If you are worry about the coming UiPath-ABAv1 exam, our UiPath-ABAv1 study materials will help you solve your problem. In order to promise the high quality of our UiPath-ABAv1 exam questions, our company has outstanding technical staff, and has perfect service system after sale. More importantly, our good UiPath-ABAv1 Guide quiz and perfect after sale service are approbated by our local and international customers.

UiPath UiPath-ABAv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Platform Knowledge: It delves into UiPath products and their uses, including Studio types, Robot types, Orchestrator, and Integration Service. Additionally, it discusses the value of components within the UiPath Ecosystem.
Topic 2	<ul style="list-style-type: none"> Debugging: Debugging modes, actions, breakpoints, and debugging panels are explained in this topic, along with using Profile Execution features to improve project execution performance.
Topic 3	<ul style="list-style-type: none"> Workflow Analyzer: This topic covers the use of Workflow Analysis, along with configuring Workflow Analyzer settings.
Topic 4	<ul style="list-style-type: none"> Working with Files and Folders: Creating, managing, and iterating through local files and folders are covered here.
Topic 5	<ul style="list-style-type: none"> Orchestrator: Understanding Orchestrator entities, tenant entities, provisioning robots, defining roles, and utilizing logging features are covered in this topic.
Topic 6	<ul style="list-style-type: none"> Control Flow: Control Flow activities, workflow types, and Flowchart layouts are discussed here, along with the usage of IF, Flow Decision, Switch activities, While, Do While, and For Each.
Topic 7	<ul style="list-style-type: none"> Logging: This topic addresses interpreting robot execution logs and implementing logging best practices during development for effective debugging and analysis.
Topic 8	<ul style="list-style-type: none"> Integration Service: This topic explains Integration Service, use of integration service connectors, triggers, and the Integration Service Connector Builder.
Topic 9	<ul style="list-style-type: none"> Business Knowledge: This topic focuses on understanding business process automation (BPA) and its value proposition, as well as exploring key concepts related to business processes.

Topic 10	<ul style="list-style-type: none"> Variables and Arguments: This topic explores data types and how they're utilized, along with creating, managing, and using variables and arguments. It also addresses the differences between variables, arguments, global constants, and global variables.
Topic 11	<ul style="list-style-type: none"> Libraries and Templates: Creating, publishing, and consuming process libraries, as well as working with templates, are discussed here.
Topic 12	<ul style="list-style-type: none"> Implementation Methodology: Understanding project implementation stages, interpreting PDDs and SDDs, and conducting peer reviews are discussed here.
Topic 13	<ul style="list-style-type: none"> Exception Handling: This topic covers using Try Catch, Throw, Rethrow, and Retry Scope activities.

UiPath UiPath-ABAv1 Exam Questions – Get 365 Days Free Updates

With the help of performance reports of UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) Desktop practice exam software, you can gauge and improve your growth. You can also alter the duration and UiPath UiPath-ABAv1 Questions numbers in your practice tests. Questions of this UiPath Certified Professional Automation Business Analyst Professional v1.0 (UiPath-ABAv1) mock test closely resemble the format of the actual test.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q90-Q95):

NEW QUESTION # 90

What are the current technical limitations of Task Mining that the Business Analyst has to consider prior to the implementation?

- A. Avoid applications with user interfaces in other languages than English
- B. Avoid applications with heavy scripting transparent to the user
- C. a. Avoid applications with user interfaces in other languages than English
- b Avoid mobile applications
- c Avoid applications with user interfaces in English
- D. Avoid applications with user interfaces in other languages than English
- E. a Avoid web applications
- b Avoid processes involving heavily mainframe-type applications (green screen)
- F. Avoid processes involving heavily mainframe-type applications (green screen)
- G. a. Avoid real-time applications
- **H. a Avoid Citrix environments**

Answer: H

Explanation:

The current technical limitations of Task Mining that the Business Analyst must consider prior to implementation include: avoiding Citrix environments, avoiding processes involving heavily mainframe-type applications (green screen), and avoiding applications with user interfaces in languages other than English.

These factors can significantly impact the effectiveness and applicability of Task Mining technologies.

NEW QUESTION # 91

What is one of the advantages of using a Test Scenario Document?

- A. To help when the project is on a tight schedule
- B. To help while regression test is performed
- **C. To ensure better organization**
- D. To help when applications are very complicated

Answer: C

Explanation:

Utilizing a Test Scenario Document in testing, particularly within the context of UiPath Test Suite, facilitates better organization of test cases and sets. This documentation approach helps manage test activities more effectively, ensuring that each test case is clearly defined, organized, and accessible. This organizational benefit is crucial for maintaining clarity and efficiency in testing processes, especially when dealing with complex or extensive test scenarios. One of the key advantages of using a Test Scenario Document is to ensure better organization throughout the testing process. This document serves as a structured guide for both creating test cases and tracking their execution. It helps in organizing test scenarios in a way that ensures comprehensive coverage of the application's functionality and business requirements. By documenting scenarios, teams can more easily manage, execute, and review test results, leading to more efficient quality assurance processes.

NEW QUESTION # 92

UiPath Process Mining provides TemplateOne application that offers different generic dashboards containing information, KPIs, and analysis functionality focused on a specific process area. What are the 3 standard KPIs part of the Automation Dashboard within the TemplateOne application?

- A. Automation Rate, Total Manual event cost. Intercompany case value
- B. Automation Rate, Total Manual Processing time Supplier Avg. Time
- C. Automation Rate, Material Group Count. Avg. throughput time
- **D. Automation Rate, Total Manual Processing time. Total Manual event cost**

Answer: D

Explanation:

In the TemplateOne application provided by UiPath Process Mining, the Automation Dashboard includes the following three standard KPIs: Automation Rate, Total Manual Processing Time, and Total Manual Event Cost. These KPIs help in assessing the efficiency and cost-effectiveness of manual vs automated processes within an organization.

NEW QUESTION # 93

What is one of the advantages of using a Test Scenario Document?

- A. To help when the project is on a tight schedule
- B. To help while regression test is performed
- **C. To ensure better organization**
- D. To help when applications are very complicated

Answer: C

Explanation:

Utilizing a Test Scenario Document in testing, particularly within the context of UiPath Test Suite, facilitates better organization of test cases and sets. This documentation approach helps manage test activities more effectively, ensuring that each test case is clearly defined, organized, and accessible. This organizational benefit is crucial for maintaining clarity and efficiency in testing processes, especially when dealing with complex or extensive test scenarios. One of the key advantages of using a Test Scenario Document is to ensure better organization throughout the testing process. This document serves as a structured guide for both creating test cases and tracking their execution. It helps in organizing test scenarios in a way that ensures comprehensive coverage of the application's functionality and business requirements. By documenting scenarios, teams can more easily manage, execute, and review test results, leading to more efficient quality assurance processes.

NEW QUESTION # 94

What is the main goal of conducting a feasibility study during the business analysis phase for RPA?

- A. To identify potential cost savings and revenue opportunities
- B. To design the automation solution
- C. To understand the current state of the business process

- D. To evaluate the technical feasibility of the automation solution

Answer: D

Explanation:

The main goal of conducting a feasibility study during the business analysis phase for RPA is to evaluate the technical feasibility of the automation solution. This involves assessing whether the processes in question can be automated using RPA technology, and if so, how effectively. It includes examining the nature of each step and activity performed by the operation user, validating whether the process is rule-based or requires additional decisions or analysis, and determining the complexity, volume of transactions, technology landscape, development efforts, data size, and information flow. The feasibility study ensures that the process is suitable for automation and helps in identifying any manual interventions that might be needed during the process¹.
