs to contact the physician. What type of problem is this?
 - A "right time" problem
 - A "right dose" problem
 - A "right route" problem
 - A "right medication" problem

ANS: C

This is a "right route" problem: the nurse cannot assume the route and must clarify the route with the prescriber. This is not a "right time" problem because the ordered frequency has not changed. This is not a "right dose" problem because the dose is not related to an inability to swallow. This is not a "right medication" problem because the medication ordered will not change, just the route.

DIF: Cognitive Level: Application

- The nurse has been monitoring the patient's progress on his new drug regimen since the first dose and has been documenting signs of possible adverse effects. What nursing process phase is the nurse practising?
 - Planning
 - Evaluation
 - Implementation
 - Nursing diagnosis

ANS: B

Monitoring the patient's progress is part of the evaluation phase. Planning, implementation, and nursing diagnosis are not illustrated by this example.

DIF: Cognitive Level: Application

- The nurse is caring for a patient who has been newly diagnosed with type 1 diabetes mellitus. Which statement *best* illustrates an outcome criterion for this patient?
 - The patient will follow instructions.
 - The patient will not experience complications.
 - The patient adheres to the new insulin treatment regimen.
 - The patient demonstrates safe insulin self-administration technique.

ANS: D

Having the patient demonstrate safe insulin self-administration technique is a specific and measurable outcome criterion. Following instructions and avoiding complications are not specific criteria. Adherence to the new insulin treatment regimen is not objective and would be difficult to measure.

DIF: Cognitive Level: Application

- Which activity *best* reflects the implementation phase of the nursing process for the patient who is newly diagnosed with type 1 diabetes mellitus?
 - Providing education regarding self-injection technique
 - Setting goals and outcome criteria with the patient's input
 - Recording a history of over-the-counter medications used at home
 - Formulating nursing diagnoses regarding knowledge deficits related to the new treatment regimen

ANS: A

Education is an intervention that occurs during the implementation phase. Setting goals and outcome criteria reflects the planning phase. Recording a drug history reflects the assessment phase. Formulating nursing diagnoses regarding a knowledge deficit reflects analysis of data as part of the planning phase.

DIF: Cognitive Level: Analysis

P.S. Free 2025 CompTIA FC0-U71 dumps are available on Google Drive shared by DumpExam: <https://drive.google.com/open?id=1HblKpg-dJHTFIORStgRbkxf3dlKC6r2I>

The loss of personal information in the information society is indeed very serious, but FC0-U71 guide materials can assure you that we will absolutely protect the privacy of every user. Our FC0-U71 study braindumps users are all over the world, is a very international product, our FC0-U71 Exam Questions are also very good in privacy protection. And we offer good services on our FC0-U71 learning guide to make sure that every detail is perfect.

CompTIA FC0-U71 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Infrastructure: This section of the exam measures skills of Network Support Trainees and covers essential knowledge of device setup, networking concepts, and physical and wireless connectivity. It includes an understanding of IP addressing, cables, ports, and basic infrastructure components like routers and switches necessary for setting up secure, functional networks.

Topic 2	<ul style="list-style-type: none"> Applications and Software: This section of the exam measures the skills of Entry-Level Technical Analysts and covers commonly used software applications and their purposes. It involves understanding operating systems, mobile and desktop software, and the basics of software installation and configuration. This domain also touches on licensing and application support tools.
Topic 3	<ul style="list-style-type: none"> Data and Database Fundamentals: This section of the exam measures the skills of Entry-Level Data Assistants and covers data management principles, types of data, and basic database structures. It includes an understanding of database types, simple queries, data integrity, and the importance of data in decision-making and business operations.
Topic 4	<ul style="list-style-type: none"> Security: This section of the exam measures skills of Cybersecurity Support Interns and covers essential cybersecurity principles, including confidentiality, data protection, user authentication, and malware threats. It also includes awareness of social engineering, encryption, and common best practices for device and network security.
Topic 5	<ul style="list-style-type: none"> Software Development Concepts: This section of the exam measures the skills of Junior Software Developers and introduces foundational knowledge of programming logic, data structures, and the software development life cycle. It includes awareness of coding concepts, algorithm basics, and scripting used in automated and task-based environments.

Exam CompTIA FC0-U71 Tips & FC0-U71 Boot Camp

As old saying goes, god will help those who help themselves. So you must keep inspiring yourself no matter what happens. At present, our FC0-U71 exam materials are able to motivate you a lot. Our products will help you overcome your laziness. And you will become what you want to be with the help of our FC0-U71 learning questions. You can realize and reach your dream. Also, you will have a pleasant learning of our FC0-U71 study quiz.

CompTIA Tech+ Certification Exam Sample Questions (Q86-Q91):

NEW QUESTION # 86

Which of the following is an advantage of using a database instead of a flat file?

- A. Portability
- B. Cloud support
- **C. Multiple concurrent users**
- D. Speed to implement

Answer: C

NEW QUESTION # 87

A user is unable to load the most recent version of a web page. The old page loads each time the screen is refreshed. Which of the following would the user most likely do to resolve the issue?

- **A. Clear the cache.**
- B. Synchronize the profile.
- C. Enable the pop-up blocker.
- D. Disable browser extensions.

Answer: A

Explanation:

Browsers store previously loaded pages in their cache to improve performance. If outdated content is cached, clearing the cache forces the browser to load the latest version from the server.

"Clearing the browser cache removes stored versions of web pages and resolves display issues caused by outdated content." -

NEW QUESTION # 88

A systems administrator resolves a persistent issue with a laptop. Which of the following steps should the administrator take next?

- A. Implement the action plan
- B. Document the findings.
- C. Test the theory.
- D. Create an action plan.

Answer: B

Explanation:

After resolving an issue, the next important step is to document the findings and solution to provide a record for future reference and help others with similar issues.

Testing the theory, creating, and implementing action plans happen earlier in the troubleshooting process.

NEW QUESTION # 89

A database has the following schema:

ID	Name	Age
2	John	36
6	Jane	39
12	Allison	42
21	Anna	29

Which of the following is the number of records in the schema?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

Each row in the table (excluding the header row) represents a record in the database schema. The table has 4 data rows (John, Jane, Allison, Anna), so the number of records is 4.

NEW QUESTION # 90

A user is writing code to calculate the amount of pay for each worker at a company. The pay rate is the same for all workers. The code will use the formula:

`amount_of_pay = number_of_hours × pay_rate`

Which of the following should be used in the code to represent `pay_rate`?

- A. Object
- B. Array
- C. Constant
- D. Function

Answer: C

Explanation:

Because the pay rate is fixed and does not change for all workers, it is best represented as a constant in code. Constants are variables whose values do not change during execution.

"Constants are used in programming to represent fixed values that do not change during the run of a program" - CompTIA ITF+ Software Development Guide

Correct answer: C

NEW QUESTION # 91

With the pass rate reaching 98.65%, FC0-U71 exam materials have gained popularity among candidates. We have received feedbacks from customers, and we examine and review FC0-U71 exam bootcamp on a continuous basis, so that exam dumps you receive are the latest version. In order to build up your confidence for FC0-U71 training materials, we are pass guarantee and money back guarantee, if you fail to pass the exam we will give you full refund. You can receive download link for FC0-U71 Exam Materials within ten minutes, and if you don't, you can contact with us, we will have professional staff to solve this problem for you.
