- Then, the candidates need to fill in the details like name, email, and phone number.
- The candidates will be given a registration number after payment. The product key is used to activate the product.

ISACA Certified Data Privacy Solutions Engineer Sample Questions (Q175-Q180):

NEW QUESTION # 175

An organization has a policy requiring the encryption of personal data if transmitted through email. Which of the following is the BEST control to ensure the effectiveness of this policy?

- A. Conduct regular control self-assessments (CSAs).
- B. Enforce annual attestation to policy compliance.
- **C. Implement a data loss prevention (DLP) tool.**
- D. Provide periodic user awareness training on data encryption.

Answer: C

Explanation:

Explanation

A data loss prevention (DLP) tool is a software solution that monitors, detects and prevents the unauthorized transmission or leakage of sensitive data, such as personal data, from an organization's network or devices. A DLP tool can help to ensure the effectiveness of a policy requiring the encryption of personal data if transmitted through email, by applying the following controls:

Scanning the content and attachments of outgoing emails for personal data, such as names, email addresses, biometric data, IP addresses, etc.

Blocking or quarantining emails that contain unencrypted personal data, and alerting the sender and/or the administrator of the policy violation.

Encrypting personal data automatically before sending them through email, using encryption standards and algorithms that are compliant with data protection laws and regulations, such as the General Data Protection Regulation (GDPR) or the California Consumer Privacy Act (CCPA).

Generating audit logs and reports of email activities and incidents involving personal data, and providing visibility and accountability for policy compliance.

The other options are less effective or irrelevant to ensure the effectiveness of the policy. Providing periodic user awareness training on data encryption is a good practice, but it does not guarantee that users will follow the policy or know how to encrypt personal data properly. Conducting regular control self-assessments (CSAs) is a useful method to evaluate the design and operation of the policy, but it does not prevent or detect policy violations in real time. Enforcing annual attestation to policy compliance is a formal way to demonstrate user commitment to the policy, but it does not verify or measure the actual level of compliance.

Guide to Securing Personal Data in Electronic Medium, section 3.2: "Organisations should consider implementing DLP solutions to prevent unauthorised disclosure of personal data via email." Encryption in the Hands of End Users - ISACA, section 2: "A key goal of encryption is to protect the file even when direct access is possible or the transfer is intercepted."

NEW QUESTION # 176

Which of the following is the BEST approach to minimize privacy risk when collecting personal data?

- A. Use a third party to collect, store, and process the data.
- **B. Collect only the data necessary to meet objectives.**
- C. Aggregate the data immediately upon collection.
- D. Collect data through a secure organizational web server.

Answer: B

Explanation:

Collecting only the data necessary to meet objectives is the best approach to minimize privacy risk when collecting personal data.

This is based on the principle of data minimization, which states that personal data should be adequate, relevant, and limited to what is necessary in relation to the purposes for which they are processed. Using a third party, collecting data through a secure web server, or aggregating data immediately may reduce some privacy risks, but they do not eliminate the possibility of collecting excessive or unnecessary data. NEW QUESTION # 177

Which of the following is the MOST important attribute of a privacy policy?

* Breach notification period

- A. Transparency
- B. Data retention period
- C. Language localization

Answer: C

Explanation:

Explanation

Transparency is the most important attribute of a privacy policy because it informs the users about how their personal data is collected, used, shared, and protected by the organization. Transparency also helps to build trust and confidence with the users, and to comply with legal and ethical obligations regarding data privacy.

NEW QUESTION # 178

When a government's health division established the complete privacy regulation for only the health market, which privacy protection reference model is being used?

- A. Comprehensive
- B. Co-regulatory
- C. Sectoral
- D. Self-regulatory

Answer: A

NEW QUESTION # 179

Which of the following BEST supports an organization's efforts to create and maintain desired privacy protection practices among employees?

- A. Skills training programs
- B. Awareness campaigns
- C. Performance evaluations
- D. Code of conduct principles

Answer: B

Explanation:

Awareness campaigns are initiatives that aim to educate and inform employees about the importance of privacy protection, the organization's privacy policies and procedures, the applicable laws and regulations, and the best practices and behaviors to safeguard personal data. Awareness campaigns can support an organization's efforts to create and maintain desired privacy protection practices among employees by raising their awareness, understanding and commitment to privacy, as well as by influencing their attitudes, values and culture. Awareness campaigns can use various methods and channels, such as posters, newsletters, videos, webinars, quizzes, games or events, to deliver consistent and engaging messages to the target audience. The other options are not the best ways to support an organization's efforts to create and maintain desired privacy protection practices among employees. Skills training programs are focused on developing specific technical or functional skills related to privacy, but they may not address the broader aspects of privacy awareness or culture. Performance evaluations are focused on measuring and rewarding individual or team performance based on predefined criteria or objectives, but they may not reflect the actual level of

privacy awareness or practice. Code of conduct principles are focused on establishing and enforcing ethical standards and rules of behavior for employees, but they may not be sufficient to create or maintain privacy awareness or practice without effective communication and education¹, p. 103-104 Reference: 1: CDPSE Review Manual (Digital Version)

NEW QUESTION # 180

.....

You can contact our service any time as long as you have questions on our CDPSE practice engine. They are available 24-hours for guidance and information to help you solve your problem or confusion on the CDPSE exam braindumps. And they can also give you the fast and professional help as they are trained to deal with matters with high-efficiency on our CDPSE learning guide. And if you buy our CDPSE training materials, you will find you can have it in 5 to 10 minutes.
