Latest 712-50 Exam Materials: EC-Council Certified CISO (CCISO) provide you creditable Practice Questions

The EC-Council Certified CISO (CCISO) (712-50) PDF dumps are suitable for smartphones, tablets, and laptops as well. So you can study actual EC-Council Certified CISO (CCISO) (712-50) questions in PDF easily anywhere. VCEPrep updates EC-Council Certified CISO (CCISO) (712-50) PDF dumps timely as per adjustments in the content of the actual EC-COUNCIL 712-50 exam. In the Desktop 712-50 practice exam software version of EC-COUNCIL 712-50 Practice Test is updated and real. The software is useable on Windows-based computers and laptops. There is a demo of the EC-Council Certified CISO (CCISO) (712-50) practice exam which is totally free. EC-Council Certified CISO (CCISO) (712-50) practice test is very customizable and you can adjust its time and number of questions.

EC-Council Certified CISO 712-50 Exam

EC-Council Certified CISO 712-50 Exam which is related to EC-Council Certified CISO certification. This 712-50 exam validates the ability to a candidate to implement, manage and maintain an information security governance program, Coordinate the application of information security strategies, plans, policies, and procedures to reduce regulatory risk, control Information Security Management, Identify, negotiate and manage vendor agreement and community, Identify the basic network architecture, models, protocols and components such as routers and hubs that play a role in network security.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q438-Q443):

NEW QUESTION # 438

Which of the following is a benefit of information security governance?

- A. Direct involvement of senior management in developing control processes
- **B. Reduction of the potential for civil and legal liability**
- C. Increasing the risk of decisions based on incomplete management information.
- D. Questioning the trust in vendor relationships.

Answer: B

NEW QUESTION # 439

Which business stakeholder is accountable for the integrity of a new information system?

- **A. CISO**
- B. Project manager
- C. Compliance Officer
- D. Board of directors

Answer: A

Explanation:

Accountability for Information System Integrity:

The Chief Information Security Officer (CISO) is responsible for the overall security of information systems, including their integrity. This accountability extends to implementing and overseeing policies, controls, and processes to safeguard systems.

Why Not Other Options:

- * Compliance Officer (B): Focuses on regulatory adherence but does not oversee system integrity directly.
- * Project Manager (C): Handles project execution but does not have overarching accountability for security.
- * Board of Directors (D): Provides strategic oversight but does not manage specific system integrity.

EC-Council CISO Framework:

The CISO's role is explicitly defined as ensuring the confidentiality, integrity, and availability (CIA triad) of systems, which includes accountability for their integrity.

NEW QUESTION # 440

You are the CISO of a commercial social media organization. The leadership wants to rapidly create new methods of sharing customer data through creative linkages with mobile devices. You have voiced concern about privacy regulations but the velocity of the business is given priority. Which of the following BEST describes this organization?

- A. Risk conditional
- B. Risk minimal
- C. Risk averse
- **D. Risk tolerant**

Answer: D

NEW QUESTION # 441

In order for a CISO to have true situational awareness there is a need to deploy technology that can give a real-time view of security events across the enterprise. Which tool selection represents the BEST choice to achieve situational awareness?

- A. VMware, router, switch, firewall, syslog, vulnerability management system (VMS)
- **B. SIEM, IDS, firewall, VMS**
- C. Security Incident Event Management (SIEM), IDS, router, syslog
- D. Intrusion Detection System (IDS), firewall, switch, syslog

Answer: B

Explanation:

Best Tools for Situational Awareness:

- * Security Information and Event Management (SIEM): Centralized view of logs and real-time analytics.
- * Intrusion Detection System (IDS): Identifies malicious activity and alerts the SOC.
- * Firewall: Monitors and controls incoming and outgoing network traffic.
- * Vulnerability Management System (VMS): Continuously scans and assesses vulnerabilities.

Why This Combination Works Best:

- * SIEM provides a comprehensive real-time overview of security events.
- * IDS detects potential threats.
- * Firewalls act as a perimeter defense.
- * VMS ensures proactive identification and mitigation of vulnerabilities.

Why Not Other Options:

- * Option A: Missing key security tools like IDS and SIEM.
- * Option B: Limited functionality for enterprise-wide situational awareness.
- * Option C: Lacks VMS for proactive vulnerability management.

EC-Council CISO Guidance:

This selection ensures a holistic approach to threat detection, prevention, and remediation across the enterprise.

NEW QUESTION # 442

Which of the following can the company implement in order to avoid this type of security issue in the future?

- **A. A security training program for developers**
- B. A audit management process
- C. Network based intrusion detection systems
- D. A risk management process

Answer: A

Explanation:

- * Security issues often arise due to vulnerabilities in the code. Training developers in secure coding practices helps mitigate this risk.
- * A security training program equips developers to identify and address common vulnerabilities like injection flaws, insecure deserialization, and others.

Why Other Options Are Less Relevant:

- * A. Network-based intrusion detection systems: Useful for detecting attacks but do not address the root cause of insecure coding.
- * C. A risk management process: Focuses on organizational risk but does not directly resolve development flaws.
- * D. An audit management process: Ensures compliance but does not directly enhance developer knowledge or secure coding practices.

EC-Council CISO Reference:

Emphasis is placed on proactive security measures, including developer training, as a core aspect of reducing vulnerabilities.
