SAP Certified Associate - SAP SuccessFactors Employee Central Core Sample Questions (Q72-Q77):

NEW QUESTION # 72

How should you build the IF condition to identify the user when the employee is updating their own Personal Information?

- A. Option B
- B. Option C
- C. Option A
- D. Option D

Answer: B

Explanation:

To identify the user when the employee is updating their own personal information, the IF condition in Option C is correct. This configuration:

Checks if the Context.Current User is equal to the Login User.

Ensures that the rule applies only when the employee is making changes to their own personal data.

This approach is aligned with SAP SuccessFactors logic for self-service scenarios, enabling accurate identification of the user in such workflows.

Scenario 2: Approvals for Self-Service

NEW QUESTION # 73

When the manager updates the location of an employee, the HR admin must be the approver. Note that the HR admin, manager, and HR Business Partner have access to change the location.

How do you create the IF condition for the workflow derivation rule to meet the above requirements?

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: A

Explanation:

To meet the requirement where the HR admin must approve the manager's updates to an employee's location, the workflow derivation rule must include the following IF condition:

Option A: Ensures that the condition checks whether the user belongs to the permission group for HR Admins, and the Event Reason value matches "Location Change".

This configuration aligns the workflow rule with the scenario requirements, where HR admins are explicitly designated as approvers

Scenario 2: Approvals for Self-Service

NEW QUESTION # 74

This event triggers the rule during the initialization phase of the Add New Employee wizard.
