NEW QUESTION # 54

Which Cisco Meraki best practice method preserves complete historical network event logs?

- **A. Configuring a syslog server for the network.**
- B. Configuring Dashboard logging to preserve only certain event types.
- C. Configuring the preserved event number to maximize logging.
- D. Configuring the preserved event period to unlimited.

Answer: A

Explanation:

Explanation

Configuring a syslog server for the network is the Cisco Meraki best practice method to preserve complete historical network event logs. A syslog server can be configured to store messages for reporting purposes from MX Security Appliances, MR Access Points, and MS switches¹. The syslog server can collect various types of events, such as VPN connectivity, uplink connectivity, DHCP leases, firewall rules, IDS alerts, and security events². The syslog server can also help with troubleshooting and monitoring the network performance and security.

NEW QUESTION # 55

.....

Solutions is one of the top platforms that has been helping Cisco 500-220 exam candidates for many years. Over this long time period countless candidates have passed their dream 500-220 exam.
