

# Trustworthy 1z0-1073-25 Exam Content & Dumps 1z0-1073-25 Reviews

BONUS!!! Download part of DumpStillValid 1z0-1073-25 dumps for free: <https://drive.google.com/open?id=16UvuHSqYD5z8E54Wy0hHFV03rsp1faYn>

our company made our 1z0-1073-25 practice guide with accountability. Our 1z0-1073-25 training dumps are made by our 1z0-1073-25 exam questions responsible company which means you can gain many other benefits as well. We offer free demos of our for your reference, and send you the new updates if our experts make them freely. What is more, we give some favorable discount on our 1z0-1073-25 Study Materials from time to time, which mean that you can have more preferable price to buy our products.

## Oracle 1z0-1073-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Implementing Inventory Transactions:</b> This domain measures the ability of Inventory Application Developers to manage and execute inventory transactions. It covers the understanding of inventory balances, item availability, and reservation functionalities. Candidates must show proficiency in configuring transaction controls, handling serial and lot control, and managing common transaction types like subinventory transfers and interorganization transfers.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Implementing Inventory Replenishment:</b> This section tests the ability of Inventory Replenishment Planners to configure and execute automated replenishment strategies. Candidates should understand how to define PAR locations and apply Min-Max planning. It assesses hands-on knowledge in running replenishment plans that maintain inventory levels across different storage locations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Implementing Inventory Management:</b> This section of the exam evaluates the skills of Oracle Inventory Specialists in configuring core inventory functions. It focuses on the cost-related features of inventory, including Receipt Accounting and Cost Accounting. Candidates are expected to demonstrate their ability to set up subinventories, units of measure, items, and facility schedules as part of the inventory management configuration process.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Understanding External Integration:</b> This portion evaluates how System Integration Specialists understand and support integrations between Inventory Management and other Oracle or third-party systems. It includes familiarity with key integration points necessary for streamlined operations and system data consistency.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Implementing Advanced Inventory Transactions:</b> This part of the exam assesses the skills of Supply Chain Analysts in handling complex inventory flows. It explores advanced scenarios like consignment processes, supply chain orchestration, and back-to-back orders. Candidates must also demonstrate configuration of barcode scanning, product recalls, and support for electronic signatures in compliance environments.</li> </ul>

## Dumps Oracle 1z0-1073-25 Reviews, Test 1z0-1073-25 Centres

1z0-1073-25 exam tests are a high-quality product recognized by hundreds of industry experts. Over the years, 1z0-1073-25 exam questions have helped tens of thousands of candidates successfully pass professional qualification exams, and help them reach the peak of their career. It can be said that 1z0-1073-25 test guide is the key to help you open your dream door. We have enough confidence in our products, so we can give a 100% refund guarantee to our customers. 1z0-1073-25 Exam Questions promise that if you fail to pass the exam successfully after purchasing our product, we are willing to provide you with a 100% full refund.

## Oracle Inventory Cloud 2025 Implementation Professional Sample Questions (Q54-Q59):

### NEW QUESTION # 54

Which functionalities are part of Supply Chain Orchestration? (Choose four)

- A. providing supply requests to Fusion Planning Central
- B. receiving supply requests from several sources operating in Oracle Cloud
- C. performing automated change management to match supply to demand
- D. launching and managing complex business processes
- E. providing a 360-degree view of the supply-creation process

**Answer: B,C,D,E**

### NEW QUESTION # 55

#### SIMULATION

Set Up Back-to-Back Transfer Flow

The topic explains what you need to do for setting up back-to-back transfer flow.

In the Oracle Product Information Management, ensure that the Item is Back-to-Back enabled.

In Oracle Global Order Promising:

1. Set up a global sourcing rule with Type as Transfer from. Set the organization as the organization requesting the transfer (example, Warehouse 1).
2. Set up a local sourcing rule for the organization (in this example, Warehouse 1) Type as Transfer from, from the organization that has the stock from which the transfer will take place (example, Warehouse 2).
3. Set up an ATP rule with the Promising Mode as Supply chain availability search.
4. Ensure that the Supply chain availability search attributes are enabled according to your requirements. For example, you might want the application to search components and resources to include on-hand or in-transit Supply Types or fulfillment lines Demand Types.
5. Set the ATP Rule Assignment as required.
6. Set the sourcing assignments for the sourcing rules that you defined in steps 1 and 2.
7. Ensure that the assignment level used for the global sourcing rule doesn't include any Organization.
8. Refresh and restart the Order Promising Server for ATP Rules and Sourcing.

With this setup:

- \* The global rule is used to source the item from Warehouse 1 if there is stock available to reserve.
- \* If there's no stock on hand, Global Order Promising uses the local rule to transfer the item from Warehouse 2 to Warehouse 1.

## Answer:

Explanation:

See the Explanation for the complete solution

Explanation:

Set Up Back-to-Back Transfer Flow in Oracle Cloud

The Back-to-Back (B2B) Transfer Flow allows organizations to move inventory from one warehouse (source) to another warehouse (destination) when stock is unavailable in the fulfillment location. This setup ensures that Oracle Global Order Promising (GOP) can automatically determine the best supply source and execute the transfer process efficiently.

### 1. Prerequisites: Enable Back-to-Back for Items

Before setting up the transfer flow, ensure that the item is Back-to-Back enabled in Oracle Product Information Management (PIM):

Navigate to Oracle Product Information Management (PIM).

Search for the item you want to enable for back-to-back fulfillment.

In the item definition, enable the "Back-to-Back Enabled" attribute.

Save and publish the item updates.

☐ This ensures that the item can participate in the B2B fulfillment process.

### 2. Configure Global Order Promising (GOP) for Back-to-Back Transfer Flow In Oracle Global Order Promising (GOP), configure the system to determine the best transfer source when fulfilling back-to-back orders.

Step 1: Create a Global Sourcing Rule (Type: Transfer From)

Navigate to Oracle Global Order Promising (GOP).

Create a Global Sourcing Rule with the following details:

Type: "Transfer From"

Source Organization: Warehouse 1 (Requesting warehouse or fulfillment location).

☐ This rule ensures that items are sourced from Warehouse 1 whenever stock is available.

Step 2: Create a Local Sourcing Rule (Type: Transfer From)

Create a Local Sourcing Rule for Warehouse 1 as follows:

Type: "Transfer From"

Source Organization: Warehouse 2 (Stock-holding warehouse).

☐ This rule ensures that if Warehouse 1 does not have stock, the system transfers items from Warehouse 2.

Step 3: Set Up an ATP Rule for Availability Check

Create an ATP Rule (Available-to-Promise Rule) with the following parameters:

Promising Mode: "Supply Chain Availability Search".

Enable attributes for supply chain availability search based on business needs.

Configure ATP search to consider on-hand stock, in-transit inventory, components, and resources if needed.

☐ This ensures that GOP can evaluate stock levels across multiple locations.

Step 4: Assign ATP Rule to Organizations

Assign the ATP Rule to the appropriate organizations.

Ensure that the rule applies to Warehouse 1 and Warehouse 2 based on their roles in the sourcing process.

☐ This enables availability checking when processing sales orders.

Step 5: Assign Sourcing Rules to Organizations

Assign the Global Sourcing Rule to the enterprise-wide sourcing assignment.

Assign the Local Sourcing Rule to Warehouse 1, specifying Warehouse 2 as the sourcing location.

Ensure that the assignment level for the global sourcing rule does not include a specific organization (it should apply at a broader level).

☐ This ensures that Oracle GOP prioritizes sourcing stock from Warehouse 1 first and transfers from Warehouse 2 if needed.

Step 6: Refresh and Restart Order Promising Server

Once the sourcing rules and ATP configurations are in place:

Refresh Oracle Global Order Promising (GOP) Rules.

Restart the Order Promising Server to apply sourcing and ATP rule changes.

☐ This step ensures that all updates take effect and are used in future order promising decisions.

### 3. Expected Behavior After Setup

If Warehouse 1 has stock → GOP reserves inventory and processes the sales order immediately.

If Warehouse 1 does not have stock → GOP triggers a transfer order to move stock from Warehouse 2 to Warehouse 1.

Once the transfer order is fulfilled and received, the sales order is shipped to the customer.

☐ This ensures automated order fulfillment with minimal manual intervention.

### 4. Benefits of Back-to-Back Transfer Flow in Oracle Cloud

✓ Optimized Inventory Utilization - Uses stock efficiently across multiple warehouses.

✓ Automated Stock Transfers - Eliminates manual intervention by automatically moving stock when needed.

✓ Reduced Procurement Costs - Moves existing inventory instead of purchasing new stock.

✓ Faster Order Fulfillment - Reduces lead times by sourcing from internal stock before procurement.

✓ Seamless Oracle Cloud Integration - Works across Oracle Order Management, Inventory, GOP, and Supply Chain

Orchestration.

#### NEW QUESTION # 56

What happens when you accrue at receipt in receipt accounting?

- A. Less timely accounting takes place.
- **B. Accrual and expense are booked upon receipt. (\*)**
- C. Less accounting and reconciliation take place.
- D. Expenses and payables are booked when a supplier invoice is processed.

**Answer: B**

#### NEW QUESTION # 57

You are configuring business units for your customer and have defined two business units: Business Unit America and Business Unit Singapore.

Based on discussions with the customer, you configured Business Unit Singapore as Procurement Service Providers in the Manage Service Providers: Business Unit America task.

What is the role of Business Unit Singapore?

- A. To process procurement orders, payable invoices, billing, and revenue for Business Unit America
- B. To process requisitions, supplier information, and payable invoices for Business Unit America
- **C. To process requisitions and negotiate supplier terms for Business Unit America**

**Answer: C**

#### NEW QUESTION # 58

Which two statements are true about enterprise structures?

- A. A business unit can be assigned to multiple primary ledgers.
- B. An inventory organization can have more than one cost organization.
- **C. Client business units can be part of other legal entities in a shared service center model.**
- **D. Divisions can be represented in the chart of accounts.**

**Answer: C,D**

#### NEW QUESTION # 59

.....

We have made classification to those faced with various difficulties, aiming at which we adopt corresponding methods to deal with. According to the statistics shown in the feedback chart, the general pass rate for latest 1z0-1073-25 test prep is 98%, which is far beyond that of others in this field. In recent years, our 1z0-1073-25 Exam Guide has been well received and have reached 99% pass rate with all our dedication. As one of the most authoritative question bank in the world, our study materials make assurance for your passing the 1z0-1073-25 exam.
