### Salesforce Certified Advanced Administrator Sample Questions (Q210-Q215):

#### NEW QUESTION # 210

AW Computing has several service plans it offers with its laptops. Management wants the sales team to focus on bringing in new business and to have the creation of the renewal opportunity for the service plans happen automatically.

What approach should the administrator take to automate the renewal process?

- A. Configure a flow that will create the renewal based on the closed-won date and opportunity line items.
- B. Configure a time-based workflow to send an email reminder to the sales rep when the service plan expires.
- C. Create a validation rule to prevent the rep from closing the opportunity until a renewal is associated.
- D. Create a dynamic Lightning page with rich text to remind the rep to create a renewal opportunity when the opportunity is closed won.

Answer: A

Explanation:

To automate the renewal process for service plans, AW Computing should configure a flow that will create the renewal based on the closed-won date and opportunity line items. A flow is a tool that can automate complex business processes by executing logic, interacting with Salesforce database, calling Apex classes, and guiding users through screens. A flow can be triggered by various events, such as when an opportunity is closed won.

#### NEW QUESTION # 211

Cloud Kicks would like to establish a backup administrator who can assign but not modify user permission How should this be accomplished?

- A. Create an administrator permission set group
- B. Set up the user as a delegated administrator.
- C. Configure a custom administrator profile.
- **D. Assign 'the user the System Administrator profile.**

**Answer: D**

#### NEW QUESTION # 212

An administrator created and activated several record-triggered flows that are configured to run before the record is saved on the same object.

What should the administrator consider about the order of execution for flows?

- A. The flow type will determine the order of execution.
- **B. The order of flow execution is unpredictable.**
- C. The last created date of the flow will determine the order.
- D. The flows will execute in alphabetical order based on their names.

**Answer: B**

Explanation:

When you have multiple record-triggered flows that are configured to run before the record is saved on the same object, the order of flow execution is unpredictable. This means that you cannot guarantee which flow will run first or last, or how they will affect each other's field updates. Therefore, you should avoid creating multiple before-save flows on the same object and instead consolidate them into one flow if possible.
