Candidates must have a deep understanding of Windows Server infrastructure, Azure services, and hybrid environments to pass the exam.

Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q156-Q161):

NEW QUESTION # 156

Your network contains an Active Directory Domain Services (AD DS) forest. The forest contains a user named User1 that has following attributes:

* whenCreated: 8/16/2023 8:04:55 AM

* distinguishedName: CN=User1,DC=contoso,DC=com

* objectGUID: ef91eeG0-d371-4ee4-9c35-7da64c432a67

* objectSID: S-I-5-21-2106002304-3506747707-1284373444-1610

You need to use the Active Directory Migration Tool (ADMT) to migrate User1 to an AD DS forest named fabrikam.com. Which attributes will change after you migrate User1 to fabrikam.com?

- A. distinguishedName and objectSID only
- B. distinguishedName only
- C. distinguishedName, objectGUID, and objectSID only
- D. distinguishedName, objectGUID, objectSID, and whenCreated
- E. distinguishedName, objectSID, and whenCreated only

Answer: E

NEW QUESTION # 157

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a server named Server1 that runs Windows Server.

You need to ensure that only specific applications can modify the data in protected folders on Server1.

Solution: From Virus & threat protection, you configure Controlled folder access.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/security/defender-endpoint/customize-controlled-folders?view=o365-worldwide>

NEW QUESTION # 158

You are planning the www.fabrikam.com website migration to support the Azure migration plan.

How should you configure WebApp1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Topic 2, Contoso, Ltd

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a manufacturing company that has a main office in Seattle and branch offices in Los Angeles and Montreal.

Existing Environment

Active Directory Environment

Contoso has an on-premises Active Directory Domain Services (AD DS) domain named contoso.com that syncs with an Azure Active Directory (Azure AD) tenant. The AD DS domain contains the domain controllers shown in the following table.

Contoso recently purchased an Azure subscription.

The functional level of the forest is Windows Server 2012 R2. The functional level of the domain is Windows Server 2012. The forest has the Active Directory Recycle Bin enabled.

The contoso.com domain contains the users shown in the following table.

The contoso.com domain has the Group Policy Objects (GPOs) shown in the following table.

The contoso.com domain has the Password Settings Objects (PSOs) shown in the following table.

Server Infrastructure

The contoso.com domain contains servers that run Windows Server 2022 as shown in the following table.

By using Windows Firewall with Advanced Security, the servers have isolation connection security rules configured as shown in the following table.

Server4 has no connection security rules.

Server4 Configurations

Server4 has the effective Group Policy settings for user rights as shown in the following table.

Server4 has the disk configurations shown in the following exhibit.

Virtualization Infrastructure

The contoso.com domain has the Hyper-V failover clusters shown in the following table.

Technical Requirements

Contoso identifies the following technical requirements:

- * Promote a new server named DC4 that runs Windows Server 2022 to a domain controller.
- * Replicate the virtual machines from Cluster2 to an Azure Recovery Services vault.
- * Centrally manage performance alerts in Azure for all the domain controllers.
- * Ensure that User1 can recover objects from the Active Directory Recycle Bin.
