- A. Understand integration dependencies and their current status
- B. Visualize data flow between systems
- C. Understand application data quality
- D. Identify active applications affected by the transformation

Answer: A,D

Explanation:

The Application Landscape Report in SAP LeanIX provides a consolidated view of all applications within the IT environment. It highlights which applications are active, which are impacted by transformation plans, and how they align with business capabilities. Additionally, it displays integration dependencies, helping stakeholders understand the connections between applications and the interfaces that may be influenced by change. While other reports focus on data quality or specialized views, this report centers on active applications and key integration relationships.
