P.S. Free & New SAFe-Practitioner dumps are available on Google Drive shared by Easy4Engine: <https://drive.google.com/open?id=12-RNnjWfyTNKrNQZ0NThFZj-K3-pFIUT>

Up to now our SAFe-Practitioner real exam materials become the bible of practice material of this industry. Ten years have gone, and three versions have been made for your reference. They made the biggest contribution to the efficiency and quality of our SAFe Practitioner Exam (6.0) practice materials, and they were popularizing the ideal of passing the exam easily and effectively. All SAFe-Practitioner Guide prep is the successful outcomes of professional team.

The SAFe 5 Practitioner (SP) exam is an essential certification program for professionals who want to excel in the field of Agile development. It provides individuals with the knowledge and skills required to effectively implement the SAFe framework in their organizations. SAFe Practitioner Exam (6.0) certification is highly respected in the industry, and individuals who hold the certification are considered to be highly skilled and knowledgeable in the field of Agile development.

The SP certification exam also examines the skills required to form and manage agile teams. This includes understanding the roles and responsibilities of team members, developing cross-functional and self-managing teams, and establishing effective communication and collaboration practices. With these skills, SP practitioners are equipped to lead and manage agile teams in a way that enables them to deliver high-quality products and services quickly and efficiently.

The SAFe 5 Practitioner certification exam is a comprehensive exam that covers a wide range of topics related to SAFe and Agile practices. SAFe-Practitioner Exam includes multiple-choice questions that assess an individual's understanding of Agile methodologies, SAFe principles, Lean and Agile practices, and more. SAFe-Practitioner exam is conducted online and can be taken from anywhere in the world.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q142-Q147):

NEW QUESTION # 142

Which of the following are roles at the ART level?

- A. Business Owners

- B. System Team
- C. Product Owner
- D. System Architect

Answer: A,B,D

NEW QUESTION # 143

Which of the following principles includes "working software is the primary measure of progress"?

- A. Agile Manifesto
- B. Lean Portfolio Management
- C. Lean Thinking
- D. Agile Product Delivery

Answer: A

Explanation:

The principle that includes "working software is the primary measure of progress" is one of the twelve principles behind the Agile Manifesto. The Agile Manifesto is a declaration of four values and twelve principles that guide the Agile software development movement. The value that corresponds to this principle is "working software over comprehensive documentation". The principle states that the ultimate goal of any software development project is to deliver working software that satisfies the customer's needs and expectations, and that any other intermediate or auxiliary artifacts, such as plans, documents, models, or reports, are secondary and should not distract from the main objective. The principle also implies that working software should be delivered frequently and continuously, and that the progress of the project should be measured by the amount and quality of the software delivered, not by the adherence to a predefined plan or schedule. NEW QUESTION # 144

Which three questions should each team member answer during the daily stand-up? (Choose three.) Are there any impediments that will prevent the team from meeting the Iteration goals?

- A. How I am contributing to an environment of continuous change?
- B. How am I optimizing the full Solution?
- C. What will I do today to advance the Iteration goals?
- D. How am I splitting the Solutions into Capabilities and Enablers?
- E. What did I do yesterday to advance the Iteration goals?

Answer: A,C,E

Explanation:

The daily stand-up is a 15-minute meeting that occurs every day during the Iteration, where the Agile team members synchronize their work, share their progress, and identify any impediments or dependencies. The daily stand-up follows a simple format, where each team member answers three questions:

* What did I do yesterday to advance the Iteration goals?

* What will I do today to advance the Iteration goals?

* Are there any impediments that will prevent the team from meeting the Iteration goals? These questions help the team members to align their actions with the Iteration goals, communicate their status and plans, and raise any issues or risks that need to be addressed. The daily stand-up also fosters collaboration, accountability, and transparency among the team members, and enables them to adjust their work as needed to deliver value. NEW QUESTION # 145

Which is an aspect of systems thinking?

- A. The length of the queue impacts the wait time
- B. Cadence makes routine everything that can be routine
- C. Optimizing a component does not optimize the system
- D. Mastery drives intrinsic motivation

Answer: C

Explanation:

Systems thinking is a holistic approach to solution development, incorporating all aspects of a system and its environment into the design, development, deployment, and maintenance. It requires leaders and teams to understand the solution, the enterprise, and the value stream as a system. One of the principles of systems thinking is that optimizing a component of the system does not optimize the whole system. In fact, it may even harm the system performance, as it may create bottlenecks, conflicts, or waste in other parts of the system. Therefore, systems thinking encourages looking at the system as a whole and finding the best trade-offs and synergies among the components.
