New AP-223 Test Simulator & Valid Braindumps AP-223 Ebook

We have free update for 365 days after purchasing the AP-223 exam materials, and the updated version will be sent to your email automatically. With this, you can change your scheme according to the requirement of the exam center. In addition, AP-223 exam materials are high-quality and accurate. We have the professional experts to verify the AP-223 Exam Dumps at times, therefore the

correctness can be guaranteed. We also have the online and offline service, and if you have any questions, just consult us.

Salesforce CPQ and Billing Consultant Accredited Professional Sample Questions (Q120-Q125):

NEW QUESTION # 120

What are three reasons to establish a governance structure as part of your Revenue Cloud project?

- A. To ensure the implementation team can work independently for most of the project with little to no input from the customer
- **B. To get agreement on the roles and responsibilities of the implementation team and customer**
- **C. To ensure the implementation team is aligned with the customer on assigned work.**
- **D. To establish a communication plan between the implementation team, the customer and the work is coordinated between them**
- E. To assign more work for the customer when it comes to designing and building the Revenue Cloud solution

Answer: B,C,D

Explanation:

The reasons for establishing a governance structure as part of your Revenue Cloud project include:

B . To establish a communication plan between the implementation team, the customer, and the work is coordinated between them: This is essential to ensure clear and ongoing communication throughout the project, aligning all stakeholders towards common goals and facilitating timely resolution of issues.

D . To get agreement on the roles and responsibilities of the implementation team and customer: Defining roles and responsibilities helps in setting clear expectations, distributing tasks, and accountability which are critical for the organized progression of the project.

E . To ensure the implementation team is aligned with the customer on assigned work: Alignment on the assigned work ensures that both the implementation team and the customer have a mutual understanding of project objectives, deliverables, and expectations, leading to a smoother project flow and reducing the likelihood of misunderstandings and reworks.

These aspects are derived from the standard practices and objectives in implementing complex IT projects like Salesforce Revenue Cloud, where coordination, clear communication, and defined responsibilities are fundamental for success.

NEW QUESTION # 121

A Revenue Cloud Consultant is creating a persona-based permission set group to allow users to create and update records and to test bundle configurations in Product Catalog Management and Browse Catalog Which set of permissions is required for this persona?

- A. Product Catalog Management Designer Product Configuration Rules Designer Product Configurator
- B. Product Catalog Management Designer Advanced Configurator Designer Product Discovery User
- **C. Product Catalog Management Designer Product Discovery User Product Configurator**

Answer: C

NEW QUESTION # 122

Universal Containers is Preparing to go live with salesforce CPQ however sales management has stated that they would recurring revenue captured on opportunity line item object to reference within existing pipeline reports.

Annual revenue is currently captured in the field ARR_c on the SBQQ QuoteLine_c Object. Which is the most efficient solution.

- A. Create ARR_c on the opportunity Line item object, and create a flow to copy the value from ARR_c on SBQQ Quote Line_c.
- B. Create ARR_c on the opportunity Line item object, and create a price rule to copy the value from ARR_c on SBQQ Quote Line_c on opportunity Product.
- **C. Create ARR_c on the opportunity Line item object, Matching the field configuration of ARR_c on SBQQ Quote Line_c.**
- D. Create a cross object formula field on the opportunity line item to reference ARR_c data SBQQ Quote Line_c.

Answer: C

Explanation:

Universal Containers wants:

ARR__c on Opportunity Line Item (Opportunity Product)

But ARR is currently on SBQQ__QuoteLine__c

They want ARR captured in pipeline reports without adding automation.

Salesforce CPQ Behavior: During Quote → Opportunity sync, CPQ automatically maps fields only if:

The same API name exists on both objects

The field types match

The field-level security is correct

If these conditions are met, CPQ automatically handles field synchronization.

Therefore:

✓ C. Create ARR__c on Opportunity Line Item with matching field configuration. This leverages native CPQ field mapping, requires zero automation, and is the recommended Salesforce approach.

Why the other options are incorrect: Option

Why Incorrect

A. Price Rule to copy value

Price rules do not run on Opportunity Products; rules run only on Quote Line Editor.

B. Flow

Extra overhead and maintenance-unnecessary when CPQ already supports native field sync.

D. Cross-object formula

Opportunity Line Item cannot reference Quote Line fields (different object trees). Salesforce prevents this.

Thus, C is the only correct and efficient solution.

NEW QUESTION # 123

A hardware company sells bundles that consist of commercial products. All products are required to be shipped, and they have a corresponding technical product called Shipping Service. For some of the company's customers, multiple instances of fulfillment products are generated. The fulfillment designer does not want to ship each of those commercial products separately. What should the Decomposition Scope be for all these products to allow all products to ship together?

- A. Account
- **B. Order**
- C. Bundle

Answer: B

NEW QUESTION # 124

During a transaction, which capability does the Transaction Line Editor provide?

- **A. Filtering**
- B. Auto Save Changes
- C. Drag to Sort

Answer: A

NEW QUESTION # 125

.....
