Our C_S4CPB_2502 study questions are efficient and can guarantee that you can pass the exam easily. For many people, they don't have enough time to learn the C_S4CPB_2502 Exam Torrent. The in-service staff is both busy in their jobs and their family lives and for the students they may have to learn or do other things. But if you buy our C_S4CPB_2502 exam torrent you can save your time and energy and spare time to do other things. Please trust us.

SAP C_S4CPB_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to Cloud Computing and SAP Cloud ERP Basics: This section of the exam measures skills of ERP Implementation Project Manager and assesses foundational knowledge of cloud computing principles and SAP Cloud ERP structure. It ensures understanding of key differences from on-premise ERP, cloud deployment benefits, and basic navigation of cloud ERP systems.

Topic 2	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of SAP Cloud ERP Consultant and focuses on setting up system configurations in SAP Cloud ERP and understanding how to manage user navigation and interface personalization through the SAP Fiori Launchpad. It tests the consultant's ability to configure and align user experience with business roles.
Topic 3	• Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of ERP Implementation Project Manager and covers the fundamental aspects of implementing SAP Cloud ERP with a modern approach. It includes forming the right team, promoting agile thinking, and driving successful Fit-to-Standard workshops that align the project with business goals in a cloud environment.
Topic 4	• System Landscapes and Identity Access Management: This section of the exam measures skills of SAP Cloud ERP Consultant and involves understanding SAP's system landscape in the cloud, including tenants and environments. It also focuses on identity and access management, covering how user roles, permissions, and security are managed across the cloud ecosystem.
Topic 5	• Extensibility and Integration: This section of the exam measures skills of SAP Cloud ERP Consultant and deals with the capabilities of extending SAP applications to meet custom business requirements and integrating with other systems or services. The focus is on knowing when to extend standard functionality and how to ensure smooth system integration in a cloud context.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q10-Q15):

NEW QUESTION # 10
Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- A. All previous migration projects are in the "Finished" status
- B. You select the same migration method previously used for other objects
- C. Permission to migrate the data has been assigned
- D. Predecessor objects have been migrated

Answer: C,D

NEW QUESTION # 11
Where is the initial list of known integrations documented?

- A. In the Fit-to-Standard Workshops
- B. In the Business Driven Configuration Questionnaire
- C. In SAP Cloud ALM
- D. In the Digital Discovery Assessment

Answer: B

Explanation:
The initial list of known integrations is documented in the Business Driven Configuration Questionnaire (BDCQ). The BDCQ is a tool that helps you to capture the business requirements and scope of your SAP S
/4HANA Cloud Public Edition project. It contains a series of questions that cover different aspects of your business processes, such as organizational structure, master data, configuration settings, and integration scenarios. The BDCQ also provides guidance on the best practices and recommendations for your project12.
One of the sections in the BDCQ is the Integration section, where you can document the initial list of known integrations that are relevant for your project. The Integration section contains questions about the integration scenarios that you want to enable, such as cross-system process integration, data replication, data migration, and third-party integration. The Integration section also provides information on the available integration options, such as SAP Cloud Platform Integration, SAP API Business Hub, and SAP Cloud ALM13.
The initial list of known integrations is important for your project, as it helps you to identify the integration requirements, dependencies, and risks that need to be considered in the project planning and execution. The initial list of known integrations also

helps you to select the appropriate integration tools and methods, and to align the integration scope with the SAP S/4HANA Cloud Public Edition roadmap and release cycles13.
Therefore, the correct answer is A, as the initial list of known integrations is documented in the BDCQ. References = 1 Business Driven Configuration Questionnaire - SAP Help Portal 2 Business Driven Configuration Questionnaire - SAP Community 3 SAP S/4HANA Cloud Public Edition Integration - SAP Help Portal

NEW QUESTION # 12
What defines the organizational entities that are required in SAP Central Business Configuration?
Note:
There are 2 correct answers to this question

- A. The selected deployment target
- B. Added partner content
- C. The selected scope
- D. System consistency checks

Answer: A,C

Explanation:
The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.
These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S
/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S
/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 13
Which of the following analyses can you create from the Manage KPIs and Reports app? Note: There are 3 correct answers to this question.

- A. Multidimensional Reports
- B. Lumira Dashboards
- C. Review Booklets
- D. SAC Stories
- E. Object Views

Answer: A,C,D

Explanation:
The Manage KPIs and Reports app is a single platform for creating all analytical applications using KPIs, reports, multidimensional reports, and stories. You can create applications that can be launched directly from SAP Fiori launchpad. The app is integrated with SAP Analytics Cloud, which allows you to create and view stories. A story is a presentation-style document that uses charts, tables, and other visualizations to display data insights. A review booklet is a collection of stories that can be used to share information with stakeholders. A multidimensional report is a type of report that allows you to analyze data from multiple dimensions and measures. You can create and view multidimensional reports from the app. An object view is a type of report that displays data for a single object, such as a customer or a product. You cannot create or view object views from the app. A Lumira dashboard is a type of dashboard that uses SAP Lumira to create and display data visualizations. You cannot create or view Lumira dashboards from the app. References = Manage KPIs and Reports, Stories, Review Booklets, [Multidimensional Reports]

NEW QUESTION # 14
Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- A. Evaluate the L2 Business-Driven Configuration Questionnaire responses.
- B. Upload customer master data in the Starter system using migration templates.
- C. Review the integration requirements collected from the Digital Discovery Assessment.
- D. Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.

Answer: C,D

Explanation:
Before the first Fit-to-Standard workshop, the consultant should do the following activities:
* Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment. This is to ensure that the Starter system reflects the agreed scope of the project and does not include any unnecessary or out-of-scope items. The consultant can use the Scope Item Management app to deactivate scope items1.
* Review the integration requirements collected from the Digital Discovery Assessment. This is to understand the customer's integration needs and prepare for the integration topics that will be discussed in the Fit-to-Standard workshop. The consultant can use the Integration Solution Advisor tool to review the integration requirements and the recommended integration scenarios2.
The consultant should NOT do the following activities before the first Fit-to-Standard workshop:
* Upload customer master data in the Starter system using migration templates. This is not required before the first Fit-to-Standard workshop, as the customer master data is not relevant for the process validation. The consultant should upload the customer master data in the Quality system after the Fit-to- Standard workshop, using the SAP S/4HANA Migration Cockpit3.
* Evaluate the L2 Business-Driven Configuration Questionnaire responses. This is not required before the first Fit-to-Standard workshop, as the L2 Business-Driven Configuration Questionnaire is not available at this stage. The consultant should evaluate the L2 Business-Driven Configuration Questionnaire responses after the Fit-to-Standard workshop, using the SAP Activate Methodology.
References =
* 1: Scope Item Management App
* 2: Integration Solution Advisor Tool
* 3: SAP S/4HANA Migration Cockpit
