In today's society, many people are busy every day and they think about changing their status of profession. They want to improve their competitiveness in the labor market, but they are worried that it is not easy to obtain the certification of Plat-Admn-202. Our study tool can meet your needs. Once you use our Plat-Admn-202 exam materials, you don't have to worry about consuming too much time, because high efficiency is our great advantage. You only need to spend 20 to 30 hours on practicing and consolidating of our Plat-Admn-202 learning material, you will have a good result. After years of development practice, our Plat-Admn-202 test torrent is absolutely the best.

Salesforce Certified Platform App Builder Sample Questions (Q12-Q17):

NEW QUESTION # 12

The Recruiting team at AW Computing captures the job acceptance and date of hire of a candidate on the Job Application custom object. Once the candidate accepts the recruiter's job offer, the date of hire should be entered and not be changed on subsequent record edit.

Which validation formula should the app builder use?

- A. NOT(ISBLANK(Job_Accepted__c)) || ISCHANGED(Hire_Date__c)
- B. (ISBLANK(Job_Accepted__c) || NOT(ISCHANGED(Hire_Date__c)))
- C. NOT(ISBLANK(Job_Accepted__c)) && ISCHANGED(Hire_Date__c)
- D. (ISBLANK(Job_Accepted__c) && NOT(ISCHANGED(Hire_Date__c)))

Answer: C

Explanation:

NOT(ISBLANK(Job_Accepted__c)) && ISCHANGED(Hire_Date__c) is the validation formula that the app builder should use to meet the requirement of preventing changes to Hire Date after Job Accepted is entered. This formula will return TRUE if Job Accepted is not blank and Hire Date is changed, which will display an error message and prevent saving the record. The other formulas are not correct or valid.

NEW QUESTION # 13

Where can an app builder edit an existing app to add components to the utility bar?

- A. App Menu
- B. App Manager
- C. Lightning App Builder
- D. Lightning Record Page

Answer: B

Explanation:

To add components to the utility bar of an existing app:

C. App Manager. This is where Salesforce apps are configured, including the utility bar which can house components like a chat tool, recent items list, or custom Lightning components.

Steps to edit an app's utility bar:

Navigate to Setup → App Manager.

Locate the desired app and click on the dropdown next to it → select Edit.

In the App Builder, navigate to the Utility Items tab.

Click 'Add' to include new components to the utility bar.

Configure the properties of the utility item as needed.

Save the app configuration.

For step-by-step instructions on modifying apps, see Salesforce's guide on Managing Apps in Lightning Experience.

NEW QUESTION # 14

Universal Containers wants to create a report to show job applications with or without resumes.

What considerations should the app builder be aware of when creating the custom report type?

- A. An app builder is unable to create custom report types for objects they do not have permissions for.
- B. Once the report type has been deployed it is unable to be deleted.
- C. A primary object selection is locked once the custom report type has been saved.
- D. When a custom or external object is deleted the report type and reports remain but cause an error when the report is run.

Answer: C

Explanation:

The primary object selection is locked once the custom report type has been saved. This means that the app builder cannot change the primary object later. The other options are not true.

NEW QUESTION # 15

An app builder is loading data into Salesforce. To link the new records back to the legacy system, a field will be used to track the legacy ID on the Account object. For future data loads this ID will be used when upserting records. Which two field attributes should be selected? Choose 2 answers

- A. Request
- **B. Unique**
- **C. External ID**
- D. Text (encrypted)

Answer: B,C

Explanation:

The correct answers are B. External ID and C. Unique.

The legacy ID field should be marked as External ID because Salesforce can use an external ID field to match records during import, integration, and upsert operations. Salesforce documentation confirms that external IDs can be used to create or update records through upsert.

The field should also be marked Unique so Salesforce prevents duplicate legacy ID values. Salesforce custom field attribute documentation states that the Unique option prevents duplicate field values.

Why others are incorrect:

A is incorrect because encrypted text is not the right choice for a matching legacy ID used in upserts.

D is not the best answer because making the field required does not enable upsert matching or prevent duplicate external IDs.

NEW QUESTION # 16

Choose 3 options. Cloud Kicks wants to set up a new opportunity approval process and execute various action items based on the initial submission. Which three action types should an app builder use in the approval process?

- A. Invocable Flow
- **B. Task**
- C. Decision Element
- **D. Outbound Message**
- **E. Email Alert**

Answer: B,D,E

Explanation:

The correct answers are C. Email Alert, D. Task, and E. Outbound Message.

In a standard Salesforce approval process, available approval action types include Email Alerts, Tasks, Field Updates, and Outbound Messages. Since Field Update is not listed in the answer choices, the three valid action types from the options are Email Alert, Task, and Outbound Message. Salesforce documentation identifies approval-process actions around task, email alert, field update, and outbound message automation.

A . Invocable Flow is incorrect because it is not a standard approval-process action type in this exam context.

B . Decision Element is incorrect because Decision is a Flow element, not an approval-process action.

NEW QUESTION # 17

.....

For candidates who are going to choose the Plat-Admn-202 training materials online, the quality must be one of the most important standards. With skilled experts to compile and verify, Plat-Admn-202 exam braindumps are high quality and accuracy, and you can use them at ease. In addition, Plat-Admn-202 exam materials are pass guarantee and money back guarantee. You can try free demo for Plat-Admn-202 Exam Materials, so that you can have a deeper understanding of what you are going to buy. We have online and offline chat service stuff, and if you have any questions for Plat-Admn-202 exam materials, you can consult us.
