

CCSFP最新題庫資源 & CCSFP考試證照

P.S. PDFExamDumps在Google Drive上分享了免費的、最新的CCSFP考試題庫：https://drive.google.com/open?id=1RkFfWqylEw8q76lqS81_7DdEZjcEgxs5

經過相關的研究材料證明，通過HITRUST的CCSFP考試認證是非常困難的，不過不要害怕，我們PDFExamDumps擁有經驗豐富的IT專業人士的專家，經過多年艱苦的工作，我們PDFExamDumps已經編譯好最先進的HITRUST的CCSFP考試認證培訓資料，其中包括試題及答案，因此我們PDFExamDumps是你通過這次考試的最佳資源網站。不需要太多的努力，你將獲得很高的分數，你選擇PDFExamDumps HITRUST的CCSFP考試培訓資料，對你考試是非常有幫助的。

很多準備參加HITRUST CCSFP 認證考試的考生在網上也許看到了很多網站也線上提供有關HITRUST CCSFP 認證考試的資源。但是我們的PDFExamDumps是唯一一家由頂尖行業專家研究的參考材料研究出來的考試練習題和答案的網站。我們的資料能確保你第一次參加HITRUST CCSFP 認證考試就可以順利通過。

優秀的CCSFP最新題庫資源和資格考試中的領先供應商和快速下載 HITRUST Certified CSF Practitioner 2025 Exam

當你準備CCSFP考試的時候，盲目地學習與考試相關的知識是很不理想的學習方法。其實想要通過考試是有竅門的。如果你使用了好的工具，不僅可以節省很多的時間，還能得到輕鬆通過考試的保證。如果你想問什麼工具，那當然是PDFExamDumps的CCSFP考古題了。

最新的 CSF Practitioner CCSFP 免費考試真題 (Q116-Q121):

問題 #116

Corrective Action Plans (CAPs) can be viewed centrally across multiple assessment objects.

- A. True
- B. False

答案：A

解題說明：

HITRUST's MyCSF platform allows organizations to manage CAPs centrally. When a CAP is created in one assessment object, it can be tracked and viewed across other assessments. This capability gives organizations a consolidated view of open remediation items, progress, and deadlines. Centralized CAP management supports ongoing compliance by ensuring that unresolved issues are not siloed within individual assessments.

It also enables organizations to demonstrate to assessors and stakeholders that CAPs are actively managed across their environment. This central view provides efficiencies for entities undergoing multiple assessments simultaneously.

References: HITRUST MyCSF User Guide - "CAP Dashboard and Cross-Assessment Tracking"; CCSFP Practitioner Guide - "Managing CAPs Centrally."

問題 #117

It is possible to test only privacy-related requirements to obtain a HITRUST privacy certification.

- A. True
- B. False

答案: B

解題說明:

HITRUST does not issue certifications limited solely to privacy-related requirements. While privacy is a critical part of the CSF- reflected in domains such as Data Protection & Privacy- HITRUST certifications require coverage of all 19 domains. This is because security and privacy are interdependent: without robust security, privacy cannot be protected. An entity may emphasize privacy controls during scoping and reporting, but certification itself is always tied to a full CSF assessment. Privacy-related frameworks, such as GDPR or HIPAA Privacy Rule, can be added as regulatory factors, which introduce additional privacy- focused requirements. However, the output will still be a standard HITRUST validated report or certification covering the entire environment, not a "privacy-only certification." References: HITRUST Assurance Program - "Scope of Certification"; CCSFP Study Guide - "Privacy Within HITRUST CSF Assessments."

問題 #118

Control Reference scores are averaged to determine Domain scores.

- A. True
- B. False

答案: A

解題說明:

Scoring in HITRUST follows a roll-up model. Requirement Statements are scored at the most granular level. These scores are then averaged to determine the score of the Control Reference. Once all control references within a domain are scored, their averages are rolled up to calculate the Domain Score. Domain scores are critical because HITRUST requires each domain in an r2 assessment to achieve at least a 71 to qualify for certification. This hierarchical scoring ensures that weaknesses in individual controls impact the higher-level domain score, maintaining balance across domains. Without averaging, entities could potentially offset poor control performance in one area with excellence in another, which would distort the overall risk picture. References: HITRUST CSF Scoring Rubric - "Roll-Up of Scores"; CCSFP Practitioner Guide - "From Requirement Statements to Domain Scores."

問題 #119

How large would the sample size be for a manual control with a population of 56 unique items?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

答案: B

解題說明:

HITRUST provides sampling guidance in the CSF Assessment Methodology and scoring rubric for manual controls. Sample sizes are determined by the population of items and the control's frequency. For a population of 56 items, the expected sample size is 8, following HITRUST's defined sampling table. This approach is based on statistical sampling principles but simplified for consistent assessor use. The sample must be randomly selected and representative of the entire population to avoid bias. Larger populations require larger sample sizes, but at certain thresholds, the increase is incremental. For example, a population between 26-100 items requires a sample size of 8. This ensures sufficient testing coverage without requiring a full census. Therefore, the correct sample size for 56 items is 8.

問題 #120

Which AI models can be evaluated using the A1 Security Assessment?

- A. Generative
- B. Rule-Based
- C. Back Propagation
- D. Hodgkin-Huxley
- E. Predictive

答案: A,B,E

解題說明:

The A1 Security Assessment module evaluates the security, governance, and risk management of artificial intelligence models. HITRUST specifies coverage for widely used model types, including:

- * Predictive models, which forecast outcomes based on historical data (e.g., fraud detection, patient risk scoring).
- * Generative models, which create new data outputs (e.g., AI image or text generators).
- * Rule-based models, which use defined logic for decision-making.

The goal of the A1 assessment is to ensure that these AI models are developed, implemented, and monitored securely, with appropriate safeguards around data integrity, bias management, and model explainability.

Options like Hodgkin-Huxley (a neuroscience model) and Back Propagation (a training algorithm) are not types of AI models scoped by the A1 assessment. Instead, the A1 factor focuses on applied model categories used in operational environments.
