

Simulated PEGACPRSA22V1 Test & PEGACPRSA22V1 Actual Dumps

P.S. Free & New PEGACPRSA22V1 dumps are available on Google Drive shared by PDFVCE: <https://drive.google.com/open?id=1V1raAIkHptnHXCLEPDCOFLzHZ7imtwq>

Our company really took a lot of thought in order to provide customers with better PEGACPRSA22V1 learning materials. First of all, in the setting of product content, we have hired the most professional team who analyzed a large amount of information and compiled the most reasonable PEGACPRSA22V1 Exam Questions. And you can find the most accurate on our PEGACPRSA22V1 study braindumps. Secondly, our services are 24/7 available to help our customers solve all kinds of questions.

Do you want to pass PEGACPRSA22V1 exam in a short time? PEGACPRSA22V1 dumps and answers from our PDFVCE site are all created by the IT talents with more than 10-year experience in IT certification. The PDFVCE site offers the most comprehensive certification standards and PEGACPRSA22V1 Study Guide. According to our end users of PEGACPRSA22V1 dumps, it indicates that the passing rate of PEGACPRSA22V1 exam is as high as 100%. If you have any questions about PEGACPRSA22V1 exam dump, we will answer you in first time.

Pegasystems PEGACPRSA22V1 Actual Dumps | Test PEGACPRSA22V1 Study Guide

You can enter the company you want and improve your salary if you have the certification for this field. PEGACPRSA22V1 test materials of us can help you pass the exam and obtain the certification successfully. PEGACPRSA22V1 exam dumps offer you free demo for you to have a try, so that you can know what the complete version is like. In addition, we provide you with free update for 365 days after purchasing PEGACPRSA22V1 Training Materials, and our system will send you the latest version for PEGACPRSA22V1 exam dumps automatically. We have online and offline chat service, and if you have any questions for PEGACPRSA22V1 exam materials, you can contact us.

The PEGACPRSA22V1 Certification Exam is designed for individuals who have experience working with Pega Robotic Automation technology and want to take their skills to the next level. Certified Pega Robotics System Architect 22 certification exam is ideal for individuals who want to demonstrate their expertise in Pega Robotic Automation technology and want to advance their careers in this field.

The Pega Robotics System Architect exam is a challenging and comprehensive exam that tests the candidate's understanding of Pega Robotics technology and its applications. PEGACPRSA22V1 Exam covers a wide range of topics, including Pega Robotics architecture, design and development of Pega Robotics solutions, runtime components, and deployment and management of robotic processes. Candidates who pass the PEGACPRSA22V1 exam are recognized as certified Pega Robotics System Architects, and

they are well-equipped to design and deploy Pega Robotics solutions that drive business value.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q19-Q24):

NEW QUESTION # 19

The business requirement states the solution should update and save the address to all applicable applications in the solution. The interaction configuration file is already configured with the SaveAddress activity. You are now ready to add an Activity component to a project using standard naming conventions.

Which option meets the requirement for configuring the Activity component?

□

- A. Exhibit B
- **B. Exhibit A**
- C. Exhibit C
- D. Exhibit D

Answer: B

NEW QUESTION # 20

Which two statements about the Excel Connector are true? (Choose Two)

- **A. Excel Connector allows you to work with data ranges.**
- B. Excel Connector requires installation of Microsoft Office 2010 or later.
- C. You need to interrogate a workbook before using it with Excel Connector.
- **D. You can modify and read from Excel workbooks using Pega Robot Studio without an Excel application being installed in the environment.**
- E. Use the Excel Connector in scenarios where the user needs to interact with the workbook in Excel.

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

The Excel Connector in Pega Robot Studio is a lightweight component that provides direct interaction with Excel files without relying on the Microsoft Excel application. It is ideal for background processing, where users are not required to interact with Excel directly. According to the Pega Robotics System Design and Implementation Guide (Excel Integration and Connectors section):

"The Excel Connector allows automations to open, read, and modify Excel workbooks without requiring Microsoft Excel to be installed.

It operates directly on the file system level, supporting operations such as reading or writing to specific cells, entire worksheets, or data ranges.

The connector does not use Excel Interop; therefore, no interrogation or Excel application process is necessary." Explanation of Options:

- * A. Correct - The Excel Connector supports data range operations such as defining, reading, or writing to specific sets of cells within a worksheet.
- * B. Incorrect - The connector does not depend on any installed version of Microsoft Office; it functions independently.
- * C. Incorrect - Interrogation applies to UI applications, not file-based connectors like Excel Connector.
- * D. Correct - The connector works without Excel being installed; it manipulates workbook data directly through file handling APIs.
- * E. Incorrect - When user interaction with Excel is required, Excel Interop (Excel Application Connector) should be used instead of the file-based Excel Connector.

Therefore, the correct statements are A and D.

Reference:Extracted from Pega Robotics System Design and Implementation Guide, Excel Connector and Interop Comparison section (Pega Robotics 19.1 and later).

NEW QUESTION # 21

You are debugging a script component for your project. When the automation executes your script, the intended result does not occur. You suspect that one or more variables within your script are not being set to the proper value. Your version of Pega Robot Studio does not support the use of breakpoints within the script designer.

In what two ways can you debug the script? (Choose two.)

- A. Check with the Support team to upgrade Robotic Automation Studio to the version which contains script debugging.
- B. Add a breakpoint before calling the script so that you can assign a watch for the variable(s) used within the script.
- C. Enable Runtime logging and enter a diagnostic message to log the variable values during script execution.
- D. Modify the script so that the variable values are returned in the automation.

Answer: A,C

NEW QUESTION # 22

You are testing an automation that retrieves customer data from an application based on a customer number.

The automation fails and displays the following error:

Which two automations show valid breakpoint placement for debugging this automation error? (Choose Two)

- A.
- B.
- C.
- D.
- E.

Answer: C,E

Explanation:

To diagnose a failure occurring on a link from a control's Properties call to a String service's Equals(), you must place breakpoints on the event links immediately before the failing link so you can inspect the values being passed (for example, the account number) and confirm whether a null is being propagated.

Pega Robot Studio debugging guidance:

"Breakpoints can be set on event links to pause execution at specific steps in an automation. During a paused state, developers can inspect the values on connected data ports to determine whether null or unexpected values are being passed to the next step."

"Place breakpoints upstream of the failing event to verify the value retrieved from a control (for example, via a Properties call) before it is sent into a service method (such as Equals)."

* Option A shows a breakpoint on the event path feeding the Properties block and another just before the segment that calls Equals(). This allows you to stop exactly where the input to Equals(string2) would be evaluated and verify whether it is null.

* Option C also places a breakpoint directly on the event link leading into the Properties/Equals segment, which is the correct spot to pause and inspect the data value before the comparison occurs.

Options B, D, and E place breakpoints either too early (not reaching the Properties/Equals path yet) or on unrelated branches, which won't reliably expose the null value being passed into IStringService.Equals().

References: Pega Robotics System Design and Implementation Guide - Debugging Automations: placing breakpoints on event links; inspecting data values at paused breakpoints; tracing null values upstream from failing links.

NEW QUESTION # 23

While interrogating a web application, you discover a hidden menu item AddressType. The AddressType menu item activates when the pointer hovers over the control, and the menu displays a drop-down list.

Which two options can you use to interrogate this hidden drop-down list control? (Choose Two)

- A. On the Web Controls tab, select the page, and then click List Web Controls.
- B. **On the Interrogation Form, select Select Element.**
- C. On the Application tab, click the Virtual Controls tab.
- D. **Use the Delay option on the Interrogation Form.**
- E. In the Interrogation Form dialog box, select HTML Table Editor.

Answer: B,D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

During interrogation of web applications, developers often encounter dynamic or hidden controls - such as drop-down menus or hover-triggered lists - that do not immediately appear on the page.

To successfully interrogate these elements, Pega Robot Studio provides two essential tools:

* The Delay option on the Interrogation Form, which allows the developer time to trigger the hidden control before capture.

* The Select Element option, which enables precise selection of an element directly from the DOM, even if it is not immediately visible.

According to the Pega Robotics System Design and Implementation Guide, section "Interrogating Dynamic and Hidden Web Controls":

"When interrogating hidden or dynamically rendered controls:

* Use the Delay option on the Interrogation Form to give yourself time to hover over or activate a hidden control before Robot Studio attempts to capture it.

* Use the Select Element option to manually highlight and select a control from the web application's DOM, even when it is displayed only after an interaction such as mouse hover. These methods are particularly effective for controls that expand or render asynchronously, such as drop-down menus or tooltip-triggered elements." Detailed Step Reasoning:

* C. Use the Delay option on the Interrogation Form

* Correct.

* The Delay setting pauses the interrogation process for a specified number of seconds, allowing you to hover over the hidden element (e.g., AddressType menu) and make it visible before capture.

* Once the menu appears, Pega Robot Studio can detect and interrogate it.

* D. On the Interrogation Form, select Select Element.

* Correct.

* The Select Element tool allows manual selection of an element directly from the web page's HTML DOM structure.

* This is especially useful for hidden or dynamically rendered elements like the AddressType dropdown that may not be visible until hovered over.

Incorrect Options Explained:

* A. In the Interrogation Form dialog box, select HTML Table Editor.

* Incorrect.

* The HTML Table Editor is used to inspect and modify HTML table-based controls (grid or table structures), not dynamic menus.

* B. On the Web Controls tab, select the page, and then click List Web Controls.

* Incorrect.

* The List Web Controls option lists already recognized controls in the DOM but cannot reveal or capture hidden dynamic elements.

* E. On the Application tab, click the Virtual Controls tab.

* Incorrect.

* Virtual Controls are used for defining custom controls when the default adapter cannot identify one, not for capturing hidden menu elements.

Final Correct answer:

C). Use the Delay option on the Interrogation Form

D). On the Interrogation Form, select Select Element.

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Interrogating Dynamic, Hidden, and Hover-Activated Controls section (Pega Robotics 19.1 and later).

NEW QUESTION # 24

.....

The Pegasystems PEGACRSA22V1 certification exam is a valuable credential that often comes with certain personal and professional benefits. For many Pegasystems professionals, the Certified Pega Robotics System Architect 22 (PEGACRSA22V1) certification exam is not just a valuable way to boost their skills but also Certified Pega Robotics System Architect 22 certification exam gives them an edge in the job market or the corporate ladder. There are other several advantages that successful Pegasystems PEGACRSA22V1 Exam candidates can gain after passing the Pegasystems PEGACRSA22V1 exam.
