CDFOM Sample Test Online, CDFOM Pdf Torrent

If you really want a learning product to help you, our CDFOM study materials are definitely your best choice, you can't find a product more perfect than it. And according to the data, our CDFOM exam questions have really helped a lot of people pass the exam and get their dreaming CDFOM Certification. As the quality of our CDFOM practice questions is high, the pass rate of our worthy customers is also high as 98% to 100%. It is hard to find in the market.

EXIN Certified Data Center Facilities Operations Manager Sample Questions (Q32-Q37):

NEW QUESTION # 32

Of the below, which is a non-renewable energy source?

- A. Natural Gas
- B. Wind energy
- C. Tidal power
- D. Hydropower

Answer: A

Explanation:

Non-renewable energy sources are those that:

- * Cannot be replenished within a human lifespan
- * Exist in finite quantities
- * Are extracted from fossil fuels or geological deposits

Natural gas is a fossil fuel and therefore non-renewable.

Why the other options are incorrect:

- * Wind energy- renewable
- * Tidal power- renewable
- * Hydropower- renewable

Thus, A is correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * Sustainability planning considers renewable vs. non-renewable sources.
- * Natural gas is listed as a fossil fuel, hence non-renewable.

NEW QUESTION # 33

What is the outcome of a risk evaluation process?

- **A. The decision whether risk treatment needs to take place**
- B. The required budget treating the data center risk
- C. The list of all identified risks
- D. The report advising the board of management to accept all identified risks

Answer: A

Explanation:

In the EPI framework for risk management, after the risk identification and risk analysis steps, the risk evaluation step determines whether the assessed risks are acceptable or require treatment based on the organization's risk appetite, criteria, and the potential impact. The evaluation leads to a decision on whether risk treatment needs to take place.

- * It is not simply compiling all risks (so option C is incorrect).
- * It is not exclusively about budgeting (so option D is incorrect) though budgeting follows treatment decisions.
- * It is not necessarily advising to accept all risks (so option B is incorrect) but rather it supports decision-making on treatment.
- * Therefore, option A is correct: the outcome is the decision whether to treat the risk.

EPI DCFOM-Aligned Reference Concepts

- * Risk evaluation assesses identified and analysed risks against risk criteria to decide on acceptability or need for treatment.
- * The outcome is a documented decision-making step in the risk management process.

NEW QUESTION # 34

A resource matrix is to be created.

What are the main considerations?

- A. Cost efficiency and availability
- **B. Capacity and capability**
- C. Preferences of the staff member
- D. Age and gender

Answer: B

Explanation:

A resource matrix in EPI's organizational framework identifies the resources required to deliver services and match them with the competencies of available staff. The primary considerations when creating a resource matrix are:

Capacity

- * How many personnel are needed?
- * Are there enough staff per shift?
- * Do staffing levels match service requirements, SLAs, and workload?

Capability

- * Do staff have the required skills and competencies?
- * Do they meet certification, technical, and operational requirements?
- * Are backup roles available?
- * Are personnel trained and fit for assigned tasks?

EPI emphasizes that resource planning must align skills + quantity to ensure operational continuity.

Why other options are incorrect:

- * A: Cost efficiency is secondary, and availability alone does not ensure capability.
- * C: Age and gender are irrelevant and inappropriate staffing considerations.
- * D: Personal preferences do not determine resource allocation.

Thus, capacity and capability are the correct considerations.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * Resource matrices map staff capacity and capability to service requirements.
- * Ensures adequate coverage and competency for operations.

NEW QUESTION # 35

Of the below, which can be used to optimize succession planning?

- A. External recruitment
- B. Disciplinary program
- C. Relationship with manager
- **D. Career development program**

Answer: D

NEW QUESTION # 36

Data center operators complain about receiving too many non-alarm conditions. What is the best response?

- A. Retrain staff on how to monitor the data center equipment
- B. Instruct data center operators to ignore the non-alarm notifications
- **C. Conduct a review of alarm information**
- D. Upgrade the monitoring system software to the latest version

Answer: C

Explanation:

When operators receive excessive non-alarm notifications, this indicates that:

- * Thresholds are not well-configured
- * Events are misclassified
- * Alarm definitions are incorrect
- * Monitoring profiles require tuning

EPI's monitoring best practices state that the correct response is to:

Review alarm information and adjust definitions, thresholds, and filtering.

This ensures that:

- * Only relevant alarms reach operators
- * Noise is minimized
- * Operators maintain focus on true issues
- * SLA-related metrics are accurately monitored

Why other options are incorrect:

- * A: Training is secondary and will not fix incorrect alarm settings.
- * C: Ignoring notifications is dangerous and violates operational control.
- * D: Upgrading software may not resolve the underlying configuration problem.

Thus, B is correct.

EPI DCFOM-Aligned Reference Concepts (Paraphrased)

- * Monitoring systems must generate actionable alarms, not noise.
- * Alarm thresholds and event filters must be reviewed and optimized regularly.

NEW QUESTION # 37

.....

No study materials can boost so high efficiency and passing rate like our CDFOM exam reference when preparing the test CDFOM certification. Our CDFOM exam practice questions provide the most reliable exam information resources and the most authorized

expert verification. Our test bank includes all the possible questions and answers which may appear in the real exam and the quintessence and summary of the exam papers in the past. We strive to use the simplest language to make the learners understand our CDFOM Exam Reference and passed the CDFOM exam.
