At QuestionsTube, you can read FCP_FAZ_AN-7.4 free demo questions in pdf file, so you can check the questions and answers before deciding to download the Fortinet FCP_FAZ_AN-7.4 practice questions. These free demo questions are parts of the FCP_FAZ_AN-7.4 exam questions. Download and read them carefully, you will find that the FCP_FAZ_AN-7.4 test questions of QuestionsTube will be your great learning materials online. Share some FCP_FAZ_AN-7.4 exam online questions below.

What's more, part of that Pass4sures FCP_FAZ_AN-7.4 dumps now are free: https://drive.google.com/open?id=1HHjZmwEZnN_38uwk4oFWck2FtG1HQXp

Using our products does not take you too much time but you can get a very high rate of return. Our FCP_FAZ_AN-7.4 quiz guide is of high quality, which mainly reflected in the passing rate. We can promise higher qualification rates for our FCP_FAZ_AN-7.4 exam question than materials of other institutions. Because our products are compiled by experts from various industries and they are based on the true problems of the past years and the development trend of the industry. What's more, according to the development of the time, we will send the updated materials of FCP_FAZ_AN-7.4 Test Prep to the customers soon if we update the products. Under the guidance of our study materials, you can gain unexpected knowledge. Finally, you will pass the exam and get a Fortinet certification.

Pass4sures's study material is available in three different formats. The reason we have introduced three formats of the FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) practice material is to meet the learning needs of every student. Some candidates prefer FCP_FAZ_AN-7.4 practice exams and some want Real FCP_FAZ_AN-7.4 Questions due to a shortage of time. At Pass4sures, we meet the needs of both types of aspirants. We have Fortinet FCP_FAZ_AN-7.4 PDF format, a web-based practice exam, and FCP - FortiAnalyzer 7.4 Analyst (FCP_FAZ_AN-7.4) desktop practice test software.

Practical FCP_FAZ_AN-7.4 Information - Exam Dumps FCP_FAZ_AN-7.4 Collection

The FCP_FAZ_AN-7.4 Practice Exam software is specially made for the students so they can feel real-based examination scenarios and feel some pressure on their brains and don't feel excessive issues while giving the final Fortinet exam. There are a lot of customers that are currently using Pass4sures and are satisfied with it. Pass4sures has designed this product after getting positive feedback from professionals and is rated one of the best study materials for the preparation of the Fortinet FCP_FAZ_AN-7.4 Exam.

Fortinet FCP - FortiAnalyzer 7.4 Analyst Sample Questions (Q30-Q35):

NEW QUESTION # 30

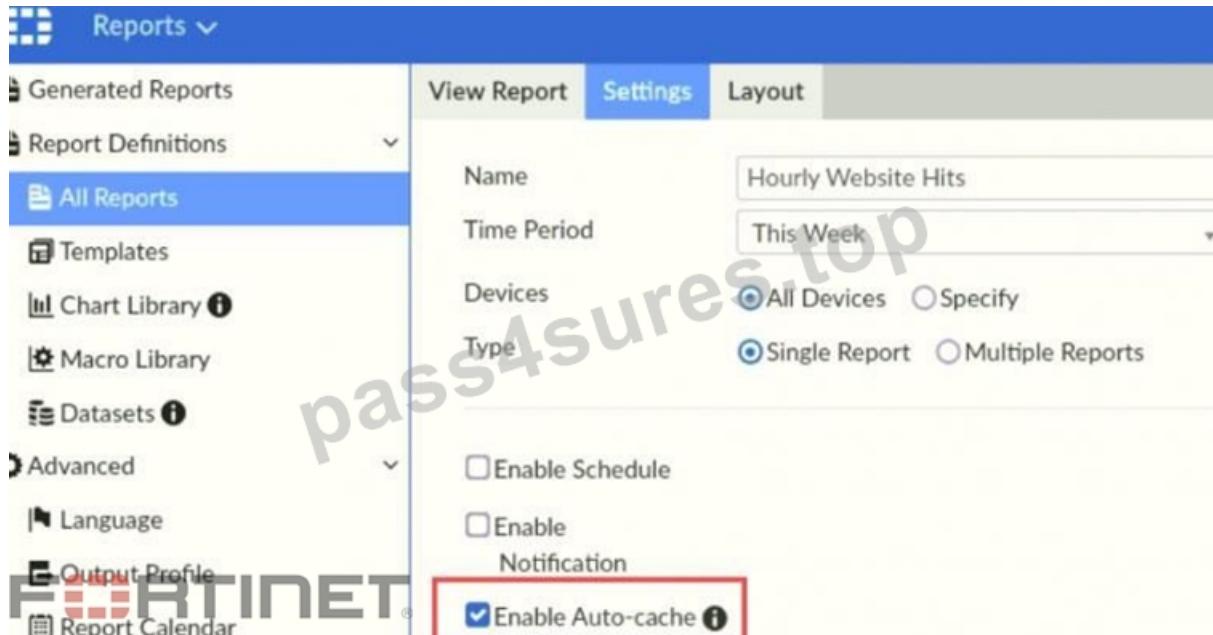

Which statement describes archive logs on FortiAnalyzer?

- A. Logs that are indexed and stored in the SQL database
- B. Logs a FortiAnalyzer administrator can access in FortiView
- C. Logs compressed and saved in files with the .gz extension**
- D. Logs previously collected from devices that are offline

Answer: C

NEW QUESTION # 31

Refer to the exhibit.

The screenshot shows the FortiAnalyzer Reports interface. The left sidebar lists 'Generated Reports', 'Report Definitions' (with 'All Reports' selected), 'Templates', 'Chart Library', 'Macro Library', 'Datasets', 'Advanced', 'Language', 'Output Profile', and 'Report Calendar'. The main panel shows 'View Report', 'Settings' (selected), and 'Layout' tabs. Under 'Settings', the report is named 'Hourly Website Hits' for the 'This Week' time period, using 'All Devices' and 'Single Report' type. Under 'Advanced' settings, the 'Enable Auto-cache' checkbox is checked and highlighted with a red box.

Which two statements are true regarding enabling auto-cache on FortiAnalyzer? (Choose two.)

- A. This feature is automatically enabled for scheduled reports.**
- B. Report size will be optimized to conserve disk space on FortiAnalyzer.
- C. Enabling auto-cache reduces report generation time for reports that require a long time to assemble datasets.**
- D. Reports will be cached in the memory.

Answer: A,C

NEW QUESTION # 32

In order for FortiAnalyzer to collect logs from a FortiGate device, what configuration is required? (Choose two.)

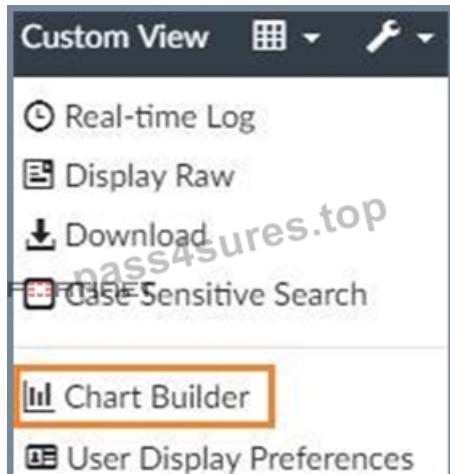

- A. ADOMs must be enabled
- B. Log encryption must be enabled**

- C. Remote logging must be enabled on FortiGate
- D. FortiGate must be registered with FortiAnalyzer

Answer: C,D

NEW QUESTION # 33

Refer to the exhibit.

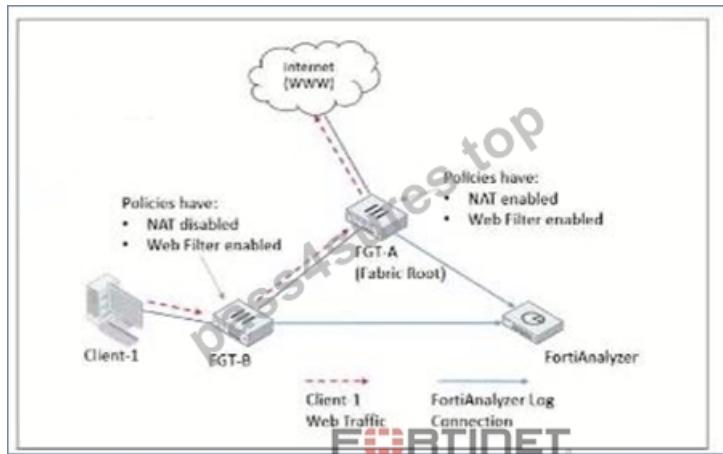

What is the purpose of using the Chart Builder feature on FortiAnalyzer?

- A. This feature allows you to build a chart under FortiView.
- B. In Log View, this feature allows you to build a dataset and chart automatically, based on the filtered search results.
- C. You can add charts to generated reports using this feature.
- D. In Log View, this feature allows you to build a chart and chart automatically, on the top 100 log entries.

Answer: B

NEW QUESTION # 34

Refer to Exhibit:

Client-1 is trying to access the internet for web browsing.

All FortiGate devices in the topology are part of a Security Fabric with logging to FortiAnalyzer configured. All firewall policies have logging enabled. All web filter profiles are configured to log only violations.

Which statement about the logging behavior for this specific traffic flow is true?

- A. Only FGT-B will create traffic logs.
- B. FGT-B will see the MAC address of FGT-A as the destination and notifies FGT-A to log this flow.
- C. FGT B will create traffic logs and will create web filter logs if it detects a violation.
- D. Only FGT-A will create web filter logs if it detects a violation.

Answer: C

Explanation:

The topology shows a Security Fabric setup involving FortiGate devices (FGT-A and FGT-B) and a FortiAnalyzer for centralized logging. Let's break down the logging and traffic flow behavior:

Traffic Flow Analysis:

Client-1 initiates web traffic directed to the internet, which is routed through FGT-B and then FGT-A before reaching the internet. This is indicated by the direction of the red-dashed arrow from Client-1 through FGT-B to FGT-A.

Policy and NAT Settings:

On FGT-B, NAT is disabled, meaning it will pass the traffic through without altering the source IP. This device has a Web Filter enabled with a policy to log violations only.

On FGT-A, NAT is enabled, and a Web Filter profile is also applied. Like FGT-B, it logs only violations for web filtering.

Logging Behavior:

Since both FortiGate devices have logging enabled for traffic and web filtering, they can create logs if conditions are met.

FGT-B will log all traffic, as per its configuration, and will also create web filter logs if it detects a violation, as the web filter profile is applied. Because NAT is disabled on FGT-B, it processes the traffic but doesn't perform any address translation, allowing it to see the original source IP of Client-1.

FGT-A, as the Security Fabric root, will handle NAT and forward the traffic to the internet. However, in this case, the question is focused on where the traffic and web filter logs would be generated first, particularly by FGT-B.

Option Analysis:

Option A - Only FGT-B will create traffic logs: This is incorrect because FGT-B can create both traffic logs and web filter logs if it detects a violation.

Option B - FGT-B will see the MAC address of FGT-A and notify FGT-A to log: This is not how logging works in this setup. Each FortiGate logs independently based on configured policies.

Option C - FGT-B will create traffic logs and will create web filter logs if it detects a violation: This is correct, as FGT-B has logging enabled and will log traffic and web filter violations.

Option D - Only FGT-A will create web filter logs if it detects a violation: This is incorrect, as FGT-B can also log web filter violations independently.

Conclusion:

Correct Answer : C. FGT-B will create traffic logs and will create web filter logs if it detects a violation.

FGT-B is responsible for logging the traffic from Client-1 and will generate web filter logs if there is a policy violation, as configured.
