Go against the water and retreat if you fail to enter. The pressure of competition is so great now. If you are not working hard, you will lose a lot of opportunities! There is no time, quickly purchase ISTQB-CTAL-TA Study Materials, pass the exam! Come on!

ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q13-Q18):

NEW QUESTION # 13

The following document has been produced as part of the replacement of an internal Customer Relationship Management (CRM) application. The replacement application should not differ from the current CRM application, and the documentation reflects this aspiration, with seven specific requirements listed.

The requirements will be reviewed using a standard checklist:

- Requirements should be testable
- Each requirement should be consistent with other requirements
- Each requirement should be unambiguous
- Each requirement should have a unique identifier
- Documents should be versioned, dated, and the author specified

Which checklist items would identify issues in this requirements document?

SELECT ONE OPTION

- A. d, e
- **B. b, d**
- C. a, c
- D. b, e

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

* Requirement Testability (a): The requirements are testable as they specify expected behavior, such as response time (4 seconds) and SSO control.

* Consistency (b): There is inconsistency, as one requirement states no changes to screens, but another mentions a new data item for FCA registration.

* Ambiguity (c): The requirements are clear in terms of what they specify.

* Unique Identification (d): The requirements are listed as bullet points without unique identifiers, violating this criterion.

* Versioning and Author (e): The document includes a version number, date, and author.

Therefore, the correct answer is D (b, d).

NEW QUESTION # 14

You are testing a hospital patient management system that has undergone a release including an improved user interface and changes to meet new regulatory requirements. You are a Test Analyst working with a Technical Test Analyst.

Which of the following requirements MOST align with your responsibilities as a Test Analyst?

* R01: New and amended patient data can be successfully read and processed by receiving hospital department systems

* R02: Patient data will be transmitted and received by hospital department systems within ten seconds of entry

* R03: Patient data transmitted to other hospital department systems will remain secure and cannot be accessed by unauthorized third parties

* R04: High volumes of data can be successfully received and processed while the user interface is being used

* R05: The new user interface is appropriate for the needs of all hospital administrator roles SELECT ONE OPTION

- **A. R01, R05**
- B. R03, R04
- C. R01, R02
- D. R02, R03

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation:

As a Test Analyst, the focus is primarily on functional and usability aspects:

* R01: Validates that the new or amended data can be correctly read and processed - this is a functional requirement.

* R05: Evaluates whether the new user interface meets the needs of hospital administrators - this is related to usability.

* The remaining requirements (R02, R03, R04) involve performance, security, and load testing, which are more suited for the Technical Test Analyst.

Therefore, the correct answer is D (R01, R05).

NEW QUESTION # 15

A car navigation system needs to be integrated in the overall car software. It is important to verify that the car navigation is functioning correctly once integrated. Thus functional correctness is considered to be important.

Which of the following techniques is most likely to support the required functional correctness testing?

- **A. State transition testing**
- B. Heuristic evaluation
- C. Vulnerability scan
- D. Multiple condition testing

Answer: A

Explanation:

The technique that is most likely to support the required functional correctness testing is state transition testing. State transition testing

is a technique that tests the behavior of a system or component based on its states and transitions between them. This technique is suitable for testing a system that has different modes or states depending on the input values or events, such as a car navigation system. Verified References:

[ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 3.4.1, page 39.

NEW QUESTION # 16

Consider the following decision table:

	1	2	3	4	5	6	7	8
C1	1	1	1	1	0	0	0	0
C2	1	1	0	0	1	1	0	0
C3	1	0	1	0	1	0	1	0
A1	X	X						
A2	X							

This decision table has been created to test the following specification: Persons that study at a university (C1) and have parents whose total annual income is less than € 30,000 (C2), receive a scholarship. In addition to these qualifications, if they also live away from home (C3), they receive an addition to their scholarship (A2). How many cases are left when this decision table is collapsed?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Two cases are left when this decision table is collapsed. A decision table is a technique that shows the combinations of conditions and actions for a given scenario. A decision table that is collapsed eliminates the combinations that are invalid or impossible, such as having a scholarship without meeting the qualifications.

The two valid cases for this scenario are:

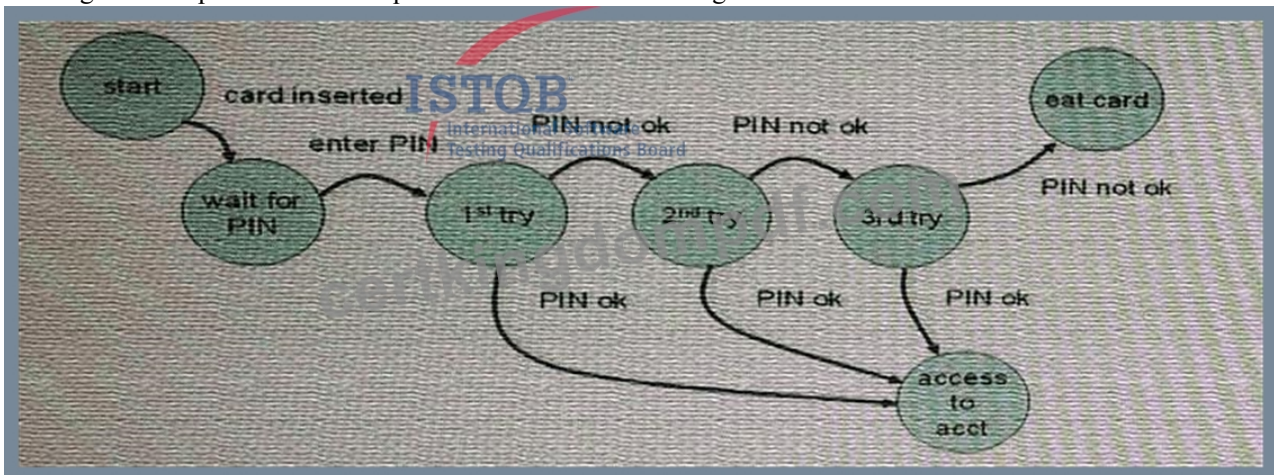

* C1 = Y, C2 = Y, C3 = Y, A1 = Y, A2 = Y

* C1 = Y, C2 = Y, C3 = N, A1 = Y, A2 = N

NEW QUESTION # 17

Based on the system state transition diagram of an ATM system shown below, using the state transition test technique which of the following is an example of a test case required to achieve 1-switch coverage?

- A. 1st try -> 2nd try -> eat card
- B. 1st try -> 2nd try

- C. 1 st try -> 2nd try -> 3rd try
- D. 1 st try -> 2nd try -> 3rd try -> access to act

Answer: A

Explanation:

The test case C is an example of a test case required to achieve 1-switch coverage, using the state transition test technique. A 1-switch test case is a test case that covers two states and the transition between them. To achieve 100% 1-switch coverage, all transitions between states must be covered by at least one test case. The test case C covers the transition from the state 1st try to the state 2nd try, and the transition from the state 2nd try to the state eat card.
