

Latest Updated SC-401 Accurate Study Material Supply you Valuable Frenquent Update for SC-401: Administering Information Security in Microsoft 365 to Prepare easily

P.S. Free & New SC-401 dumps are available on Google Drive shared by Exam4Tests: <https://drive.google.com/open?id=1MVjIvBw1irDlqEMXHnnfjQxJHZjqdT>

Taking practice exams teaches you time management so you can pass the Administering Information Security in Microsoft 365 (SC-401) exam. Exam4Tests's SC-401 practice exam makes an image of a real-based examination which is helpful for you to not feel much pressure when you are giving the final examination. You can give unlimited practice tests and improve yourself daily to achieve your desired destination.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 2	<ul style="list-style-type: none"> • Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 3	<ul style="list-style-type: none"> • Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 4	<ul style="list-style-type: none"> • Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

100% Pass Perfect Microsoft - SC-401 Accurate Study Material

You must want to know your scores after finishing exercising our SC-401 study materials, which help you judge your revision. Now, our windows software and online test engine of the SC-401 study materials can meet your requirements. You can choose from two modules: virtual exam and practice exam. Then you are required to answer every question of the SC-401 Study Materials. In order to make sure you have answered all questions, we have answer list to help you check.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q133-Q138):

NEW QUESTION # 133

You have a Microsoft 365 E5 subscription.

You need to identify documents that contain patent application numbers containing the letters PA followed by eight digits, for example, PA 12345678. The solution must minimize administrative effort.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To identify the documents, use a data classification of:

<input type="checkbox"/>	Exact data match (EDM)
<input type="checkbox"/>	Sensitive info type
<input type="checkbox"/>	Trainable classifier

Configure data classifications by using a:

<input type="checkbox"/>	Keyword dictionary
<input type="checkbox"/>	Regular expression
<input type="checkbox"/>	Function

Answer:

Explanation:

The screenshot shows the 'Answer Area' with the question text and two dropdown menus. The first dropdown menu is open, showing three options: 'Exact data match (EDM)', 'Sensitive info type', and 'Trainable classifier'. The second dropdown menu is also open, showing three options: 'Keyword dictionary', 'Regular expression', and 'Function'. The correct selections are 'Sensitive info type' and 'Regular expression', which are highlighted with a red border in the original image.

Explanation:

Answer Area

To identify the documents, use a data classification of:

Configure data classifications by using a:

Box 1: Since you are looking for a specific pattern (PA followed by eight digits, e.g., PA 12345678), the best classification method is Sensitive Info Type. Sensitive Info Types allow pattern-based matching to identify structured data. Exact Data Match (EDM) is not needed because you're not comparing against a fixed dataset. Trainable classifier is not appropriate because this is a structured pattern, not an unstructured document classification.

Box 2: Since PA 12345678 follows a structured pattern, the most effective method is Regular Expression (Regex). A Regular Expression (Regex) can be written to match "PA" followed by exactly eight digits (e.g., PA\d{8}). Keyword dictionary is not ideal because it works for predefined words, not number patterns. Function is unnecessary because there is no need for checksum validation or predefined validation rules.

NEW QUESTION # 134

Hotspot Question

You need to implement an information compliance policy to meet the following requirements:

- Documents that contain passport numbers from the United States, Germany, Australia, and Japan must be identified automatically.
- When a user attempts to send an email or an attachment that contains a passport number, the user must receive a tooltip in Microsoft Outlook.
- Users must be blocked from using Microsoft SharePoint Online or OneDrive for Business to share a document that contains a passport number.

What is the minimum number of sensitivity labels and auto-labeling policies you should create?

To answer, select the appropriate options in the answer area.

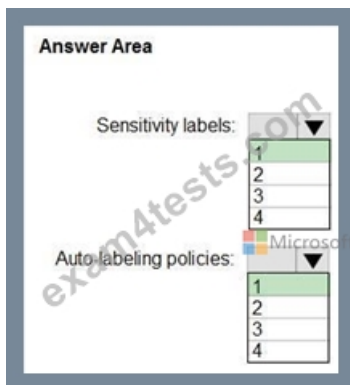

Answer Area

Sensitivity labels:

Auto-labeling policies:

Answer:

Explanation:

Explanation:

Box 1: 1

We have four different kind of built-in sensitive information types for United States, Germany, Australia, and Japan in Data classification.

Box 2: 1

One Autolabeling policy can include all (4) passport sensitive information types in Rule- Conditions. In the same policy you choose one sensitivity label to add to files.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-sensitivity-labels>

NEW QUESTION # 135

You have a Microsoft 365 E5 subscription.

You need to apply data loss prevention (DLP) policies to the following:

- Microsoft Exchange Online mailboxes
- Microsoft SharePoint Online sites
- Microsoft Power BI workspaces
- Microsoft OneDrive accounts
- On-premises repositories

What is the minimum number of DLP policies required to achieve the goal?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: C

NEW QUESTION # 136

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have a user named User1. Several users have full access to the mailbox of User1.

Some email messages sent to User1 appear to have been read and deleted before the user viewed them.

When you search the audit log in the Microsoft Purview portal to identify who signed in to the mailbox of User1, the results are blank.

You need to ensure that you can view future sign-ins to the mailbox of User1.

Solution: You run the Set-MailboxFolderPermission -Identity "User1" -User User1@contoso.com -AccessRights Owner command.

Does that meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

The Set-MailboxFolderPermission -Identity "User1" -User User1@contoso.com -AccessRights Owner command is incorrect. This assigns folder permissions but does not enable auditing. It does not track who accessed the mailbox or deleted emails.

NEW QUESTION # 137

Hotspot Question

You have a Microsoft 365 E5 subscription that uses Microsoft Purview and just-in-time (JIT) protection. Fallback action in case of failure is set to Block users from completing actions.

The subscription contains the users shown in the following table.

Name	JIT protection scope
User1	Included
User2	Not configured
User3	Included

The subscription contains the devices shown in the following table.

Name	Microsoft Defender
Device1	Onboarded
Device2	Onboarded
Device3	Not onboarded

The devices contain the files shown in the following table.

Name	File classification evaluation status	Location
File1.docx	Not evaluated	Device1
File2.pdf	Evaluated	Device2
File3.xlsx	Not evaluated	Device3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area 

Statements	Yes	No
If User1 attempts to copy File1.docx to a removable USB drive, JIT will block the action.	<input type="radio"/>	<input type="radio"/>
If User2 signs in to Device2 and attempts to attach File2.pdf to an email, JIT will block the action.	<input type="radio"/>	<input type="radio"/>
If User3 attempts to copy File3.xlsx to a network share, JIT will generate an audit event.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area 

Statements	Yes	No
If User1 attempts to copy File1.docx to a removable USB drive, JIT will block the action.	<input checked="" type="radio"/>	<input type="radio"/>
If User2 signs in to Device2 and attempts to attach File2.pdf to an email, JIT will block the action.	<input type="radio"/>	<input checked="" type="radio"/>
If User3 attempts to copy File3.xlsx to a network share, JIT will generate an audit event.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Box 1: Yes

User1 is included in the JIT protection scope.

File1.docx has the file classification evaluation status of not evaluated, and is located on Device1.

Device1 is onboarded.

JIT will block the action.

Note: In a Microsoft 365 environment with Purview and Just-in-Time (JIT) protection, a file with a "not evaluated" classification status will be protected by JIT. When JIT protection is enabled, Endpoint DLP will block all egress activities on monitored files while waiting for policy evaluation to complete, including when the evaluation status is "not evaluated".

Box 2: No

User2 is not within the JIT protection scope.

Box 3: No

User3 is included in the JIT protection scope.

File3.docx has the file classification evaluation status of not evaluated, and is located on Device3.

Device3 is not onboarded.
