## Fantastic Google Professional-Cloud-Architect Test Study Guide - PDFVCE Free Download

Our Professional-Cloud-Architect test torrent was designed by a lot of experts in different area. You will never worry about the quality and pass rate of our Professional-Cloud-Architect study materials, it has been helped thousands of candidates pass their Professional-Cloud-Architect exam successful and helped them find a good job. If you choose our Professional-Cloud-Architect study torrent, we can promise that you will not miss any focus about your Professional-Cloud-Architect exam. It is proved that our Professional-Cloud-Architect learning prep has the high pass rate of 99% to 100%, you will pass the Professional-Cloud-Architect

exam easily with it.

## Google Certified Professional - Cloud Architect (GCP) Sample Questions (Q241-Q246):

### NEW QUESTION # 241

You are deploying a PHP App Engine Standard service with SQL as the backend. You want to minimize the number of queries to the database.

What should you do?

- A. Set the memcache service level to shared. Create a key called "cached-queries", and return database values from the key before using a query to Cloud SQL.
- **B. Set the memcache service level to dedicated. Create a key from the hash of the query, and return database values from memcache before issuing a query to Cloud SQL.**
- C. Set the memcache service level to shared. Create a cron task that runs every minute to save all expected queries to a key called "cached-queries".
- D. Set the memcache service level to dedicated. Create a cron task that runs every minute to populate the cache with keys containing query results.

**Answer: B**

Explanation:

Explanation

<https://cloud.google.com/appengine/docs/standard/php/memcache/using>

### NEW QUESTION # 242

For this question, refer to the Mountkirk Games case study. You are in charge of the new Game Backend Platform architecture. The game communicates with the backend over a REST API.

You want to follow Google-recommended practices. How should you design the backend?

- A. Create an instance template for the backend. For every region, deploy it on a single-zone managed instance group. Use an L7 load balancer.
- B. Create an instance template for the backend. For every region, deploy it on a multi-zone managed instance group. Use an L4 load balancer.
- C. Create an instance template for the backend. For every region, deploy it on a single-zone managed instance group. Use an L4 load balancer.
- **D. Create an instance template for the backend. For every region, deploy it on a multi-zone managed instance group. Use an L7 load balancer.**

**Answer: D**

### NEW QUESTION # 243

You have deployed an application on Anthos clusters (formerly Anthos GKE). According to the SRE practices at your company you need to be alerted if the request latency is above a certain threshold for a specified amount of time. What should you do?

- A. Configure Anthos Config Management on your cluster and create a yaml file that defines the SLO and alerting policy you want to deploy in your cluster
- B. Use Cloud Profiler to follow up the request latency. Create a custom metric in Cloud Monitoring based on the results of Cloud Profiler, and create an Alerting Policy in case this metric exceeds the threshold
- C. Enable the Cloud Trace API on your project and use Cloud Monitoring Alerts to send an alert based on the Cloud Trace metrics
- **D. Install Anthos Service Mesh on your cluster. Use the Google Cloud Console to define a Service Level Objective (SLO)**

**Answer: D**

Explanation:

<https://cloud.google.com/service-mesh/docs/observability/slo-overview>

#### NEW QUESTION # 244

For this question, refer to the Helicopter Racing League (HRL) case study. Recently HRL started a new regional racing league in Cape Town, South Africa. In an effort to give customers in Cape Town a better user experience, HRL has partnered with the Content Delivery Network provider, Fastly. HRL needs to allow traffic coming from all of the Fastly IP address ranges into their Virtual Private Cloud network (VPC network). You are a member of the HRL security team and you need to configure the update that will allow only the Fastly IP address ranges through the External HTTP(S) load balancer. Which command should you use?

- A. Apply a Cloud Armor security policy to external load balancers using a named IP list for Fastly.
- B. Apply a Cloud Armor security policy to external load balancers using the IP addresses that Fastly has published. C. Apply a VPC firewall rule on port 443 for Fastly IP address ranges.
- C. Apply a VPC firewall rule on port 443 for network resources tagged with sourceip:fastly.

**Answer: C**

Explanation:

Reference: <https://cloud.google.com/load-balancing/docs/https/D18912E1457D5D1DDCBD40AB3BF70D5D>

#### NEW QUESTION # 245

Your company has multiple on-premises systems that serve as sources for reporting. The data has not been maintained well and has become degraded over time. You want to use Google- recommended practices to detect anomalies in your company data. What should you do?

- A. Connect Cloud Dataprep to your on-premises systems. Use Cloud Dataprep to explore and clean your data.
- B. Connect Cloud Datalab to your on-premises systems. Use Cloud Datalab to explore and clean your data.
- C. Upload your files into Cloud Storage. Use Cloud Dataprep to explore and clean your data.
- D. Upload your files into Cloud Storage. Use Cloud Datalab to explore and clean your data.

**Answer: C**

#### NEW QUESTION # 246

.....

PDFVCE has many Google Certified Professional - Cloud Architect (GCP) (Professional-Cloud-Architect) practice questions that reflect the pattern of the real Google Certified Professional - Cloud Architect (GCP) (Professional-Cloud-Architect) exam. PDFVCE allows you to create a Google Certified Professional - Cloud Architect (GCP) (Professional-Cloud-Architect) exam dumps according to your preparation. It is easy to create the Google Professional-Cloud-Architect Practice Questions by following just a few simple steps. Our Google Certified Professional - Cloud Architect (GCP) (Professional-Cloud-Architect) exam dumps are customizable based on the time and type of questions.
