- B. Falcon is in reduced functionality mode
- C. The SSO username doesn't match their email address in Falcon
- D. The maintenance token has expired

**Answer: C**

The option that may prevent a user from logging into Falcon via single sign-on (SSO) is that the SSO username doesn't match their email address in Falcon. SSO is a feature that allows you to use an external identity provider (IdP) to authenticate and authorize users to access the Falcon platform. SSO simplifies and streamlines the login process, as users only need to remember one set of credentials for multiple applications.
