FlashArray-Implementation-Specialist日本語 & FlashArray-Implementation-Specialistテスト資料

きみはPure StorageのFlashArray-Implementation-Specialist認定テストに合格するためにたくさんのルートを選択肢があります。Topexamは君のために良い訓練ツールを提供し、君のPure Storage認証試に高品質の参考資料を提供いたします。あなたの全部な需要を満たすためにいつも頑張ります。

Pure Storage FlashArray-Implementation-Specialist 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• Installation: This section of the exam measures the skills of Enterprise Infrastructure Technicians and focuses on executing a successful installation of FlashArray systems. It tests the ability to perform physical setup, cabling, configuration of network settings, and the application of initial system configurations necessary for full deployment.
トピック 2	• Pre-Installation • Upgrade: This section of the exam measures the skills of Enterprise Infrastructure Technicians and covers all preparation activities before deploying or upgrading a Pure Storage FlashArray. It includes understanding environmental requirements, verifying prerequisites, checking compatibility, and validating system readiness through appropriate tools and documentation.
トピック 3	• Upgrades: This section of the exam measures the skills of FlashArray Implementation Specialists and focuses on tasks involved in managing firmware and software upgrades. Candidates must demonstrate knowledge of upgrade planning, verification steps, and rollback procedures, ensuring that systems are updated with minimal disruption to service.
トピック 4	• Post-Installation • Upgrade: This section of the exam measures the skills of FlashArray Implementation Specialists and evaluates how professionals confirm system functionality after installation or an upgrade. It involves validating connectivity, running health checks, confirming configurations, and ensuring that the deployment meets operational expectations.

Pure Storage Certified FlashArray Implementation Specialist 認定 FlashArray-Implementation-Specialist 試験問題 (Q51-Q56):

質問 # 51

Before installing array rails, where should the cage nuts be placed?

- A. Top square of the lowest RU
- B. Lowest square of top RU
- C. Lowest square of lowest RU

正解: C

解説:

Cage nuts should be placed in the lowest square hole of the lowest rack unit (RU) where the array rails will be installed to ensure proper alignment and support.

質問 # 52

A customer has ordered several FlashArrays and wants to have ActiveCluster configured. What is the maximum quantity of arrays supported with ActiveCluster?

- A. 0
- B. 1
- C. 2

正解: A

解説:

FlashArray ActiveCluster is designed for synchronous replication between two FlashArray systems, enabling active-active configurations across two sites. This setup allows both arrays to serve I/O simultaneously, providing high availability and zero RPO (Recovery Point Objective). Each array in the ActiveCluster configuration maintains identical volume identities, ensuring seamless access for hosts regardless of the array they connect to. The configuration supports metro-area clustering, with a maximum round-trip latency of 11 milliseconds between arrays. Additionally, the Pure1 Cloud Mediator or an on-premises mediator is utilized to manage failover and prevent split-brain scenarios, eliminating the need for a third site or external gateway.

While ActiveCluster supports a two-site configuration, it does not support additional arrays within the same synchronous setup. For

scenarios requiring protection across more than two sites, asynchronous replication solutions like ActiveDR™ can be employed. ActiveDR allows for asynchronous replication to a third site, providing broader disaster recovery capabilities. Therefore, the maximum number of arrays supported in a single ActiveCluster configuration is two.

質問 # 53

At the completion of an upgrade, which command is used to send phonehome logs?

- A. purearray phonehome --send-today
- B. purearray phonehome --send-logs
- C. purelogs --send-all

正解: B

解説:

The command purearray phonehome --send-logs is used to send all Phonehome logs to support upon completion of an upgrade.

質問 # 54

Which action should an Implementation Engineer take to confirm that all volumes connected to a host are automatically in a protection group?

- A. Add a new volume each time it is attached to the host.
- B. Add the volumes as members of a protection group.
- C. Add a host as a member of a protection group.

正解: C

解説:

Adding the host itself to a protection group automatically includes all volumes connected to that host, ensuring comprehensive data protection without manual volume-by-volume assignment.

質問 # 55

An Implementation Engineer is assigned to install a 4X Module 9.1 TB Conversation Kit in a Flash Array Chassis. Why are there only four Direct Flash Modules?

- A. To widen an existing write group.
- B. To fill out enclosure bays.
- C. To replace a missing shipment

正解: A

解説:

Installing four DirectFlash Modules in a 9.1 TB Conversion Kit is intended to widen an existing write group, improving performance and capacity distribution within the FlashArray.

質問 # 56
