## Popular JN0-336 Exams - JN0-336 Valid Test Pattern

It is very convenient for you to use the online version of our JN0-336 real test. If you realize convenience of the online version, it will help you solve many problems. On the one hand, the online version is not limited to any equipment. You are going to find the online version of our JN0-336 Test Prep applies to all electronic equipment, including telephone, computer and so on. On the other hand, if you decide to use the online version of our JN0-336 study materials, you don't need to worry about no WLAN network.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q61-Q66):

### NEW QUESTION # 61

Exhibit

You are asked to ensure that servers running the Ubuntu OS will not be able to update automatically by blocking their access at the SRX firewall. You have configured a unified security policy named Blockubuntu, but it is not blocking the updates to the OS. Referring to the exhibit which statement will block the Ubuntu OS updates?

- A. Configure the Allowweb policy to have a dynamic application of any.
- B. Move the Blockubuntu policy after the Allowweb policy.
- C. Configure the Blockubuntu policy with the junos-https application parameter.
- D. Change the default policy to permit-all.

Answer: C

### NEW QUESTION # 62

Which two statements are correct about chassis clustering? (Choose two.)

- A. The node ID is used to identify each device in the chassis cluster.
- B. A system reboot is required to activate changes to the cluster.
- C. The cluster ID is used to identify each device in the chassis cluster.
- D. The node ID value ranges from 1 to 255.

**Answer: A,B**

Explanation:

In chassis clustering, the node ID is indeed used to uniquely identify each device within the cluster. This allows for individual addressing and management of devices within the cluster configuration, which is crucial for operations and maintenance. Typically, activating changes that involve chassis clustering configuration, such as setting or changing the node ID or forming a new cluster, requires a reboot of the devices. This ensures that all configuration changes are properly applied and that the devices can synchronize their states as part of the cluster.

### NEW QUESTION # 63

Which statement regarding Juniper Identity Management Service (JIMS) domain PC probes is true?

- A. JIMS domain PC probes are triggered to map usernames to group membership information.
- B. JIMS domain PC probes analyze domain controller security event logs at 60-minute intervals by default.
- C. JIMS domain PC probes are initiated by an SRX Series device to verify authentication table information.
- D. JIMS domain PC probes are triggered if no username to IP address mapping is found in the domain security event log.

**Answer: D**

Explanation:

Juniper Identity Management Service (JIMS) domain PC probes are used to map usernames to IP addresses in the domain security event log. This allows for the SRX Series device to verify authentication table information, such as group membership. The probes are triggered whenever a username to IP address mapping is not found in the domain security event log. By default, the probes are executed at 60-minute intervals.

### NEW QUESTION # 64

Click the Exhibit button.

You are asked to create a security policy that will automatically add infected hosts to the infected hosts feed and block further communication through the SRX Series device.

What needs to be added to this configuration to complete this task?

- A. Add an action to the permit portion of the security policy.
- B. Add logging to the permit portion of the security policy.
- C. Add a match rule to the security policy with an appropriate threat level.
- D. Add a security intelligence policy to the permit portion of the security policy.

**Answer: D**

Explanation:

To create a security policy that will automatically add infected hosts to the infected hosts feed and block further communication through the SRX Series device, you need to add a security intelligence policy to the permit portion of the security policy. A security intelligence policy is a policy that allows you to block or monitor traffic from malicious sources based on threat intelligence feeds from Juniper ATP Cloud or other providers. One of the feeds that you can use is the Infected-Hosts feed, which contains IP addresses of hosts that are infected with malware and communicate with command-and-control servers.

You can create a profile and a rule for the Infected-Hosts feed and specify the threat level and the action to take for the infected hosts. Then, you can link the security intelligence policy with the firewall policy and apply it to the traffic that you want to protect.

Reference: = Security Intelligence Overview, Configuring Security Intelligence Policy, Configure the Security Intelligence Policy on the SRX Series Device

### NEW QUESTION # 65

You want to permit access to an application but block application sub.  
Which two security policy features provide this capability? (Choose two.)

- **A. APPID**
- B. content filtering
- C. URL filtering
- **D. micro application detection**

**Answer: A,D**

Explanation:

Micro application detection is a feature that enables more granular control over applications by identifying and taking action on sub-features or specific behaviors within an application. For example, allowing access to Facebook while blocking Facebook Chat. Application Identification (APPID) is a feature that identifies and controls applications based on their traffic patterns and characteristics. APPID can be configured to recognize not only the main application but also its various subcomponents, allowing for precise control over what is allowed or blocked.

## NEW QUESTION # 66

.....

Helping our candidates to pass the JN0-336 exam and achieve their dream has always been our common ideal. We believe that your satisfactory is the drive force for our company. So on one hand, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful JN0-336 real study dumps. On the other hand, we provide you the responsible 24/7 service. Our candidates might meet so problems during purchasing and using our JN0-336 Prep Guide, you can contact with us through the email, and we will give you respond and solution as quick as possible. With the commitment of helping candidates to pass JN0-336 exam, we have won wide approvals by our clients. We always take our candidates' benefits as the priority, so you can trust us without any hesitation.
