

# Valid C\_ACDET\_2506 Test Materials - Valid Exam C\_ACDET\_2506 Book

What's more, part of that Practice Torrent C\_ACDET\_2506 dumps now are free: <https://drive.google.com/open?id=1h2oShqf4huHuFkeWXR2x2rc1DvNp108D>

Many applicants do not fulfill their dream of becoming professionals because of using outdated exam preparation material. Failure in the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite exam leads them to anxiety. If this situation sounds familiar, do not waste time and get your hands on SAP C\_ACDET\_2506 for exam preparation.

In addition to the SAP C\_ACDET\_2506 PDF dumps, we also offer SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite practice exam software. You will find the same ambiance and atmosphere when you attempt the real SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite exam. It will make you practice nicely and productively as you will experience better handling of the SAP C\_ACDET\_2506 Questions when you take the actual SAP C\_ACDET\_2506 exam to grab the SAP C\_ACDET\_2506 certification.

## **Valid Exam C\_ACDET\_2506 Book, Pdf C\_ACDET\_2506 Format**

We can claim that prepared with our C\_ACDET\_2506 study materials for 20 to 30 hours, you can easily pass the C\_ACDET\_2506 exam and get your expected score. Also we offer free demos of our C\_ACDET\_2506 exam questions for you to check out the validity and precision of our C\_ACDET\_2506 Training Materials. Just come and have a try! You will be surprised to find the high accuracy of our C\_ACDET\_2506 training material. And as our high pass rate of C\_ACDET\_2506 practice braindump is 99% to 100%, you will pass the exam easily.

## **SAP C\_ACDET\_2506 Exam Syllabus Topics:**

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li> </ul>

## SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q27-Q32):

### NEW QUESTION # 27

You have defined a custom field to have a default value based on another field. You have verified that the defaulting happens correctly the first time. However, when the dependent field changes value, your custom field does not change. What scenarios could cause this? (Select 3 correct answers)

- A. The custom field has the property Lock Initial value enabled, which prohibits a field to be changed once it's set
- B. Your dependent field does not have the property Refresh screen on value change enabled**
- C. The parameter Application.Base.RecomputeValueOnFieldChange is not enabled**
- D. The defaulting Expression sets a value that violates the custom field Validity Condition
- E. Your custom field has the property Respect User Value enabled, and the user has manually entered another value into the field**

**Answer: B,C,E**

Explanation:

\* B: If the dependent field isn't configured to refresh the UI when its value changes (no "Refresh screen on value change" enabled), the defaulting logic won't retrigger.

\* C: The global parameter Application.Base.RecomputeValueOnFieldChange must be enabled so that dependent default expressions recalculate on field changes; otherwise, they won't update automatically.

\* E: The "Respect User Value" property, when enabled, means that if a user manually overrides the default, the system will not recalculate or overwrite the field even if dependencies change. Lock Initial Value (A) prevents edits after first default but doesn't affect recalculation, and violating validity (D) would trigger an error, not silently block updates.

### NEW QUESTION # 28

Which of the following languages is used to define defaults on fields within SAP Ariba?

- A. JavaScript
- B. ABAP
- C. Python
- D. Ariba expression language**

**Answer: D**

Explanation:

SAP Ariba uses its proprietary Ariba expression language, based on OGNL (Object-Graph Navigation Language), to define default value expressions on fields. This language supports logical conditions, comparisons, and public Java method calls to create dynamic defaulting logic. ABAP, Python, and JavaScript are not supported languages for field default expressions in SAP Ariba. This expression language provides a concise and powerful way to tailor defaults based on context.

**NEW QUESTION # 29**

Which of the following can be used to define relation types and establish a custom relationship? Note: There are 2 correct answers to this question.

- A. A custom Form Template such as vrealm1936.formDoc\_18697.Lessons Learned
- B. A custom Enumeration such as Contracts\_Contract Type
- C. A custom Flex Master Data Template such as vrealm1936fmd\_58984.Hospital
- D. A standard class such as ariiba.basic.core.CommodityCode

**Answer: A,C**

**NEW QUESTION # 30**

During which SAP Activate Methodology phase do you migrate the configuration to Production?

- A. Deploy
- B. Move
- C. Migrate
- D. Push

**Answer: A**

Explanation:

The Deploy phase is when final cutover activities take place, including migrating configurations and master data to production, running final system tests, and performing the go-live. The other options are not standard SAP Activate phases for Ariba.

**NEW QUESTION # 31**

During a Bluefield migration, you discover missing flex master data templates. What do you do?

- A. Use reporting workaround
- B. Defer to post-go-live
- C. Rebuild them manually in production
- D. Ignore them

**Answer: C**

Explanation:

In a Bluefield deployment scenario, SAP Ariba requires that all Flex Master Data (FMD) templates and their associated data be present in the Production environment before migrating related configuration elements. If you find missing FMD templates during migration, the recommended approach is to manually recreate the missing templates in Production and load the relevant data. This is essential to maintain integrity because many custom fields depend on these templates, and missing templates can cause migration failures or broken references. Deferring or ignoring the issue risks operational disruptions and data inconsistencies. Reporting workarounds do not address template dependencies and therefore are ineffective. This aligns with SAP's guidance on master data migration within Bluefield scenarios to ensure successful, error-free deployments.

**NEW QUESTION # 32**

.....

Far more effective than online courses free or other available exam materials from the other websites, our C\_ACDET\_2506 exam questions are the best choice for your time and money. As the content of our C\_ACDET\_2506 study materials has been prepared by the most professional and specialized experts. I can say that no one can know the C\_ACDET\_2506 learning quiz better than them

and they can teach you how to deal with all of the exam questions and answers skillfully.
