Exam Associate-Cloud-Engineer Practice, New Associate-Cloud-Engineer Test Dumps

So we can say that with the Google Associate-Cloud-Engineer exam questions you will get everything that you need to learn, prepare and pass the difficult Google Associate-Cloud-Engineer exam with good scores. The PassSureExam Associate-Cloud-Engineer exam questions are designed and verified by experienced and qualified Google Associate-Cloud-Engineer Exam trainers. They work together and share their expertise to maintain the top standard of Associate-Cloud-Engineer exam practice test. So you can get trust on Associate-Cloud-Engineer exam questions and start preparing today.

Google Associate-Cloud-Engineer exam is an entry-level exam that assesses the candidates' abilities to use GCP services to build secure and scalable cloud solutions. Associate-Cloud-Engineer exam covers a wide range of topics such as cloud architecture, compute and storage, networking, security, and operations. Associate-Cloud-Engineer Exam also focuses on real-world scenarios that test the candidates' problem-solving skills.

Google Associate Cloud Engineer Exam Sample Questions (Q216-Q221):

NEW QUESTION # 216

You built an application on Google Cloud Platform that uses Cloud Spanner. Your support team needs to monitor the environment

but should not have access to table data. You need a streamlined solution to grant the correct permissions to your support team, and you want to follow Google-recommended practices. What should you do?

- A. Add the support team group to the roles/stackdriver.accounts.viewer role.
- **B. Add the support team group to the roles/monitoring.viewer role**
- C. Add the support team group to the roles/spanner.databaseUser role.
- D. Add the support team group to the roles/spanner.databaseReader role.

Answer: B

Explanation:

roles/monitoring.viewer provides read-only access to get and list information about all monitoring data and configurations. This role provides monitoring access and fits our requirements. roles/monitoring.viewer. is the right answer.

Ref: <https://cloud.google.com/iam/docs/understanding-roles#cloud-spanner-roles>

NEW QUESTION # 217

An employee was terminated, but their access to Google Cloud Platform (GCP) was not removed until 2 weeks later. You need to find out this employee accessed any sensitive customer information after their termination. What should you do?

- A. View System Event Logs in Stackdriver. Search for the user's email as the principal.
- **B. View System Event Logs in Stackdriver. Search for the service account associated with the user.**
- C. View the Admin Activity log in Stackdriver. Search for the service account associated with the user.
- D. View Data Access audit logs in Stackdriver. Search for the user's email as the principal.

Answer: B

NEW QUESTION # 218

You are using Container Registry to centrally store your company's container images in a separate project. In another project, you want to create a Google Kubernetes Engine (GKE) cluster. You want to ensure that Kubernetes can download images from Container Registry. What should you do?

- A. Configure the ACLs on each image in Cloud Storage to give read-only access to the default Compute Engine service account.
- B. When you create the GKE cluster, choose the Allow full access to all Cloud APIs option under 'Access scopes'.
- **C. In the project where the images are stored, grant the Storage Object Viewer IAM role to the service account used by the Kubernetes nodes.**
- D. Create a service account, and give it access to Cloud Storage. Create a P12 key for this service account and use it as an imagePullSecrets in Kubernetes.

Answer: C

Explanation:

Explanation

Configure the ACLs on each image in Cloud Storage to give read-only access to the default Compute Engine service account. is not right. As mentioned above, Container Registry ignores permissions set on individual objects within the storage bucket so this isn't going to work.

Ref: <https://cloud.google.com/container-registry/docs/access-control>

NEW QUESTION # 219

An employee was terminated, but their access to Google Cloud Platform (GCP) was not removed until 2 weeks later. You need to find out this employee accessed any sensitive customer information after their termination. What should you do?

- A. View System Event Logs in Stackdriver. Search for the user's email as the principal.
- **B. View Data Access audit logs in Stackdriver. Search for the user's email as the principal.**
- C. View the Admin Activity log in Stackdriver. Search for the service account associated with the user.
- D. View System Event Logs in Stackdriver. Search for the service account associated with the user.

Answer: B

NEW QUESTION # 220

You have created a subnet named subnetace1 with 16,382 addresses using 192.168.0.0. Later you realize that you won't require too many addresses, and so you want to reduce addresses to 254. Which of the following command would you use?

- A. gcloud compute networks subnets expand-ip-range subnetace1 --prefix-length=12
- **B. There is no command in google cloud to reduce the number of available addresses in a subnet.**
- C. gcloud compute networks subnets expand-ip-range subnetace1 --prefix-length=28
- D. gcloud compute networks subnets expand-ip-range subnetace1 --size=248

Answer: B

NEW QUESTION # 221
