We never circumvent the difficulties of our AZ-140 study materials happened on the road as long as there is bright at the end, and it is the satisfactory results you want. And we have helped so many of our customers achieve their certifications according to our AZ-140 learning guide.

## Is Microsoft AZ-140 certification worth it?

Microsoft AZ-140 exam is a hot certification today. Based on my own experience, I have taken different kinds of testing exams before, Microsoft AZ-140 exam was the easiest one! I am very lucky that I discovered **Microsoft AZ-140 Dumps** practice exams. These practice exams helped me understand Microsoft AZ-140 objectives. They gave me an insight into the real testing environment and the structure of the exam. Understand the Microsoft AZ-140 exam structure is the key to passing this exam. I used the PrepAwayPDF study guide and found it very simple and easy to understand. The study material was well-structured and organized with precise information. It gave me a great idea about how to take this exam and what will be expected from me. Our practice exams were excellent enough that they completely covered all the topics in this study guide. Both of them are highly recommended for everyone who wants to pass this exam!

## Advantages of earning Microsoft AZ-140 certification

Microsoft AZ-140 certification is the first step to getting your career started in the IT field. This test verifies that you have the skills necessary to configure and operate Microsoft Azure Virtual Desktop. To get this certification, you need only to pass one exam. The exam content itself covers a variety of topics, such as how to perform basic Azure administration tasks, how to set up and manage virtual machines, and how to manage identities in Azure. The Microsoft AZ-140 is designed for those who are new to the technology world. **Microsoft AZ-140 Dumps** can help you to get a great career in a very short time. Since it's a Level One certification, you'll be able to demonstrate your knowledge and get your foot in the door. After passing this exam, you'll be eligible for the MCSA: Cloud Platform certification, which allows you to take on more complex challenges in a cloud environment. You can also pursue additional certifications in areas such as security, networking, and development. Reliable networks query solution guides attach question pools. Profile images connectivity timeout situation save months.

## Knowledge Microsoft AZ-140 Points | AZ-140 New Guide Files

Configuring and Operating Microsoft Azure Virtual Desktop AZ-140 practice test not only gives you the opportunity to practice with real exam questions but also provides you with a self-assessment report highlighting your performance in an attempt. PrepAwayPDF keeps an eye on changes in the Microsoft AZ-140 exam syllabus and updates Configuring and Operating Microsoft Azure Virtual Desktop AZ-140 Exam Dumps accordingly to make sure they are relevant to the latest exam topics. After making the payment for Configuring and Operating Microsoft Azure Virtual Desktop AZ-140 dumps questions you'll be able to get free updates for up to 365 days.

One of the key benefits of earning the Microsoft AZ-140 Certification is that it demonstrates your proficiency in deploying and managing virtual desktop environments using Azure services. This is particularly valuable in today's rapidly evolving business landscape, where remote work and collaboration have become increasingly important. With this certification, you can demonstrate to employers that you have the skills and knowledge needed to successfully deploy and manage virtual desktops in a secure, efficient, and scalable manner.

## Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q151-Q156):

### NEW QUESTION # 151

You have an Azure Virtual Desktop deployment that contains an Azure compute gallery. The Azure compute gallery contains an image definition named Definitions Definition1 contains the following image versions:

- \* 1.0.0
- \* 1.1.0
- \* 1.2.0

You need to ensure that when a virtual machine is created from the Azure compute gallery, the 1.1.0 image version is used by default.

What should you do?

- **A. Select Exclude from latest for image version 1.2.0. Most Voted**
- B. Apply a tag named default to image version 1.1.0.
- C. Apply a lock to image version 1.1.0.
- D. Select Exclude from latest for image version 1.0.0.

**Answer: A**

Explanation:

Exclude from latest. You can keep a version from being used as the latest image version. <https://learn.microsoft.com/en-us/azure/virtual-machines/shared-image-galleries?tabs=azure-cli>

### NEW QUESTION # 152

Your network contains an on-premises Active Directory domain named contoso.com that syncs to an Azure Active Directory (Azure AD) tenant.

You have an Azure subscription that contains an Azure Virtual Desktop host pool.

You create an Azure Storage account named storage1.

You need to use FSLogix profile containers in storage1 to store user profiles for a group named Group1. The solution must use the principle of least privilege.

What should you include in the solution? To answer, select the appropriate options in the answer area.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/storage/files/storage-files-identity-ad-ds-enable>

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-file-share>

**NEW QUESTION # 153**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Windows Virtual Desktop host pool that contains five session hosts. The session hosts run Windows 10 Enterprise multi-session.

You need to prevent users from accessing the internet from Windows Virtual Desktop sessions. The session hosts must be allowed to access all the required Microsoft services.

Solution: You modify the IP configuration of each session host.

Does that meet the goal?

- A. No
- B. Yes

**Answer: A**

Explanation:

Explanation/Reference:

Implement a Windows Virtual Desktop Infrastructure

Testlet 2

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a law firm that has a main office in Montreal and branch offices in Paris and Seattle. The Seattle branch office opened recently.

Contoso has an Azure subscription and uses Microsoft 365.

Existing Infrastructure. Active Directory

The network contains an on-premises Active Directory domain named contoso.com and an Azure Active Directory (Azure AD) tenant. One of the domain controllers runs as an Azure virtual machine and connects to a virtual network named VNET1. All internal name resolution is provided by DNS server that run on the domain controllers.

The on-premises Active Directory domain contains the organizational units (OUs) shown in the following table.

The on-premises Active Directory domain contains the users shown in the following table.

The Azure AD tenant contains the cloud-only users shown in the following table.

#### Existing Infrastructure. Network Infrastructure

All the Azure virtual networks are peered. The on-premises network connects to the virtual networks.

All servers run Windows Server 2019. All laptops and desktop computers run Windows 10 Enterprise.

Since users often work on confidential documents, all the users use their computer as a client for connecting to Remote Desktop Services (RDS).

In the West US Azure region, you have the storage accounts shown in the following table.

#### Existing Infrastructure. Remote Desktop Infrastructure

Contoso has a Remote Desktop infrastructure shown in the following table.

#### Requirements. Planned Changes

Contoso plans to implement the following changes:

\* Implement FSLogix profile containers for the Paris offices.

\* Deploy a Windows Virtual Desktop host pool named Pool4.

\* Migrate the RDS deployment in the Seattle office to Windows Virtual Desktop in the West US Azure region.

#### Requirements. Pool4 Configuration

Pool4 will have the following settings:

\* Host pool type: Pooled

\* Max session limit: 7

\* Load balancing algorithm: Depth-first

\* Images: Windows 10 Enterprise multi-session

\* Virtual machine size: Standard D2s v3

\* Name prefix: Pool4

\* Number of VMs: 5

\* Virtual network: VNET4

#### Requirements. Technical Requirements

Contoso identifies the following technical requirements:

\* Before migrating the RDS deployment in the Seattle office, obtain the recommended deployment configuration based on the current RDS utilization.

\* For the Windows Virtual Desktop deployment in the Montreal office, disable audio output in the device redirection settings.

\* For the Windows Virtual Desktop deployment in the Seattle office, store the FSLogix profile containers in Azure Storage.

\* Enable Operator2 to modify the RDP Properties of the Windows Virtual Desktop deployment in the Montreal office.

\* From a server named Server1, convert the user profile clicks to the FSLogix profile containers.

\* Ensure that the Pool1 virtual machines only run during business hours.

\* Use the principle of least privilege.

### NEW QUESTION # 154

You need to create a Conditional Access policy to meet the security requirements.

How should you configure the policy? To answer, select the appropriate options in the answer area.

#### Answer:

Explanation:

### NEW QUESTION # 155

You have an Azure Virtual Desktop host pool. The pool contains session hosts that run Windows 10 Enterprise multi-session.

You connect to a Remote Desktop session on Pool1 and discover an issue with the frequency of screen updates.

You need to identify whether the issue related to insufficient server, network, or client resources. The solution must minimize how long it takes to identify the resource type.

What should you do?

- A. From Azure Cloud Shell, run the Get-AzOperationalInsightsWorkspaceUsage cmdlet and specify the DefaultProfile parameter.
- B. From Azure Cloud Shell, run the Get-AzWvdUserSession cmdlet and specify the UserSessionId parameter.
- C. From within the current session, use Performance Monitor to display the values of all the RemoteFX Graphics(\*)\Frames Skipped/Second counters.
- D. From within the current session, use the Azure Virtual Desktop Experience Estimator.

#### Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/remotefx-graphics-performance-counters>
