One decision will automatically lead to another decision, we believe our 1Z0-947 guide dump will make you fall in love with our products and become regular buyers.

Oracle GoldenGate 19c Implementation Professional Sample Questions

(Q141-Q146):

NEW QUESTION # 141

You made changes to the GLOBALS parameter file using an editor on the OS. After saving your changes, you noticed the changes did not take effect. What would be the reason for this?

- A. You did not stop all replication processes running in so the changes can take effect.
- B. You did not MGR so the changes can take effect.
- C. You did not restart GGSCI.
- D. You did not make changes on the OS logged in as the GoldenGate Administrator user.

Answer: C

Explanation:

This is because GLOBALS parameters are read only at GGSCI startup, unlike other dynamic parameter files (e.g., Extract or Replicat configs). So without restarting GGSCI, your changes won't be recognized.

NEW QUESTION # 142

Using adminclient, you can add a data pump Extract using the command: "ADD EXTRACT <ext name>, EXTTRAILSOURCE <trail file>"

- A. TRUE
- B. FALSE

Answer: B

Explanation:

adminclient doesn't support EXTTRAILSOURCE; it's not used in Extract setup.

NEW QUESTION # 143

Initial Load is a process of extracting data records from the source database and loading those records onto the target database. There are many advantages in using GoldenGate to obtain the data from the source and load the records onto the target. What describes the advantage of continuing to make data changes on the source database while loading data onto the target database?

- A. Enable the LGWR to indicate in the transaction log when initial load commenced.
- B. Enable data changes on source tables without locking tables.
- C. Enable Extract to indicate in the trail file when initial load commenced.
- D. Enable change delivery to handle collisions with initial load.

Answer: B

Explanation:

"Oracle GoldenGate can perform a one-time initial load while the source tables remain online and active. You do not need to lock the source tables during the load. Oracle GoldenGate tracks ongoing changes with Change Data Capture (CDC) and applies them after the load completes."

NEW QUESTION # 144

Oracle GoldenGate is a middleware software and can be used for business intelligence to support a heterogeneous database environment.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

GoldenGate is middleware supporting business intelligence across different databases.

NEW QUESTION # 145

The filter clause provides the ability to include or exclude data to process. What is true with this filter clause FILTER (ON UPDATE, ON DELETE, @COMPUTE(PRODUCT_PRICE * PRODUCT_AMOUNT) > 10000);?

- A. Data processing will exclude rows for delete if (PRODUCT_PRICE * PRODUCT_AMOUNT) is not greater than 10000.
- B. Data processing will include rows for insert if (PRODUCT_PRICE * PRODUCT_AMOUNT) is not greater than 10000.
- C. Data processing will include rows for delete if (PRODUCT_PRICE * PRODUCT_AMOUNT) is not greater than 10000.
- D. Data processing will exclude rows for update if (PRODUCT_PRICE * PRODUCT_AMOUNT) is not greater than 10000.

Answer: D

Explanation:

The clause:

sql

CopyEditFILTER (ON UPDATE, ON DELETE, @COMPUTE(PRODUCT_PRICE * PRODUCT_AMOUNT) > 10000) means the filter only applies to UPDATE and DELETE operations. Oracle GoldenGate evaluates the expression:

sql

CopyEdit@COMPUTE(PRODUCT_PRICE * PRODUCT_AMOUNT) > 10000

If TRUE, the record is processed.

If FALSE, the record is excluded from replication.

NEW QUESTION # 146

.....

We have always been known as the superior after sale service provider, since we all tend to take lead of the whole process after you choose our 1Z0-947 exam questions. So you have no need to trouble about our 1Z0-947 learning guide. Our 1Z0-947 training materials will continue to pursue our passion for better performance and comprehensive service of 1Z0-947 Exam.
