Customizable MB-700 Exam Mode - MB-700 Exam Reference

Our company has always been following the trend of the MB-700 certification. Our research and development team not only study what questions will come up in the MB-700 exam, but also design powerful study tools like exam simulation software. With the Software version of our MB-700 study materials, you can have the experience of the real exam which is very helpful for some candidates who lack confidence or experience of our MB-700 training guide.

Microsoft MB-700 Certification Exam is recognized worldwide and is highly valued by organizations that use the Dynamics 365 platform. Microsoft Dynamics 365: Finance and Operations Apps Solution Architect certification is proof that the candidate has the skills and knowledge required to design and implement solutions that meet the business requirements of clients using Microsoft Dynamics 365: Finance and Operations Apps. Microsoft Dynamics 365: Finance and Operations Apps Solution Architect certification also opens up new career opportunities and provides a competitive edge in the job market.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q282-Q287):

NEW QUESTION # 282

A company plans to implement Dynamics 365 Supply Chain Management.

The company's employees have been using the same system and processes for many years. Employees are reluctant to change the old processes.

You need to create an adoption plan and measure the effectiveness of the plan.

In which phase does each activity belong? To answer, drag the appropriate phases to the correct activities.

Each phase may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Phases	Answer Area	Phase
Envision	Activity	
Onboard	Create an adoption plan.	Phase
Drive value	Measure the effectiveness of the plan.	Phase

Answer:

Explanation:

Phases

Envision

Onboard

Drive value

Answer Area

Activity

Create an adoption plan.

Measure the effectiveness of the plan.

Phase

Onboard

Drive value

Explanation:

Box 1: Onboard

Phase two: Onboard

Work with your key stakeholders to build and launch your adoption plan. Prepare your environment and test your adoption approach with Early Adopters. Use feedback to make adjustments before scaling to the business. In this phase, you will:

Build your adoption plan.

Launch to Early Adopters.

Adjust your plan.

Box 2: Drive value

Phase three: Drive value

Full-scale deployment and business success depend on usage and satisfaction. This requires planning through the Envision and Onboard phases plus ongoing operational excellence. In this phase, you will:

Monitor end-user adoption.

Measure and report usage.

Encourage ongoing engagement.

Topic 1, CoHo Vineyard and Winery Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

CoHo Vineyard and Winery is based in the United States. The company has a single vineyard. The company distributes full pallets of wine worldwide and sometimes sells wine by using a private label. Grape growing and wine production operations are owned and

operated by a third-party company. The company uses bottles, accessories, and other disposables from a company in China. CoHo Vineyard and Winery opens a second location. This location manages inventory for Wine Club members and includes a wine tasting room. The location also includes a warehouse and distribution center.

The wine club currently has 200 members. The company hopes to increase this number.

The company holds events for club members in the tasting room and ships both full cases and individual bottles to members. The tasting room is not treated as a retail store. All sales to club members only and purchases must be made on-account.

Company structure

The following graphic shows the company structure:

Organization

The current organizational chart and roles as follows:

Current environment

Coho Vineyard and Winery currently uses manual processes for most of its operations. The company stores names and phone numbers for club members and prospective club members in a Microsoft Excel workbook.

The sales team currently tracks club membership in a separate system. Sales team stock awards are granted on a three-year basis.

The solution for the sales Team cannot be replaced for three years.

* The types of wine, such as cabernet sauvignon and red blends are tracked as separate items. Each item will have a year associated with it such as Red Blend 2017, 2018, 2019, etc. The items are updated for the year association annually.

* Peak times for order entry could be in the hundreds. This typically happens when first and second shift workers overlap and all users are on the system, as well as orders imported in.

* Packaging materials, bottles, and accessories are received in the warehouse FOB Destination from the manufacturer in China.

* Each retailer has individual item numbers, barcode placement descriptions and other additions such as pictures and details of the wine year and flavor notes.

CoHo Vineyard and Winery has outgrown their legacy ERP system and plans to implement Dynamics 365 Finance. CoHo wants to use out-of-the-box tools which are linked to the system where possible and not create new tools.

Licensing and organization

* Only the President/CEO, CFO, COO, Controller and VP Operations users must be able to access finance and warehouse features.

* Warehouse users must only have access to warehouse function. All other users must have access to finance functions.

* The distribution center must have mobile scanners for the warehouse. The tasting room will not have mobile scanners.

* The inventory cost must be tracked separately by distribution center or tasting room.

Club membership events

* You must ensure the members created in their existing system are also customers in Dynamics 365 Finance and that the customers do not exist in both systems under multiple record numbers.

* When tasting events are planned, text notifications must be sent out to the club members.

* text notifications must sent out to non-club members to encourage the non-members to join the club.

* During tasting events, CoHo will need access to place orders during the event but will not have the need for cash registers.

Warehouse and shipping

* The system must be able to track inventory throughout the whole warehouse process.

* A Certificate of Origin must accompany each shipment.

* Private label items that are shipped to retailers must be stored and costed as a single item number at CoHo.

* The system must be able to compare year-to-year performance of a single wine type.

Implementation

* Business processes must be documented as step-by-step processes and must align with the process flows in a visual format

* Data will be migrated and is a requirement for order entry.

* Data migration must be completed prior to testing.

* You must track each step of process validation so that the users have ownership for their individual functional areas. The tracking system used should be integrated with the system where possible.

Issues

* Users are struggling to understand the new system's processes.

* CoHo is concerned that the go-live will may not go smoothly.

NEW QUESTION # 284

You need to implement the planned changes for the marketing department.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set invite external users to shared channels to On for the Teams policy of the marketing department.
- B. From the Microsoft Entra Admin center, configure the B2B direct connect outbound access settings for external user and groups.
- C. From the Microsoft Entra Admin center, configure the B2B direct connect outbound access settings for external user and groups.
- D. Set Join external shared channels to On for the Teams policy of the marketing department.
- E. Set invite external user to shared channels to On for the Global (Org-wide default) Teams policy.

Answer: A,C

NEW QUESTION # 285

A company implements Dynamics 365 Finance. The company does not have a developer on staff.

The company designs vendor checks that will be accepted by banks. The company wants to format new vendor checks for multiple banks.

You need to recommend a solution to validate that a venerated vendor check format matches the original check format.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Answer Area	Requirement	Tool
Document management		Format new vendor checks.	Tool
Business documents		Validate vendor check formats.	Tool
SQL Server Reporting Services (SSRS)			
Electronic reporting			

Answer:

Explanation:

Tools	Answer Area	Requirement	Tool
Document management		Format new vendor checks.	Electronic reporting
Business documents		Validate vendor check formats.	Document management
SQL Server Reporting Services (SSRS)			
Electronic reporting			

Explanation

Box 1: Electronic reporting

You can use Electronic reporting (ER) to format vendor checks. Many bank-specific and check provider-specific check formats are available on the market. Sample check formats have been included in the Payment check model in the ER tool repository. These sample checks are labeled Check in the middle (US) and Check on top stub below (US).

Box 2: Document management

Business document management is built on top of the ER framework and enables business users to edit business document templates by using Microsoft 365 service or appropriate Microsoft Office desktop application. Edits to the documents might include changing business document designs and adding placeholders for additional data without source code changes and new deployments. No knowledge of the ER framework is required to update templates of business documents.

NEW QUESTION # 286

A client wants to create a custom view-only security role that allows users to view the customer list in the accounts receivable module. It must be accurately reported during a security audit.

You need to recommend how to implement the privileges.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Add the CustCustomerMasterInquire duty to the ReadOnlyUserAR role.	
Create a new security role named ReadOnlyUserAR .	
Add the Customers privilege to the CustCustomerMasterInquire duty.	
Add the custom role ReadOnlyUserAR to users.	
Create a custom duty named CustomerViewList .	
Add the Customers privilege to the CustomerViewList duty.	
Add the CustomerViewList duty to the ReadOnlyUserAR role.	

Answer:

Explanation:

- Add the **CustCustomerMasterInquire** duty to the **ReadOnlyUserAR** role.
- Create a new security role named **ReadOnlyUserAR**.
- Add the **Customers** privilege to the **CustCustomerMasterInquire** duty.
- Add the custom role **ReadOnlyUserAR** to users.
- Create a custom duty named **CustomerViewList**.
- Add the **Customers** privilege to the **CustomerViewList** duty.
- Add the **CustomerViewList** duty to the **ReadOnlyUserAR** role.

- Create a new security role named **ReadOnlyUserAR**.
- Create a custom duty named **CustomerViewList**.
- Add the **Customers** privilege to the **CustomerViewList** duty.
- Add the **CustomerViewList** duty to the **ReadOnlyUserAR** role.
- Add the custom role **ReadOnlyUserAR** to users.
