## Free PDF 2026 LEED-Green-Associate: LEED Green Associate Exam Accurate Valid Dumps

Different from other similar education platforms, the LEED-Green-Associate quiz guide will allocate materials for multi-plate distribution, rather than random accumulation without classification. The LEED-Green-Associate prepare torrent is absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the LEED-Green-Associate test material more suitable for users of various cultural levels. And the LEED-Green-Associate test material provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

## USGBC LEED Green Associate Exam Sample Questions (Q217-Q222):

NEW QUESTION # 217

Which of the following standards addresses guidance for sustainable construction in complying with building codes?

- A. ASHRAE 62.1
- **B. ASHRAE 189.1**
- C. ASHRAE 90.1
- D. ASHRAE 72

**Answer: B**

Explanation:

ASHRAE 189.1 is a standard that provides guidance for the design, construction, and operation of high-performance green buildings that comply with building codes and voluntary rating systems. The standard covers topics such as site sustainability, water efficiency, energy efficiency, indoor environmental quality, and the impact of materials and resources<sup>12</sup>. Reference: LEED v4 Green Associate Candidate Handbook<sup>1</sup>, ASHRAE's Standard 189.12

#### NEW QUESTION # 218

The Montreal Protocol banned the production of

- A. HCFCs
- B. freon
- C. ammonia
- **D. CFCs**

**Answer: D**

Explanation:

The Montreal Protocol is an international treaty that aims to protect the ozone layer by phasing out the production and consumption of ozone-depleting substances (ODS). ODS are chemicals that contain chlorine or bromine, which can destroy the ozone molecules in the stratosphere. CFCs, or chlorofluorocarbons, are a group of ODS that were widely used in refrigeration, air conditioning, aerosols, and solvents. The Montreal Protocol banned the production of CFCs in 2010<sup>12</sup>. Freon is a trade name for some CFCs and HCFCs, or hydrochlorofluorocarbons, which are also ODS but less harmful than CFCs. The Montreal Protocol also controls the production of HCFCs, which are being phased out gradually<sup>12</sup>. Ammonia is not an ODS and is not regulated by the Montreal Protocol<sup>1</sup>.

#### NEW QUESTION # 219

What rating system should a project use if 55% of the project's gross floor area is appropriate to certify under LEED BD+C and 45% is appropriate under LEED O+M?

- A. LEED O+M
- **B. Project team must decide which rating system is most applicable**
- C. LEED Green Associate must decide
- D. LEED BD+C

**Answer: B**

Explanation:

LEED allows flexibility:

"If a project has overlapping eligibility, the project team must choose the rating system that best aligns with the majority of the project scope." The team determines applicability based on scope and use.

#### NEW QUESTION # 220

What green building objective does utilizing high efficiency water fixtures achieve?

- A. Providing adequate watering for indigenous plants
- **B. Preventing stormwater pollution**

- C. Conserving the Earth's potable water supply
- D. Utilizing more unused graywater for flushing water closets

**Answer: C**

Explanation:

Conserving the Earth's potable water supply is a green building objective that can be achieved by utilizing high efficiency water fixtures. High efficiency water fixtures reduce the amount of water used for indoor plumbing, which reduces the demand on municipal water supply and wastewater systems. This also saves energy and money for the building owners and occupants. The LEED Green Associate Candidate Handbook states that one of the intents of the Water Efficiency category is to "reduce potable water use within buildings and for landscape irrigation" [1, p. 13]. References: LEED Green Associate Candidate Handbook, [Water Efficiency | U.S. Green Building Council]

#### **NEW QUESTION # 221**

Good site design benefits a project in which of the following ways?

- A. Provides access to public transportation and employment opportunities
- B. Makes occupants comfortable by providing green spaces
- C. Supports access to diverse land uses, sustainable food and services
- D. Protects endangered species and maximizes development of previously undeveloped areas

**Answer: B**

Explanation:

Good site design benefits a project in which of the following ways: makes occupants comfortable by providing green spaces. Green spaces are areas of vegetation that improve the quality of life for building occupants and visitors by providing natural views, fresh air, shade, noise reduction, and recreational opportunities. They also reduce heat island effect, improve stormwater management, and sequester carbon dioxide. The LEED Green Associate Candidate Handbook states that one of the intents of the Sustainable Sites category is to "enhance occupant comfort by providing green spaces" [1, p. 13]. References: [LEED Green Associate Candidate Handbook], [Green Spaces | U.S. Department of Energy]
