The language of our Salesforce-Certified-Administrator Study Materials are easy to be understood, only with strict study, we write the latest and the specialized Salesforce-Certified-Administrator study materials. We want to provide you with the best service and hope you can be satisfied.

## Salesforce Certified Administrator Sample Questions (Q112-Q117):

### NEW QUESTION # 112

The administrator at Northern TrailOutfitters has been using a spreadsheet to track assigned licenses and permission sets. What feature can be used to track this in Salesforce?

- A. Permission Set Groups
- **B. User Report**
- C. Lightning Usage App
- D. Login History

**Answer: B**

Explanation:

Explanation

To track assigned licenses and permission sets in Salesforce instead of using a spreadsheet, an administrator should use User Report type on Report object. User Report type allows creating reports that show information about users such as their profile, role, license type, activestatus, login history etc. It also allows adding fields related to permission sets such as Permission Set Assignments or Permission Set License Assignments. For example, an administrator can create a User Report that shows user name, profile name, user license name, permission set assignments count etc. Login History, Lightning Usage App, or Permission Set Groups are not features that can be used to track assigned licenses and permission sets in Salesforce.

#### NEW QUESTION # 113

The Administrator at Cloud Kicks need to automatically route support cases, regardless of how they are created, to a queue based on case priority.

What tool should the administrator use?

- A. Web-to-case
- **B. Assignment Rules**
- C. Auto-Response Rules
- D. Email-to-Case

**Answer: B**

#### NEW QUESTION # 114

Users have noticed that when they click on a report in a dashboard to view the report details, the values in the report are different from the values displayed on the dashboard.

What are the two reasons this is likely to occur?

Choose 2 answers

- **A. The dashboard needs to be refreshed.**
- B. The current user does not have access to the report folder.
- C. The report needs to be refreshed.
- **D. The running dashboard user and viewer have different permissions.**

**Answer: A,D**

Explanation:

Explanation

Dashboards show data from source reports as visual components that provide a snapshot of key metrics and performance indicators. Dashboards need to be refreshed manually or scheduled to run on a regular basis to reflect the most recent data from the reports. The running user of a dashboard determines whose security settings are applied when the dashboard is run. If the running user is different from the viewer of the dashboard, they may see different data based on their permissions and sharing settings.

#### NEW QUESTION # 115

Ursa Major Solar has a path on Case. The company wants to require its users to follow the status values as they are on the path. Agents should be prohibited from reverting the Case back to a previous status.

Which feature should an administrator use to fulfill this request?

- A. Predefined Field Values
- B. Dependent Picklists
- C. Global Value Picklists
- **D. Validation Rules**

**Answer: D**

### NEW QUESTION # 116

The Support team at Ursa Major Solar prefers using split list views on the case homepage. Occasionally, the team views shipments from another support application.

What should the administrator configure to allow the team to use the split list view?

- A. Filter by a single shipment record type in the list view.
- B. Include the Shipments tab on the app's navigation bar.
- **C. Split views are only available on standard objects.**
- D. Add the Manage List Views permission for support users.

**Answer: C**

Explanation:

Explanation

Split views are a feature that allows users to view records as a split list on object home pages in Lightning Experience apps that use console navigation. Split views show records in two panes: a list view pane on the left and a record detail pane on the right. Users can switch between different list views and records without losing context or scrolling. However, split views are only available on standard objects such as accounts, contacts, leads, opportunities, cases, etc., and not on custom objects such as shipments.
