- A. It escalates the operational costs significantly.
- **B. It decreases the necessity for human interaction in customer service.**
- C. It reduces the overall user satisfaction.
- D. It increases the complexity of the IT infrastructure.

答案: B

問題 #18

When planning for the data management console in Db2, what functionality is crucial for effective database management?

- A. Restricting user access to essential functionalities only
- B. Avoiding integration with other Db2 services
- C. Limited visibility over data and queries
- **D. Comprehensive monitoring and management features**

答案: D

問題 #19

When granting a user access to the Data Engineer role, which two permissions will the user be associated with as part of this role?

- A. Monitor project workload
- B. Manage platform
- **C. Create projects**
- D. Manage workflows
- **E. Manage data protection rules**

答案: C,E

解題說明:

The Data Engineer role in IBM Cloud Pak for Data includes permissions necessary for managing the data pipeline lifecycle. This includes the ability to create projects, manage data assets, and configure data protection rules, which are critical for ensuring data privacy and governance. The role does not include platform-level administrative privileges like managing the platform or monitoring all workloads. Workflow management is typically assigned to users with broader project or orchestrator roles.

問題 #20

In which situation would you specifically label nodes for DB2 workloads?

- A. For reducing overall system performance
- B. When node differentiation is unnecessary
- **C. To distinguish between different data or workload types**
- D. When all nodes are utilized for identical tasks

答案: C

問題 #21

In the context of Watson Assistant, what purpose do storage classes serve?

- A. Are only relevant for aesthetic classification
- **B. Determine the latency and throughput for data access**
- C. Impact the font size of stored data
- D. They categorize storage by color only

答案: B
