C_S4TM_2023 latest valid questions & C_S4TM_2023 vce pdf dumps & C_S4TM_2023 study prep material

We abandon all obsolete questions in this latest C_S4TM_2023 exam torrent and compile only what matters toward actual real exam. Without voluminous content to remember, our C_S4TM_2023 quiz torrent contains what you need to know and what the

exam will test. So the content of our C_S4TM_2023 quiz torrent is imbued with useful exam questions easily appear in the real condition. We are still moderately developing our latest C_S4TM_2023 Exam Torrent all the time to help you cope with difficulties. All exam candidates make overt progress after using our C_S4TM_2023 quiz torrent. By devoting ourselves to providing high-quality practice materials to our customers all these years, we can guarantee all content are the essential part to practice and remember. Stop dithering and make up your mind at once, C_S4TM_2023 test prep will not let you down.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q34-Q39):

NEW QUESTION # 34

Which of the following can be used as origin of condition? Note: There are 2 correct answers to this question.

- A. BRFplus decision table
- B. Direct business object access
- C. Determination class
- D. Data crawler

Answer: A,B

Explanation:

Transportation Management Overview and Fundamentals

NEW QUESTION # 35

You want to perform carrier selection for a freight order created in SAP S/4HANA Supply Chain for transportation management. Which of the following can you use as decision criteria? Note: There are 2 correct answers to this question.

- A. Priority from transportation lane
- B. Priority from carrier selection settings
- C. Costs from charge management
- D. Costs from shipment cost document

Answer: A,B

NEW QUESTION # 36

Which of the following can you use to determine a stage sequence in a forwarding order? Note: There are 2 correct answers to this question.

- A. Movement type
- B. Stage profile
- C. Stage type
- D. Shipping type

Answer: A,B

Explanation:

In SAP S/4HANA Transportation Management for LSPs, the stage sequence in a forwarding order defines the transportation legs (e.g., pre-carriage, main carriage). According to the SAP documentation, the stage sequence can be determined using:

* Stage profile (A): A stage profile defines the sequence of stages for a forwarding order based on predefined rules, ensuring consistency across similar orders.

* Movement type (C): Movement types specify the type of transport (e.g., road, rail) for each stage and are used to determine the stage sequence in forwarding orders.

The other options are incorrect:

* Stage type (B) defines attributes of individual stages but does not determine the sequence.

* Shipping type (D) categorizes the overall transport mode but does not control stage sequencing.

NEW QUESTION # 37

How can you create a schedule departure? Note: There are 2 correct answers to this question.

- A. Copy from a freight booking
- B. Upload via report
- C. Generate from a rule
- D. Maintain in default route

Answer: B,C

Explanation:

In SAP S/4HANA Transportation Management, schedule departures define planned departure times for transportation, such as for regular routes. According to the SAP documentation, schedule departures can be created by:

* Upload via report (A): Users can upload schedule departures using a report or data import tool, allowing mass creation or updates.

* Generate from a rule (B): Schedule departures can be generated automatically based on predefined rules, such as recurring schedules for specific routes.

The other options are incorrect:

* Copy from a freight booking (C) is not a standard method for creating schedule departures, as freight bookings are execution documents for ocean or air transport.

* Maintain in default route (D) relates to route configuration but does not directly involve creating schedule departures.

NEW QUESTION # 38

To which of the following can you assign instruction sets? Note: There are 2 correct answers to this question.

- A. Stage type
- B. Forwarding order type
- C. Freight order type
- D. Movement type

Answer: A,B

Explanation:

In SAP S/4HANA Transportation Management for Logistics Service Providers (LSPs), instruction sets provide standardized instructions for transportation processes. According to the SAP documentation, instruction sets can be assigned to:

* Stage type (A): Instruction sets are linked to stage types to define specific instructions for each stage of a forwarding order, such as loading or customs handling.

* Forwarding order type (C): Instruction sets are assigned to forwarding order types to provide default instructions for the entire order, ensuring consistency in LSP scenarios.

The other options are incorrect:

* Movement type (B) is used for defining stage sequences or transportation modes but does not support instruction set assignments.

* Freight order type (D) is used for execution documents and typically does not include instruction sets, which are more relevant to forwarding orders in LSP scenarios.
