There are two versions of RealVCE dumps. The one is PDF version and another is SOFT version. You can experience it in advance. In this, you can check its quality for yourself.

Salesforce Certified Slack Administrator Sample Questions (Q205-Q210):

NEW QUESTION # 205

Any is an Org Owner on an Enterprise Grid plan.

A workspace Admin informs Any that a confidential file has been uploaded to a public channel by mistake.

Any needs to remove the file and determine who has downloaded it.

What should Any do to accomplish this goal?

- A. Using an integrated Data Loss Prevention (DLP) solution, delete the file, and then review the Audit Logs API to see who downloaded the file.
- B. Using Slack Enterprise Key Management (EKM), revoke key access for the file, and review the EKM logs to see who downloaded the file.
- C. Using MDM, disable file downloads and then use session management to see who was logged in and downloaded the file.
- D. Using a third-party eDiscovery app, delete the file and use data exports to determine who downloaded the file.

Answer: A

Explanation:

The proper course of action involves:

- * Deleting the file through an integrated Data Loss Prevention (DLP) solution.
- * Reviewing access through the Audit Logs API.

Slack documentation confirms:

"A DLP integration allows detection and remediation (e.g., deletion) of sensitive files or messages. The Audit Logs API provides detailed logs of user activity, including file downloads." Mobile Device Management (MDM) focuses on device security, not file tracking, and EKM controls encryption but doesn't show file download actions.

-

NEW QUESTION # 206

You're a Slack Org Admin, and your company recently acquired a new business unit. You must decide if you want to add your new teammates to your existing Slack workspaces, or create a new workspace in your Slack Enterprise Grid Org.

You know that this new business unit has strict security and compliance requirements that exceed the policies of your current workspaces. You also expect the new business unit to collaborate extensively with the rest of your company, so they need to feel connected.

What should you consider first when deciding if you need a new workspace?

(Select the best answer.)

- A. The new business unit's app approval requirements.
- **B. The data retention needs of the new business unit for files and messages.**
- C. The number of multi-workspace channels you think the new business unit will need when collaborating across the org.
- D. The new business unit's preference to communicate in direct messages (DMs) and private channels to preserve confidentiality.

Answer: B

Explanation:

When deciding whether to create a new workspace in Enterprise Grid, Slack recommends:

"Start by assessing whether the business unit's data retention, security, and compliance requirements are different enough from existing workspaces to justify workspace separation." If stricter data retention or compliance needs are present, a separate workspace may be necessary to apply different settings. Collaboration can still happen through multi-workspace channels if needed. Preferences about DMs (B) or apps (D) are secondary considerations.

(Reference: Slack Administration Study Guide - Enterprise Grid Workspace Planning)

-

NEW QUESTION # 207

Takeshi is an Org Admin on Enterprise Grid. A business leader asks him to create an org-wide channel for a cross-functional company project, but he replies that he needs to create a cross-workspace channel instead.

Which of the following best describes why a multi-workspace channel is more appropriate than an org-wide channel in this scenario?

- **A. Org-wide channels are discoverable by all workspaces in the same Grid org and should only be used for information that applies to all employees.**
- B. Org-wide channels are created by default when Slack is first implemented and cannot be reconfigured afterwards.
- C. There is a limit of ten org-wide channels, and this project would not necessitate creating one.
- D. Multi-workspace channels can be archived at the end of the project, but org-wide channels cannot.

Answer: A

Explanation:

In Enterprise Grid, an org-wide channel is intended for communications relevant to all members across all workspaces. Slack documentation states:

"Org-wide channels are automatically shared with every workspace in your organization and should be used for information that applies to everyone, such as company-wide announcements." Since a cross-functional project would involve specific participants and not the entire organization, a multi-workspace channel is a more appropriate and flexible solution.

(Reference: Slack Administration Study Guide - Enterprise Grid Channels and Communication Best Practices)

-

NEW QUESTION # 208

You provide channel strategy recommendations to your organization and want to ensure the right level of information visibility. In which situation would a private channel best suit the needs of the teams involved?

- A. A team of human resources members and hiring team members need to have an ongoing discussion regarding an open role, including discussion of role requirements, compensation, and candidate information.
- B. A cross-functional team would like to explore new ideas for providing customer value on a new product line.
- C. A team within your organization has announced that they're kicking off a new project and will need a channel to collaborate.
- D. Your organization is globally distributed and would like to create a channel specific to events occurring at your organization's headquarters location.

Answer: A

Explanation:

Slack recommends:

"Private channels are best for sensitive discussions such as hiring, compensation, or any confidential information that should not be visible to all workspace members." Projects (B), brainstorming (C), and event announcements (D) are usually better suited for public channels to maximize visibility.

(Reference: Slack Administration Study Guide - When to Use Private Channels)

-

NEW QUESTION # 209

You're the Primary Org Owner for your university's Slack Enterprise Grid. You're responsible for launching Slack to first-year students and faculty members.

What is the most efficient way to set up students as full members and faculty members as Workspace Admins? (Select the best answer.)

- A. Use SCIM provisioning to create accounts for students and faculty members, and create an identity provider (IdP) group for all faculty members. Then, promote the members of the IdP group in bulk to Workspace Admins.
- B. Use "Just-in-time" provisioning to allow students and faculty members to create an account upon first login, eliminating the time and effort with onboarding new accounts. Then, promote each faculty member to Workspace Admin.
- C. Use SCIM provisioning to create accounts for students and faculty members. Then, update their profile fields to reflect their title by syncing with the SCIM API.
- D. Use either "Just-in-time" or SCIM provisioning to invite students and faculty members to Slack. Then, create a user group of faculty members and promote that user group in bulk to Workspace Admins.

Answer: A

Explanation:

Slack recommends:

"Using SCIM provisioning combined with IdP group mapping allows organizations to efficiently manage large groups of users and assign roles based on IdP groups." This way, you automate role assignment (faculty as Workspace Admins) while onboarding users. Options A and D don't promote users automatically. Option C is less efficient compared to pre-provisioning via SCIM and group mapping.

(Reference: Slack Administration Study Guide - SCIM Provisioning and IdP Group Mapping)
