Our SDS exam questions are highly praised for their good performance. Customers often value the functionality of the product. After a long period of research and development, our SDS learning materials have been greatly optimized. We can promise you that all of our SDS practice materials are completely flexible. In addition, we have experts who specialize in research optimization, constantly update and improve our learning materials, and then send them to our customers. We take client's advice on SDS training prep seriously and develop it with the advices.

Our SDS test prep embrace latest information, up-to-date knowledge and fresh ideas, encouraging the practice of thinking out of box rather than treading the same old path following a beaten track. As the industry has been developing more rapidly, our SDS exam dumps have to be updated at irregular intervals in case of keeping pace with changes. To give you a better using environment, our experts have specialized in the technology with the system upgraded to offer you the latest SDS Exam practices. What's more, we won't charge you in one-year cooperation; if you are pleased with it, we may have further cooperation. We will inform you of the latest preferential activities about our SDS test braindumps to express our gratitude towards your trust.

Reliable Test SDS Test - New SDS Exam Pass4sure

Have you thought of how to easily pass DASCASDS test? Have you found the trick? If you don't know what to do, I'll help you. In

actual, there are many methods to sail through SDS exam. One is to learn exam related knowledge SDS certification test demands. Are you doing like this? However the above method is the worst time-waster and you cannot get the desired effect. Busying at work, you might have not too much time on preparing for SDS Certification test. Try PDFVCE DASCA SDS exam dumps. PDFVCE dumps can absolutely let you get an unexpected effect.

DASCA Senior Data Scientist Sample Questions (Q64-Q69):

NEW QUESTION # 64

Which of the following is TRUE for Chief Data Monetization Officer (CDMO)?

- i. CDMO should focus on driving and deriving value from the organization's data and analytic assets.
- ii. The CDMO should own the organization's investment decisions with respect to data and analytics.
- iii. CDMO should have revenue and margin responsibilities.

- A. i, ii
- **B. All of the above**
- C. ii, iii

Answer: B

Explanation:

The Chief Data Monetization Officer (CDMO) is a C-level executive role emerging in data-driven organizations. Their focus is on turning data into business value and revenue growth.

Statement i: Correct. The CDMO is responsible for value realization from data and analytics investments.

Statement ii: Correct. The CDMO owns decisions around investment prioritization for data initiatives.

Statement iii: Correct. Since monetization is directly linked to business performance, the CDMO must be accountable for revenue and margin impact.

Hence, all three statements are correct, making the right answer Option C (All of the above).

NEW QUESTION # 65

Exploratory analytic algorithms help the Data Science team to better:

- A. Gain a high-level understanding of relationships
- B. Understand the data content
- **C. All of the above**
- D. Understand patterns in the data
- E. Both A and B

Answer: C

Explanation:

Exploratory analytics (often referred to as Exploratory Data Analysis - EDA) is a fundamental step in data science, enabling practitioners to discover initial insights, detect anomalies, and understand the structure of datasets before applying predictive or prescriptive modeling.

Option A (Understand the data content): Correct. EDA techniques (descriptive statistics, summary tables, profiling) reveal missing values, data types, and distributions.

Option B (Gain a high-level understanding of relationships): Correct. Correlation analysis, scatter plots, and cross-tabulations help identify dependencies between variables.

Option C (Understand patterns in the data): Correct. Visualization and clustering methods help discover hidden structures, seasonalities, and outliers.

Since exploratory algorithms contribute to all of these objectives, the correct answer is Option E (All of the above).

NEW QUESTION # 66

JSON takes hierarchical data structures and serializes them into:

- A. None of the above

- B. Plain string format
- C. Any desired format
- **D. Both A and B**
- E. Plain text format

Answer: D

Explanation:

JSON (JavaScript Object Notation) is a lightweight data-interchange format widely used for storing and exchanging structured or semi-structured data. JSON allows hierarchical (tree-like) structures, such as nested objects and arrays, to be serialized into a textual representation.

Option A (Plain text format): Correct. JSON files are stored as plain text, making them human-readable and language-independent.

Option B (Plain string format): Correct. JSON objects are transmitted as strings across networks (e.g., via APIs, RESTful services).

Option C: Incorrect. JSON does not serialize into "any format," but specifically into text/string-based formats.

Option D: Correct. Since JSON is both plain text and transmitted as string format, the right answer is both A and B.

Option E: Incorrect.

Thus, JSON serializes hierarchical data into plain text and string formats.

NEW QUESTION # 67

Which of the following is TRUE about Avro?

- A. None of the above
- **B. Both A and B**
- C. Avro is based on Remote Procedure Call (RPC)
- D. Avro is a data serialization framework

Answer: B

Explanation:

Apache Avro is a widely used framework within the Hadoop ecosystem for data serialization and data exchange.

Option A (Correct): Avro is a compact, fast, binary data serialization format. It allows efficient storage and exchange of structured data.

Option B (Correct): Avro supports Remote Procedure Call (RPC). It provides a framework for RPC communication, making it easier for distributed applications to exchange data across systems.

Option C: Correct, since both statements are true.

Option D: Incorrect because Avro is indeed both a serialization framework and RPC-based.

In data engineering workflows, Avro is valuable because it is schema-based (defined using JSON), highly interoperable, and ensures compatibility across different programming languages. This makes it essential in big data pipelines, Kafka messaging, and Hadoop ecosystem tools.

Thus, the correct answer is Option C (Both A and B).

NEW QUESTION # 68

Which of the following statements is correct?

- **A. Apache claimed that Spark is able to run parallel jobs 100 times faster in memory and 10 times faster on disk in comparison to the traditional Hadoop MapReduce**
- B. Apache claimed that Spark is able to run parallel jobs 50 times faster in memory and 5 times faster on disk in comparison to the traditional Hadoop MapReduce
- C. Apache claimed that Spark is able to run parallel jobs 1000 times faster in memory and 100 times faster on disk in comparison to the traditional Hadoop MapReduce
- D. Apache claimed that Spark is able to run parallel jobs 10 times faster in memory and 100 times faster on disk in comparison to the traditional Hadoop MapReduce

Answer: A

Explanation:

Apache Spark is a distributed computing framework designed as an improvement over Hadoop's MapReduce.

According to the official Apache Spark documentation:

Spark can run workloads up to 100x faster in memory.

Spark can run workloads up to 10x faster on disk.

This performance gain comes from Spark's use of in-memory computation, DAG execution engine, and optimized query execution, compared to the slower, disk-heavy Hadoop MapReduce framework.

Thus, the correct statement is Option A.
