

Reliable 1z0-1127-24 Test Experience, VCE 1z0-1127-24 Exam Simulator

P.S. Free 2025 Oracle 1z0-1127-24 dumps are available on Google Drive shared by BootcampPDF:
<https://drive.google.com/open?id=1tLkuF77OnHZAgzmFNj469yys3AxjQYS>

In recent years, our 1z0-1127-24 Test Torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our 1z0-1127-24 certification training continue to pursue our passion for advanced performance and human-centric technology. As a matter of fact, our company takes account of every client's difficulties with fitting solutions. As long as you need help, we will offer instant support to deal with any of your problems about our Oracle Cloud Infrastructure 2024 Generative AI Professional guide torrent. Any time is available; our responsible staff will be pleased to answer your questions.

Oracle 1z0-1127-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Using OCI Generative AI Service: For AI Specialists, this section covers dedicated AI clusters for fine-tuning and inference. The topic also focuses on the fundamentals of OCI Generative AI service, foundational models for Generation, Summarization, and Embedding.
Topic 2	<ul style="list-style-type: none">Fundamentals of Large Language Models (LLMs): For AI developers and Cloud Architects, this topic discusses LLM architectures and LLM fine-tuning. Additionally, it focuses on prompts for LLMs and fundamentals of code models.
Topic 3	<ul style="list-style-type: none">Building an LLM Application with OCI Generative AI Service: For AI Engineers, this section covers Retrieval Augmented Generation (RAG) concepts, vector database concepts, and semantic search concepts. It also focuses on deploying an LLM, tracing and evaluating an LLM, and building an LLM application with RAG and LangChain.

100% Pass Trustable 1z0-1127-24 - Reliable Oracle Cloud Infrastructure 2024 Generative AI Professional Test Experience

Our company has dedicated ourselves to develop the 1z0-1127-24 latest practice dumps for all candidates to pass the exam easier, also has made great achievement after more than ten years' development. As the certification has been of great value, a right 1z0-1127-24 exam guide can be your strong forward momentum to help you pass the exam like a hot knife through butter. On the

contrary, it might be time-consuming and tired to prepare for the 1z0-1127-24 exam without a specialist study material. So it's would be the best decision to choose our 1z0-1127-24 Study Tool as your learning partner. Our 1z0-1127-24 study tool also gives numerous candidates a better perspective on the real exam. Having been specializing in the research of 1z0-1127-24 latest practice dumps, we now process a numerous of customers with our endless efforts, and we believe that our 1z0-1127-24 exam guide will percolate to your satisfaction.

Oracle Cloud Infrastructure 2024 Generative AI Professional Sample Questions (Q48-Q53):

NEW QUESTION # 48

How does a presence penalty function in language model generation?

- A. It penalizes all tokens equally, regardless of how often they have appeared.
- B. It penalizes only tokens that have never appeared in the text before.
- C. It penalizes a token each time it appears after the first occurrence.
- D. It applies a penalty only if the token has appeared more than twice.

Answer: C

Explanation:

A presence penalty is a mechanism used in language model generation to discourage repetition of words or phrases in generated text. This is crucial for improving diversity in AI-generated responses.

How It Works:

The presence penalty increases the loss associated with words that have already appeared in the output.

The model is less likely to generate the same word multiple times, leading to more diverse responses.

Unlike frequency penalties, which increase with repeated occurrences, presence penalties apply as soon as a word appears.

Key Use Cases:

Avoiding redundant phrases in AI-generated text.

Enhancing creative writing applications where repetitive wording is undesirable.

Making chatbot conversations more engaging and natural.

□ Oracle Generative AI Reference:

Oracle's generative AI models implement presence and frequency penalties as part of their fine-tuning and model inference processes to balance text coherence and diversity.

NEW QUESTION # 49

Which is NOT a built-in memory type in LangChain?

- A. Conversation Token Buffer Memory
- B. Conversation Buffer Memory
- C. Conversation Summary Memory
- D. Conversation ImageMemory

Answer: D

Explanation:

In LangChain, "Conversation Image Memory" is not a built-in memory type. The built-in memory types in LangChain include:

Conversation Token Buffer Memory: This memory type stores a buffer of tokens from the conversation history.

Conversation Buffer Memory: This memory type retains a buffer of conversation history, typically in the form of text.

Conversation Summary Memory: This memory type summarizes the conversation history to keep track of key points and information.

These memory types help manage and utilize conversation history in various ways to enhance the performance of conversational models.

Reference

LangChain documentation on memory types

Technical guides on implementing memory in conversational AI systems

NEW QUESTION # 50

What does "k-shot prompting" refer to when using Large Language Models for task-specific applications?

- A. Limiting the model to only k possible outcomes or answers for a given task
- B. Explicitly providing k examples of the intended task in the prompt to guide the models output
- C. The process of training the model on k different tasks simultaneously to improve its versatility
- D. Providing the exact k words in the prompt to guide the model's response

Answer: B

NEW QUESTION # 51

In LangChain, which retriever search type is used to balance between relevancy and diversity?

- A. top k
- B. mmr
- C. similarity
- D. similarity_score_threshold

Answer: C

NEW QUESTION # 52

Which is a distinguishing feature of "Parameter-Efficient Fine-tuning (PEFT)" as opposed to classic Fine-tuning in Large Language Model training?

- A. PEFT parameters are typically used when no training data exists.
- B. PEFT modifies all parameters and uses unlabeled, task-agnostic data.
- C. PEFT does not modify any parameters but uses soft prompting with unlabeled data. PEFT modifies
- D. PEFT involves only a few or new parameters and uses labeled, task-specific data.

Answer: D

NEW QUESTION # 53

.....

As the authoritative provider of 1z0-1127-24 actual exam, we always pursue high pass rate compared with our peers to gain more attention from those potential customers. We guarantee that if you follow the guidance of our 1z0-1127-24 learning materials, you will pass the exam without a doubt and get a certificate. Our 1z0-1127-24 Exam Practice is carefully compiled after many years of practical effort and is adaptable to the needs of the 1z0-1127-24 exam.
