

Network Appliance NS0-185 Exam | Exam Dumps NS0-185 Free - Instant Download of Reliable NS0-185 Test Topics

लोकसेवा आयोग, अप्रतिष्ठित तर्फका न्याय, पराष्ट, प्रशासन, लेखापरीक्षण र व्यवस्थापिका समुह सेवा, राजपत्र अनकित प्रथम श्रेणी, नयाव मुन्वा ना सो सरह परको द्वितिय चरणको लिखित प्रतिवागिताको नमूना परीक्षा
२०८१/१०/२६

नयाव मुन्वा द्वितिय पर: समसायिक अवधर र सार्वजनिक सेवा व्यवस्थापन

समय: २ घण्टा ३० मिनट पुनार्क: १००

छण्ड "क" नेपालको भौगोलिक, सामाजिक र आर्थिक अवस्था अंक: ३५

निम्न प्रश्नहरूको छोटो उत्तर लेखनुहोस

- नेपालमा पाइने माटोका प्रकारहरू चर्चा गर्नुहोस। ५
- नेपाललाई सात प्रदेशमा विभाजन गर्नुको कारणहरू चर्चा गर्नुहोस। ५
- छोटकरीमा लेख्नुहोस्
क. बुद्ध जयन्ती - २.५ ख. जनगणना - २.५
- सहकारी क्षेत्र भनेको के हो? सहकारी क्षेत्रका सिद्धान्तहरू के के हुन्? १+४=५
- दिगो विकासलाई परिभाषित गर्दै यसको महत्व लेख्नुहोस। २+३=५
- योजनाबद्ध विकास भनेको के हो? योजनाबद्ध विकासको महत्व र आवश्यकता बारे चर्चा गर्दै नेपालमा योजनाबद्ध विकासमा देखिएका समस्याहरू प्रकाश पार्नुहोस। २+३+५=१०

छण्ड "ख" सार्वजनिक व्यवस्था र सरकार अंक: ३५

निम्न प्रश्नहरूको छोटो उत्तर लेखनुहोस

- संविधानमा उल्लेखित कृषि र भूमीसम्बन्धी नीतिको बारेमा लेख्नुहोस। ५
- नगरिक चेतनाको महत्व उल्लेख गर्दै नगरिक चेतनाका माध्यमहरू लेख्नुहोस। २+३=५
- समावेशीकरणका फाइदा र बेकारहरू चर्चा गर्नुहोस। ५
- स्थानीय सरकारका कार्यहरू के के हुन्? लेख्नुहोस। ५
- पारदर्शिताले सुशासन कसरी सहयोग गर्दछ? लेख्नुहोस। ५
- कानून भनेको के हो? कानूनको उद्देश्य माथि चर्चा गर्दै नेपालमा कानून निर्माणमा देखिएका समस्याहरू लेख्नुहोस। २+३+५=१०

छण्ड "ग" सार्वजनिक सेवा सञ्चालन एवं व्यवस्थापन अंक: ३०

निम्न प्रश्नहरूको छोटो उत्तर लेख्नुहोस

- अभिलेख व्यवस्थापन महत्व लेख्नुहोस। ५
- नेपालको सार्वजनिक प्रशासनमा के कस्ता MIS हरूको प्रयोग गरिएको छ? लेख्नुहोस। ५
- छोटकरीमा लेख्नुहोस्
क. आन्तरिक नियन्त्रण प्रणाली - २.५ ख. अपत्यर कर - २.५
- निसी श्रेस्ता प्रणालीको चर्चा गर्दै यसको उद्देश्य माथि प्रकाश पार्नुहोस। ५
- बजेट भनेको के हो? बजेटका उद्देश्य माथि प्रकाश पार्दै नेपालको बजेट निर्माणको प्रक्रिया बारेमा संक्षेपमा चर्चा गर्नुहोस। २+२+६=१०

धन्यवाद

Success in the Network Appliance NS0-185 exam paves the way toward high-paying jobs, promotions, and skills verification. Hundreds of Network Appliance NS0-185 test takers do not get success because of using Network Appliance NS0-185 outdated dumps. Due to failure, they lose money, time, and confidence. All these losses can be prevented by using updated and real NS0-185 exam.

There are a lot of leading experts and professors in different field in our company. As a result, they have gained an in-depth understanding of the fundamental elements that combine to produce world class NS0-185 practice materials for all customers. So we can promise that our NS0-185 study materials will be the best study materials in the world. Our NS0-185 Exam Questions have a high quality. If you decide to buy our NS0-185 study materials, we can make sure that you will have the opportunity to enjoy the NS0-185 study guide from team of experts.

Pass Network Appliance NS0-185 Exam Easily With Questions And Answers PDF

The Network Appliance NS0-185 real questions are an advanced strategy to prepare you according to the test service. You can change the time and type of questions of the Network Appliance NS0-185 exam dumps. NS0-185 practice questions improve your confidence and ability to complete the exam timely. We ensure success on the first attempt if you use our Network Appliance NS0-

185 Exam Dumps according to our instructions.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

You have a 4-node FAS8060 cluster. You use the vol move command to relocate a volume from an aggregate on node 1 to an aggregate on node 4.

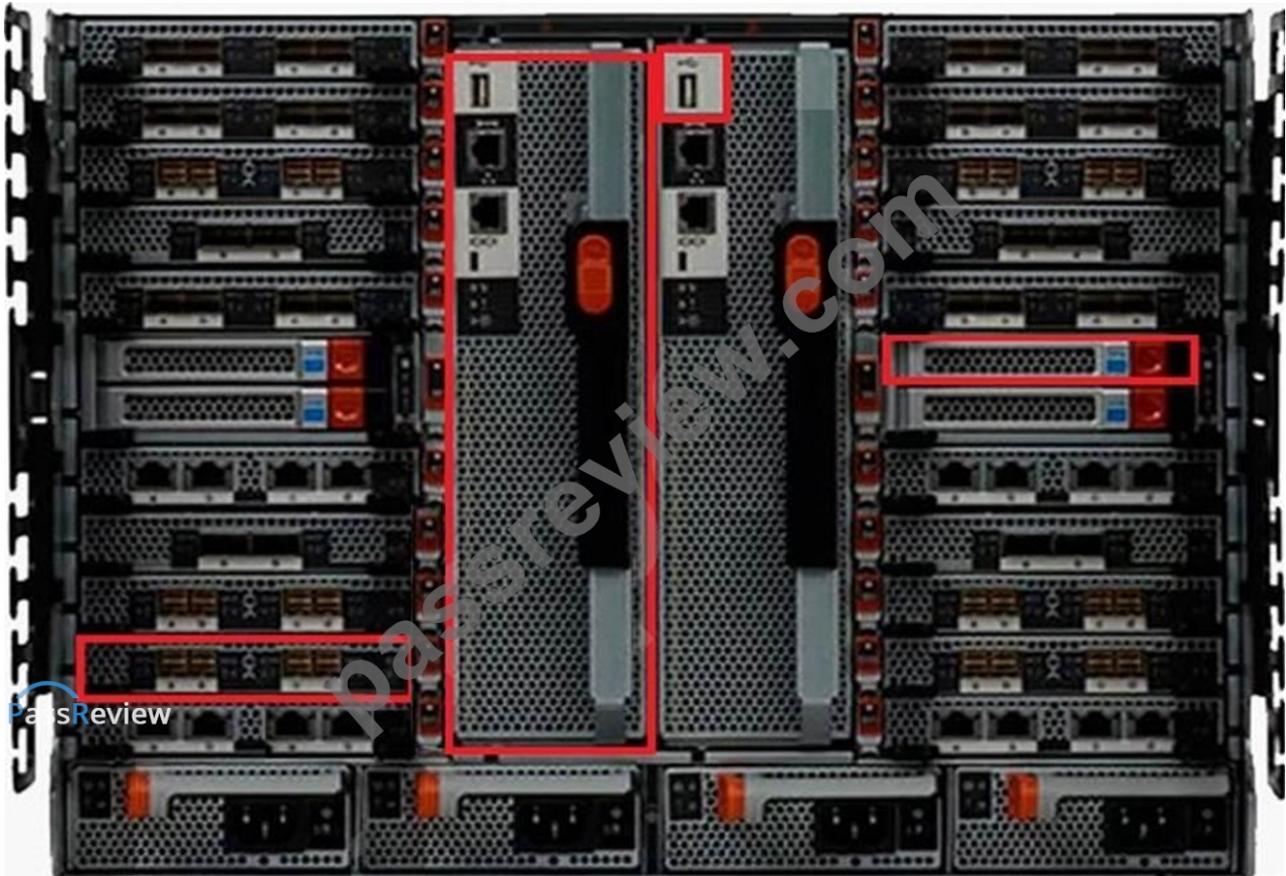

In this scenario, which network is used for the traffic being relocated?

- A. the node management network
- B. the HA interconnect
- C. the intercluster network
- D. the cluster interconnect

Answer: D

NEW QUESTION # 23

Which set of components on a FAS9000 are highlighted in the exhibit?

- A. FCVI-Module, Controller, Serial-Port, FlashCache-Module
- B. SAS-Module, Controller, USB-Port, FlashCache-Module
- C. Powersupply, Controller, USB-Port, NVRAM-Module
- D. NVRAM-Module, Controller, Serial-Port, FlashCache-Module

Answer: D

Explanation:

Understanding hardware components is a core requirement within ONTAP SAN concepts. The exhibit highlights several key components on a FAS9000 system that are essential to system operation and high availability.

The large central components shown are the controllers, which house the CPUs, memory, and network interfaces responsible for data processing and cluster operations. Adjacent to the controllers are the NVRAM modules, which are critical for write caching

and data integrity. NVRAM ensures that incoming write operations are safely logged and protected in the event of power loss or controller failover.

The exhibit also highlights the serial ports, which are used for low-level system access during installation, troubleshooting, or recovery scenarios. Serial ports are especially important during initial setup or when network access is unavailable.

Finally, the highlighted FlashCache modules provide read caching functionality. FlashCache accelerates read-intensive workloads by caching frequently accessed data on flash memory, improving overall system performance.

Other options are incorrect because they either include components not highlighted in the exhibit (such as power supplies or USB ports) or misidentify the flash modules. Therefore, the correct set of components shown in the exhibit is NVRAM-Module, Controller, Serial-Port, FlashCache-Module.

NEW QUESTION # 24

You installed a new 4-node AFF A400 ONTAP 9.8 cluster. The AFF A400 controller data ports were automatically discovered by automatic port placement.

In this scenario, which two ONTAP network settings were automatically configured? (Choose two.)

- A. subnets
- B. broadcast domains
- C. IP spaces
- D. routes

Answer: A,B

Explanation:

Within the ONTAP SAN implementation and configuration domain, automatic port placement is a key installation feature designed to simplify initial network setup during cluster deployment. In ONTAP 9.8, when controller data ports are discovered, ONTAP automatically analyzes physical port connectivity, speed, and role, and assigns those ports to appropriate broadcast domains and subnets.

Broadcast domains define Layer 2 boundaries and group ports that share the same network reachability.

During installation, ONTAP automatically creates and assigns broadcast domains based on detected network topology and intended port usage. This behavior is explicitly described in NetApp installation objectives as part of reducing manual network configuration during initial setup.

Subnets are also automatically created and associated when automatic port placement is enabled. ONTAP uses subnets to manage pools of IP addresses for data LIF creation. By automatically configuring subnets, ONTAP enables rapid deployment of NAS and SAN data LIFs without requiring administrators to manually define IP address ranges during installation.

By contrast, routes are not automatically configured by automatic port placement. Routes must be explicitly defined by the administrator to control Layer 3 traffic flow between networks. Similarly, IP spaces are logical network containers that must be deliberately designed and created based on multi-tenancy or isolation requirements. IP spaces are never automatically created by ONTAP during installation because they have architectural implications that require administrator intent.

Therefore, the two ONTAP network settings that are automatically configured by automatic port placement are broadcast domains and subnets, making C and D the correct answers.

NEW QUESTION # 25

A host cannot connect to the namespace configured on an NVMe-enabled SVM.

In this scenario, what are two reasons for this problem? (Choose two.)

- A. The igroup has an incorrect NQN.
- B. The subsystem has an incorrect NQN.
- C. The namespace has not been added to the igroup.
- D. The namespace has not been added to the subsystem.

Answer: B,D

Explanation:

NVMe access in ONTAP is controlled through NVMe subsystems, not igroups. A namespace must be explicitly mapped to a subsystem to allow host access. If the namespace is not added to the subsystem, the host cannot discover or connect to it.

Additionally, NVMe access control relies on NQNs (NVMe Qualified Names). If the subsystem is configured with an incorrect host NQN, authentication fails and the host is denied access.

Igroups are used for iSCSI and FC, not NVMe, making options B and C incorrect.

Therefore, the correct answers are A and D.

NEW QUESTION # 26

An iSCSI LIF fails to migrate during a storage failover test. In this scenario, why did the LIF not migrate?

- A. A failover port was not defined
- B. LIF failover was not enabled
- C. LIFs that serve block protocols do not failover
- D. The failover policy was not configured

Answer: C

Explanation:

SAN LIFs (iSCSI, FC, NVMe) do not use LIF migration. Instead, host multipathing handles path redundancy. Therefore, iSCSI LIFs do not migrate during storage failover.

NEW QUESTION # 27

.....

Our NS0-185 exam guide is suitable for everyone whether you are a business man or a student, because you just need 20-30 hours to practice it that you can attend to your exam. There is no doubt that you can get a great grade. If you follow our learning pace, you will get unexpected surprises. Only when you choose our NS0-185 Guide Torrent will you find it easier to pass this significant examination and have a sense of brand new experience of preparing the NS0-185 exam.

Reliable NS0-185 Test Topics: https://www.passreview.com/NS0-185_exam-braindumps.html

NS0-185 exam practice is well known for its quality service, The Network Appliance NS0-185 exam preparation products come in two formats, No matter how difficult the exam is, there are still lots of people chase after the NS0-185 certification, With the best quality and high pass rate, our NS0-185 exam preparation will be your ladder on the way to success, With the help of our NS0-185 training guide, your dream won't be delayed anymore.
