Free JN0-106 Exam Questions, JN0-106 Reliable Test Simulator

By offering you excellent JN0-106 dumps files, ITPassLeader make you career bright and successful. We will offer you discount in buying JN0-106 exam pdf. Once you buy our Juniper practice questions, you will receive the download link immediately. Our aim is to provide our customers with latest exam study guide and the best-quality service. The up-to-date JN0-106 Practice Questions and answers are right here.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q18-Q23):

NEW QUESTION # 18

What is the default behavior of Junos OS when a configuration change is committed without specifying any additional options or timers?

- A. Saves temporarily only
- B. Rolls back automatically
- C. Applies immediately and permanently
- D. Requires reboot

Answer: C

Explanation:

A standard "commit" applies configuration changes immediately and makes them persistent across reboots. Unlike "commit confirmed," it does not include a rollback timer. Administrators must manually rollback if issues occur after committing changes.

NEW QUESTION # 19

Which protocol connects multiple autonomous systems?

- A. IBGP
- B. IS-IS
- C. EBGp
- D. OSPF

Answer: C

Explanation:

BGP (Border Gateway Protocol) is the standard exterior gateway protocol used to exchange routing information between different autonomous systems (ASes), enabling communication across the internet backbone.

- iBGP (Internal BGP) is used for routing within a single AS.

- eBGP (External BGP) is used to connect and exchange routing information between multiple autonomous systems.

NEW QUESTION # 20

Which character is used to filter the command output in the Junos CLI?

- A. ?
- B. <
- C. |
- D. >

Answer: C

Explanation:

In the Junos CLI, the pipe character | is used as a filter operator to refine command output. This operator can be combined with various filtering commands like match, except, count, etc., to display only the relevant portions of the command output. For example, using | match <pattern> filters the output to show only the lines that contain the specified pattern, making it easier to find specific information within extensive command output. This functionality is especially useful in managing and troubleshooting complex configurations and network states, allowing for more efficient analysis of the device's operational status and configuration details.

NEW QUESTION # 21

Which two statements are true about the PFE? (Choose two.)

- A. The PFE handles all processes that control the chassis components.
- B. The PFE implements various services such as policing, stateless firewall filtering, and class of service.
- C. The PFE is responsible for performing protocol updates and system management.
- D. The PFE uses Layer 2 and Layer 3 forwarding tables to forward traffic toward its destination.

Answer: B,D

Explanation:

The Packet Forwarding Engine (PFE) in Juniper Networks devices is the heart of the data plane, handling the actual forwarding of packets based on pre-computed forwarding tables. It provides several critical services to manage and control traffic flow, including policing (to enforce bandwidth limits for certain traffic types), stateless firewall filtering (to permit or deny traffic based on predefined criteria), and Class of Service (CoS) (to prioritize traffic to ensure quality of service for critical applications). The PFE utilizes both Layer 2 (MAC addresses) and Layer 3 (IP addresses) forwarding tables to make intelligent forwarding decisions, ensuring that packets are efficiently routed toward their final destination.

NEW QUESTION # 22

Which command modifier would you use to see all possible completions for a specific command?

- **A. ?**
- B. |
- C. detail
- D. extensive

Answer: A

Explanation:

In Junos OS, the ? command modifier is used to display all possible completions for a specific command. This helps users understand the available options and syntax for a command they are trying to use.

NEW QUESTION # 23

.....

We have brought in an experienced team of experts to develop our JN0-106 study materials, which are close to the exam syllabus. With the help of our JN0-106 study materials, you don't have to search all kinds of data, because our products are enough to meet your needs.
