In summary, the easiest way to prepare for AAPC-CPC certification exam is to complete AAPC-CPC study material.

## Medical Tests American Academy of Professional Coders: Certified Professional Coder Sample Questions (Q83-Q88):

### NEW QUESTION # 83

A sternal closure using sutures is considered inclusive to CPT 33255 and should not be reported separately.

- A. False
- B. True

**Answer: B**

**Explanation:**

The statement is true. Regardless of how a sternal closure is performed, it would be considered integral to this, and any other open cardiac procedure, when a sternal approach is used as the method of exposure. If a sternal closure were performed as the only procedure to repair an injury, the closure would then be reported.

#### NEW QUESTION # 84

What is the main role of the tonsils?

- A. Remove bacteria that enter the body through the nose and/or mouth
- B. Trigger the formation of antibodies
- C. Filter lymph and form lymphocytes
- D. Secrete antibodies to destroy ingested microbes

**Answer: A**

Explanation:

The primary role of the tonsils is to remove bacteria that enter through the oral and nasal cavity. Antigens are molecules located on the surface of pathogens and trigger the formation of antibodies. Lymph nodes filter lymph and form lymphocytes. B cells secrete antibodies that assist in destroying bacterium causing disease.

#### NEW QUESTION # 85

Code the following procedure note:

A selective catheter is placed into the thoracic aorta, where it is then manipulated into the left coronary artery and followed through into the right common carotid artery. Contrast injections are made, and digital imaging is performed. Upon completion, the catheter is removed, pressure is applied at the puncture site, and the patient is discharged.

- A. 36200, 36215, 36216-59
- B. 0
- C. 1
- D. 36215, 36216-59

**Answer: D**

Explanation:

The left coronary artery and the right common carotid artery would each be considered their own vascular family. Therefore, when the starting point of selective catheterization is the aorta, the left coronary artery would be considered first order (36215) in the vascular family and the right common carotid artery would be considered the second order (36216). Modifier 59 is appended to indicate that a different vascular family was examined in one session. Contrast materials and catheterization into the aorta are inclusive to the nvo procedures and are not to be separately coded.

#### NEW QUESTION # 86

In which scenario would the modifier 53 be appended?

- A. The surgeon decides to terminate a routine colonoscopy when the patient becomes hypertensive before receiving anesthesia in the outpatient procedure room.
- B. An IUD removal is not completed because the patient reports severe pain when the speculum is inserted.
- C. A patient receives an x-ray of one femur when the doctor ordered bilateral views.
- D. A surgeon decides to stop a gallbladder removal procedure in the hospital operating room after the patient has extensive bleeding at the incision site.

**Answer: D**

Explanation:

Modifier 53 is used to indicate that a procedure was terminated by the provider after anesthesia was given due to extenuating circumstances that affected the health of the patient.

Although option B is similar, the procedure that was discontinued was done so prior to anesthesia in the outpatient setting, in which case modifier 73 would be appended.

#### NEW QUESTION # 87

Medical necessity has been established if a laboratory runs additional testing on a urine sample to determine the presence of a drug class that was not in question during confirmation testing.

- A. True
- B. False

**Answer: B**

Explanation:

The statement is false. To establish medical necessity, the provider/laboratory must indicate the drug class they are screening for prior to the test.

## NEW QUESTION # 88

.....

Actual4Cert is one of the leading best platforms that have been offering valid, verified, and updated Medical Tests Exam Questions for many years. Over this long time period, countless AAPC-CPC exam candidates have passed their AAPC-CPC Exam.
