

NCP-EUC Latest Test Discount | NCP-EUC Exam Online

BONUS!!! Download part of TorrentVCE NCP-EUC dumps for free: https://drive.google.com/open?id=1FyqibSaBTiOZNnVSK6BivLFPiDOQ_BT9

Additionally, all operating systems also support this format. The third format is the desktop NCP-EUC Practice Exam software. It is ideal for users who prefer offline Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam practice. This format is supported by Windows computers and laptops. You can easily install this software in your system to use it anytime to prepare for the examination.

The TorrentVCE is one of the leading and reliable platforms that has been helping Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam NCP-EUC exam candidates in their preparation. With high pass rate and Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam NCP-EUC at a preferential price. To enhance your competitiveness in your field.

Take Your Exam Preparation to the Next Level with TorrentVCE Nutanix NCP-EUC Web-Based Practice Test

In order to pass the exam and fight for a brighter future, these people who want to change themselves need to put their ingenuity and can do spirit to work. More importantly, it is necessary for these people to choose the convenient and helpful NCP-EUC test questions as their study tool in the next time. Because their time is not enough to prepare for the exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the NCP-EUC exam and get the related certification in a short time have to pay more attention to the study materials. In addition, best practice indicates that people who have passed the NCP-EUC Exam would not pass the exam without the help of the NCP-EUC reference guide. So the study materials will be very important for all people. If you also want to pass the exam and get the related certification in a short, the good study materials are the best choice for you. Now we are going to make an introduction about the NCP-EUC exam prep from our company for you.

Nutanix NCP-EUC (Nutanix Certified Professional - End - User Computing) Exam is an industry-recognized certification exam designed for IT professionals who work with Nutanix solutions. NCP-EUC exam is designed to test the candidate's proficiency in deploying, managing, and troubleshooting Nutanix end-user computing environments. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is ideal for system administrators, IT managers, and support staff who work with Nutanix solutions in their daily roles.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q156-Q161):

NEW QUESTION # 156

A company is using Citrix for virtual desktops on Nutanix with AHV. The studio has 10,000 users who will be connecting to this infrastructure and have deployed a dedicated Files cluster for holding the user home shares.

Since this is a dedicated cluster with dual Intel 6242 28 GHz 16 Core processors and 192GB of RAM, what should be done for the FSVM and CVM configuration to allow for optimal performance?

- A. Leave the CVM vCPUs at 12 and increase the FSVM vCPUs to 8,
- B. Increase the CVM vCPUs to 16 and the FSVM vCPUs to 12.
- **C. Leave the CVM RAM at 32GB and increase the FSVM RAM to 96GB.**
- D. Increase the CVM RAM to 64GB and the FSVM RAM to 96GB.

Answer: C

Explanation:

<https://portal.nutanix.com/page/documents/solutions/details?targetId=TN-2041-Nutanix-Files:file-server-virtual-https://next.nutanix.com/files-storage-71/command-line-access-to-nutanix-file-server-vm-fsvm-via-ssh-nutanix-f>

The file server VM (FSVM) is a virtual machine that runs on Nutanix Files and provides file services such as SMB shares and NFS exports. The FSVM is based on CentOS and incorporates all the security and hardening that goes into the Nutanix Controller VM (CVM)2. The CVM is a virtual machine that runs on each node of a Nutanix cluster and provides storage management, data protection, cluster coordination, and other services3.

The FSVMs have some default configuration settings that can be changed depending on your workload requirements. For example, you can change the number of vCPUs, RAM, network interfaces, or disk size of an FSVM2. However, you should not change these settings without consulting Nutanix Support first.

One of the factors that affects the performance of an FSVM is its memory allocation. The more memory an FSVM has, the more cache it can use for file operations. This can improve the throughput and latency of file serving workloads4. Therefore, increasing the FSVM RAM to 96GB can help optimize its performance for a large number of users.

NEW QUESTION # 157

Where should an administrator configure AWS, Azure, and Google accounts within Frame?

- A. Customers
- B. **Cloud Account**
- C. accounts
- D. Organizations

Answer: B

Explanation:

Frame is a cloud-native desktop-as-a-service platform that delivers virtual apps and desktops from multiple public clouds1. Frame allows administrators to manage various components of their cloud accounts easily from the Frame console1.

A cloud account is a logical grouping of resources that are associated with a specific cloud provider (such as AWS, Azure, or Google) and region1. A cloud account can have multiple virtual networks, master images, and instance types that can be used to create and run virtual apps and desktops1.

To configure AWS, Azure, and Google accounts within Frame, an administrator needs to go to the Cloud Accounts section of the Frame console1. There, the administrator can add new cloud accounts or edit existing ones by providing the required credentials and settings for each cloud provider12.

NEW QUESTION # 158

A network team is designing a new switch infrastructure and wants to keep VM traffic and Storage resiliency traffic separate while minimizing the number of physical ports in use on the switch.

What best practice design choice will work?

- A. Separate CVM and VM NICs in different virtual switches
- B. Configure traffic shaping to distribute traffic between VLANs
- C. Connect breakout cables to multiple node interfaces
- D. **Use the native VLAN for CVMs and tagged VLAN for VMs**

Answer: D

Explanation:

To achieve logical traffic separation while minimizing physical ports (using the same physical uplinks for multiple traffic types), Nutanix AHV networking best practices recommend the use of 802.1Q VLAN tagging.

The standard validated design is to:

* Place the CVM and AHV Host management/storage interfaces on the Native VLAN (untagged) or a specific management VLAN.

* Place User VM (Guest) traffic on Tagged VLANs.

This configuration allows storage replication traffic (CVM) and user traffic (VMs) to share the same physical cables (minimizing port usage) while remaining logically isolated at the switch level. Options like separate virtual switches (Option B) often require dedicated physical uplinks, which violates the requirement to minimize ports.

NEW QUESTION # 159

An administrator receives complaints that non-persistent VDI sessions for an entire department have seen a dramatic change in performance. The most noticeable change is sluggish mouse and keyboard response within open sessions. No additional virtual desktop have been added to the environment in the previous 60 days.

What is the most likely culprit?

- A. Over-provisioning of virtual infrastructure
- B. Legacy network drivers or virtual agents
- C. **Antivirus or Security Agent Scanning**
- D. Unoptimized master image

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix VDI Troubleshooting and Performance Tuning best practices:

* Symptom Analysis: "Sluggish mouse and keyboard response" is a classic symptom of high CPU contention or high Latency on the host or VM. Since the environment was previously stable ("No additional virtual desktops added") and the change was "dramatic," it points to a new process consuming resources unexpectedly.

* The "Agent" Factor: In non-persistent VDI environments, a common cause for sudden performance degradation affecting an "entire department" is an Antivirus or Security Agent running a scheduled scan or a signature update simultaneously across all clones. This creates a "storm" of IOPS and CPU usage (often called an AV storm), starving the user sessions of the resources needed for basic input processing (mouse/keyboard).

* Why not others?

* Unoptimized master image (B): This would cause poor performance from day one, not a "dramatic change" after 60 days of stability.

* Legacy drivers (C): Drivers do not degrade suddenly; they would cause issues from the time of installation.

* Over-provisioning (D): This usually results in gradual degradation as user concurrency increases, not a sudden cliff-edge drop in performance if user counts haven't changed.

NEW QUESTION # 160

What are two primary purposes of a Frame utility Server? (Choose two.)

- A. **Backend for a client-server application**
- B. **shared file server**
- C. Test and develop virtual desktops.
- D. A server that monitors virtual desktop usage

Answer: A,B

Explanation:

Frame utility server is a stand-alone, general purpose Windows server that can be helpful for a variety of use cases, including:

License server: Install a network licensing manager for your software on a Frame utility server. Your production instances can then connect to this server to get the licenses.

Backend for a client-server application: Install a database or other backend service on a Frame utility server. Your production instances can then connect to this server to run your client-server application.

Shared file server: Install a file sharing service on a Frame utility server. Your production instances can then access shared files from this server.

Test and develop virtual desktops: Use a Frame utility server as a sandbox environment to test and develop your virtual desktops before publishing them to your production account.

NEW QUESTION # 161

.....

TorrentVCE has been to make the greatest efforts to provide the best and most convenient service for our candidates. High speed and high efficiency are certainly the most important points. In today's society, high efficiency is hot topic everywhere. So we

designed training materials which have high efficiency for the majority of candidates. It allows candidates to grasp the knowledge quickly, and achieved excellent results in the exam. TorrentVCE's Nutanix NCP-EUC Exam Training materials can help you to save a lot of time and effort. You can also use the extra time and effort to earn more money.
