New NS0-165 Exam Question | NS0-165 Valid Practice Questions

We are living in a good society; everything is changing so fast with the development of technology. So an ambitious person must be able to realize his dreams if he is willing to make efforts. Winners always know the harder they work the luckier they are. If you purchase our study materials to prepare the NS0-165 exam, your passing rate will be much higher than others. Also, the operation of our study material is smooth and flexible and the system is stable and powerful. You can install the NS0-165 Exam Guide on your computers, mobile phone and other electronic devices. There are no restrictions to the number equipment you install. In short, it depends on your own choice. We sincerely hope that you can enjoy the good service of our products.

Network Appliance NetApp Data ONTAP Administrator Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which technology is used to encrypt iSCSI traffic end to end?

- A. NSE
- B. CHAP
- C. IPsec
- D. NVE

Answer: C

Explanation:

IPsec provides end-to-end encryption for iSCSI traffic at the network layer, securing data in transit between the host and the storage system.

NEW QUESTION # 25

Which two choices are used to configure a semi-synchronous SnapMirror relationship? (Choose two.)

- A. using option semi-sync in DOT 7.3 and higher
- B. throttle
- C. visibility interval
- D. outstanding=3s in DOT 7.2

Answer: A,D

NEW QUESTION # 26

A customer wants a storage solution with a zero RPO and near-zero RTO for all their NAS workloads. Which NetApp solution accomplishes this goal?

- A. SnapMirror active sync
- B. MetroCluster over IP
- C. SnapMirror SVM
- D. BlueXP disaster recovery

Answer: B

Explanation:

MetroCluster over IP provides synchronous replication at the storage level with automatic failover, delivering zero RPO and near-zero RTO for NAS workloads. It allows clients to continue accessing data transparently from the surviving site during a disaster.

NEW QUESTION # 27

A customer needs to implement a third-party ransomware protection solution to protect their NetApp ONTAP volumes. What would they use for screening file access between the external solution and ONTAP software?

- A. Vscan
- B. NDMP
- C. FPolicy
- D. ONTAPI

Answer: C

Explanation:

FPolicy provides file access screening by monitoring and intercepting file operations in ONTAP. It allows third-party ransomware protection solutions to receive file activity events and take action based on access patterns, enabling external threat detection and response.

NEW QUESTION # 28

If you were troubleshooting and wanted to look at SnapMirror log files, what is the path and directory to these files?

- A. root volume, /etc/snaplog/
- B. root volume, /etc/log/
- C. destination volume, /etc/log/
- D. ootvolume, /etc/log/snaplog/

Answer: B
