

CDCP勉強時間 & CDCP参考資料

BONUS!!! CertJuken CDCPダンプの一部を無料でダウンロード: https://drive.google.com/open?id=1p9-NfXgKOoPmknI4IYlhgWxS_ZSLD7yj

あなたは彼と同じような仕事の能力を持っていると思うかもしれませんが、あなたも一生懸命働いているので、誰かが突然昇進していることに気付きましたか？（CDCP信頼できる試験ダンプ）有効なEXIN認定が鍵になるかもしれません。あなたの会社がこの大企業プロジェクトに応募する場合、有用な認定はプロジェクトマネージャーの地位にとって大きな利点になります。CDCP信頼できる試験ダンプは、試験に合格し、貴重な変更を取得するのに役立ちます。heしないでください。時は金なり。当社のCDCP信頼できる試験ダンプは、近年、数千人の受験者が試験をクリアするのに役立ちました。

EXIN CDCP 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
トピック 2	<ul style="list-style-type: none">Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.
トピック 3	<ul style="list-style-type: none">Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
トピック 4	<ul style="list-style-type: none">Water Supply: This topic is all about water supply techniques and application areas.
トピック 5	<ul style="list-style-type: none">Fire SafetyProtection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
トピック 6	<ul style="list-style-type: none">Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
トピック 7	<ul style="list-style-type: none">Designing a Scalable Network Infrastructure: It covers ANSITIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.

CDCP参考資料、CDCP試験勉強攻略

まず、EXINのCDCP試験で100%の合格率を保証できます。CDCP練習クイズには、タイミング機能を備えた模擬試験システムが装備されているため、学習結果をいつでも確認し、欠陥のチェックを続け、体力を向上させることができます。第二に、CDCPラーニングガイドの使用期間中、24時間の無料オンラインサービスも提供します。これは、CDCP試験問題に関する問題をいつでも解決するのにCertified Data Centre Professional (CDCP)役立ちます。

EXIN Certified Data Centre Professional (CDCP) 認定 CDCP 試験問題 (Q51-Q56):

質問 # 51

When designing a data centre with a raised-floor setup, where should the air conditioners be placed?

- A. Perpendicular to the cold aisle
- B. Perpendicular to the side of the rack
- C. Close to the entrance door to create an air curtain to avoid hot comes into the computer room
- **D. Perpendicular to the hot aisle**

正解: D

質問 # 52

is the degree to which a system or component is operational and accessibility when required for use.

- A. Reliability
- B. Scalability
- C. Agility
- **D. Availability**

正解: D

解説:

Availability is the degree to which a system, product or component is operational and accessible when required for use. It is one of the attributes of reliability, which is the ability of a system or component to perform its required functions under stated conditions for a specified period of time. Availability can be calculated as the ratio of the expected value of the uptime (the time when the system is functional) to the total time (uptime plus downtime) of a system or component. Availability can also be influenced by factors such as maintainability, fault tolerance, redundancy, diagnostics, and logistics.

質問 # 53

Where should exit/emergency signs be located?

- **A. At every escape door and pathways leading to doors (arrows)**
- B. Depends on the policy of the data centre
- C. At each door
- D. In the Computer room only

正解: A

解説:

According to the EPI Data Centre Operations Standard (DCOS), exit/emergency signs should be located at every escape door and pathways leading to doors (arrows) to ensure a safe and quick evacuation in case of an emergency¹. This is also consistent with the best practices for data centre emergency preparedness and response, which recommend having a clear and visible signage system for emergency exits²³.

質問 # 54

Measuring "Business Values" begins first with.

- A. Topology
- B. Network
- C. Budget
- D. Physical Infrastructure

正解: C

解説:

Measuring "Business Values" begins first with budgeting and identifying the costs associated with the project.

This includes understanding the economic impact of the project, such as the cost of labor, materials, and other resources. It is also important to evaluate the return on investment (ROI) of the project, which will help to determine its overall value. Additionally, it is important to consider the long-term impact of the project and its potential to add value to the business in the future.

質問 # 55

Which one of the following is a device that uses circulating chilled water to remove heat?

- A. Computer Room Air Suppression Unit (CRAS)
- B. Computer Room Air System Unit (CRAS)
- C. Computer Room Air Suspension Unit (CRAS)
- D. Computer Room Air Handling Unit (CRAH)

正解: D

解説:

A computer room air handling unit (CRAH) is a device that uses circulating chilled water to remove heat from the data center environment. A CRAH consists of a fan, a coil, and a filter. The fan draws the warm air from the data center and passes it through the coil, where the heat is transferred to the chilled water. The chilled water is supplied by a chiller or a cooling tower, and the cooled air is returned to the data center. A CRAH is different from a computer room air conditioning unit (CRAC), which uses a refrigerant instead of chilled water to cool the air.
