2026 Newest 100% Free 300-740–100% Free Dumps Discount | 300-740 Test Simulator

If you fail in 300-740 exam test with BraindumpsVCE 300-740 exam dumps, we promise to give you full refund! You only need to scan your 300-740 test score report to us together with your receipt ID. After our confirmation, we will give you full refund in time. Or you can choose to charge another exam Q&AS instead of 300-740 Exam Dumps. Useful Cisco certifications exam dumps are assured with us. If our 300-740 exam dumps can't help you pass 300-740 exam, details will be sent before we send the exam to you. We don't waste our customers' time and money! Trusting BraindumpsVCE is your best choice!

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	• Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.
Topic 2	• Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.
Topic 3	• Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.
Topic 4	• Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.
Topic 5	• User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 6	• Application and Data Security This section of the exam measures skills of Cloud Security Analysts and explores how to defend applications and data from cyber threats. It introduces the MITRE ATT&CK framework, explains cloud attack patterns, and discusses mitigation strategies. Additionally, it covers web application firewall functions, lateral movement prevention, microsegmentation, and creating policies for secure application connectivity in multicloud environments.

300-740 Test Simulator & Latest Real 300-740 Exam

Candidates who are preparing for the Cisco exam suffer greatly in their search for preparation material. You won't need anything else if you prepare for the exam with our Cisco 300-740 Exam Questions. Our experts have prepared Designing and Implementing Secure Cloud Access for Users and Endpoints with dumps questions that will eliminate your chances of failing the exam.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q65-Q70):

NEW QUESTION # 65
How does Cisco XDR perform threat prioritization by using its visibility across multiple platforms?

- A. By correlating detection risk and asset value at risk
- B. By using a fixed priority system for all platforms
- C. By prioritizing threats based on their frequency across platforms
- D. By assigning priority based on the detection platform

Answer: A

Explanation:
Cisco Extended Detection and Response (XDR) leverages telemetry from Cisco Secure Endpoint, Secure Email, Secure Network

Analytics, and other sources to correlate threat detections with contextual data, such as asset value and business impact. This allows Cisco XDR to prioritize threats not only by the risk of the detection but also by the importance of the affected asset-essentially assessing the risk to business. This dynamic and context-aware prioritization method enables security teams to address the most impactful threats first.

Threat Response, Pages 108-111.

NEW QUESTION # 66
Microsegmentation as a security policy is effective for:

- A. Centralizing all workloads
- B. Isolating workloads from each other to reduce the attack surface
- C. Simplifying access controls
- D. Decreasing the overall security posture

Answer: B

NEW QUESTION # 67
Refer to the exhibit. An engineer must implement a remote access VPN solution that provides user and device verification. The company uses Active Directory for user authentication and ID certificates for device identity. Users are currently able to connect using only a valid username and password, even if their computer is missing the required certificate.
Which command from the Cisco ASA tunnel-group completes the requirement of verifying device identity in addition to user identity?

- A. webvpn authorize-device
- B. authentication aaa certificate
- C. authentication mfa
- D. ldap-attribute-map PolicyAllow

Answer: B

Explanation:
To enforce both user-based and device-based authentication on Cisco ASA, the tunnel group must include the command: authentication aaa certificate. This configuration requires that both a valid username/password (authenticated via AAA, such as Active Directory) and a trusted certificate (device identity) are present before allowing VPN access. Without this directive, only username/password credentials are validated, which leads to the scenario described in the question.

User and Device Security, Pages 40-44.

NEW QUESTION # 68
Network security in the Cisco Security Reference Architecture is divided into which two areas?

- A. Physical and virtual
- B. Wired and wireless
- C. Cloud-based and on-premises
- D. Internal and external

Answer: C

NEW QUESTION # 69
Security audit reports are crucial for:

- A. Identifying compliance gaps and areas lacking sufficient security controls
- B. Promoting a false sense of security
- C. Eliminating the need for security policies
- D. Reducing the overall security budget

Answer: A

NEW QUESTION # 70
......

We now live in a world which needs the talents who can combine the practical abilities and knowledge to apply their knowledge into the practical working conditions. To prove that you are that kind of talents you must boost some authorized and useful certificate and the test 300-740 certificate is one kind of these certificate. Most important of all, as long as we have compiled a new version of the 300-740 Exam Questions, we will send the latest version of our 300-740 exam questions to our customers for free during the whole year after purchasing. Our product can improve your stocks of knowledge and your abilities in some area and help you gain the success in your career.
