## MB-500 PDF Guide, Exam MB-500 Cram

With our MB-500 learning questions, you can enjoy a lot of advantages over the other exam providers'. The most attraction aspect is that our high pass rate as 98% to 100%. I believe every candidate wants to buy MB-500 exam materials that with a high pass rate, because the data show at least two parts of the MB-500 Exam Guide, the quality and the validity. Only with high quality and valid information, our candidates can successfully pass their MB-500 exams.

**Moreover, on the official vendor's website, any candidate can find a complete**

## exam outline, which includes the following areas:

- Implementing reporting;
- Designing and developing AOT elements;
- Integrating and managing data solutions;
- Developing and testing code;
- Planning of architecture and solution design;
- Executing security and optimizing performance.

## Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q94-Q99):

### NEW QUESTION # 94

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an enumeration named `truckStatus` that has the following statuses:

- \* Empty
- \* Loaded
- \* Completed

You have the following code:

```
switch (truckTable.TruckStatus)
{
    case TruckStatus::Empty:
        Info("1");
        break;
    case TruckStatus::Loaded:
        Info("2");
        break;
    case TruckStatus::Completed:
        Info("3");
        break;
}
```

You need to extend this enumeration and add the following statuses to the enumeration: `Quarantine`, `InTransit`.

You must then modify code that validates the switch statement.

Solution: Add a post handler to the method that checks the enumeration and logic for your new enumeration values using the enumeration value.

```
if ( truckTable.TruckStatus == TruckStatus::Quarantine || truckTable.TruckStatus == TruckStatus::InTransit)
{
    Info("Extended");
}
```

Does the solution meet the goal?

- A. No
- B. Yes.

**Answer: B**

### NEW QUESTION # 95

You need to set up a recurring integration to enable file exchanges between Dynamics 365 Finance and a third-party system.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

- Set up the processing recurrence.
- Link a new application ID to the data recurring data job.
- Specify whether you are using a file or data package.
- Set up a data project.
- Create a recurring data job.

**Answer Area**

**Answer:**

Explanation:

Actions	Answer Area
Set up the processing recurrence.	Set up a data project.
Link a new application ID to the data recurring data job.	Create a recurring data job.
Specify whether you are using a file or data package.	Link a new application ID to the data recurring data job.
Set up a data project.	Specify whether you are using a file or data package.
Create a recurring data job.	Set up the processing recurrence.

Explanation

1. Set up a data project -
2. Create recurring data job -
3. Link a new application ID to the data recurring job -
4. Specify whether you are using a file or a data package -
5. Set up the processing recurrence

**NEW QUESTION # 96**

You are a Dynamics 365 Finance developer.

A long-running process times out in the system.

You need to implement the asynchronous framework to resolve this issue.

Which class runAsync method should you use for each use case? To answer, drag the appropriate classes to the correct use cases.

Each class may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Classes**

- FormRun
- Global

**Answer Area**

**Use case**

The process is run outside the client.

Display a message when the process is completed without a page refresh.

The page must be refreshed for the message to be displayed.

**Class**

**Answer:**
